EXECUTIVE SUMMARY

Public Outreach

The Geauga County Planning Commission has primary approval authority and responsibility over the General Plan, with support from the Geauga County Board of County Commissioners. The Planning Commission was regularly updated on the efforts of the General Plan Steering Committee and other outreach activities described below that took place during the Plan's development.

The development of the General Plan included a multifaceted public outreach effort that entailed:

- A series of five Steering Committee meetings that included residents, private business owners, local and county government officials and representatives from fields related to real estate, education, planning and zoning, economic development, building, transportation/engineering, and recreation
- A Community Survey that included 35 questions on a variety of planning topics made available online and in print that was completed by 1,656 respondents
- A series of four Public Forums held in different geographic locations with interactive feedback stations (see bottom right picture) which were also made available online
- Stakeholder interviews with various County and local agency officials and business community leaders

Overview

A County General Plan serves as a guide in the public decision making process by providing extensive data as well as identifying goals, objectives, and implementation strategies on how to achieve those goals.

The General Plan focuses on the unincorporated areas of Geauga County, but also includes broad policy objectives that can be utilized by local municipalities. While the plan contains detailed initiatives for the Planning Commission to consider, it also highlights potential tools and strategies that local governments and other partners may find useful.

Planning Process

Public outreach is an essential part of the community planning process. Over the course of 2020, various meetings, public forums, and stakeholder interviews were held to keep the public informed and encourage participation along the way.

Preparation of the final document began in late 2020 and continued into 2021 with the Planning Commission review and approval. The General Plan document should be reviewed annually by Planning Commission with major updates occurring every five years.

EXECUTIVE SUMMARY

Structure of Plan

Planning Themes

The General Plan is organized into six planning themes:

- 1. Land Use
- 2. Housing
- 3. Natural Resources
- 4. Infrastructure
- 5. Economic Development
- 6. Community Facilities

The General Plan contains a chapter for each of the six planning themes. Each chapter is broken into four Plan Sections.

Plan Sections

- Goals: These broad goals are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.
- Assessment: The assessment is an examination of data, mapping, and existing and future trends and projections that serve as a baseline for the planning process. The County and its partners can utilize the assessment to help inform their decisionmaking and monitor trends moving forward.
- Planning Commission Initiatives: In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize County goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to these suggested initiatives.
- Potential Tools & Strategies: This section includes an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals.

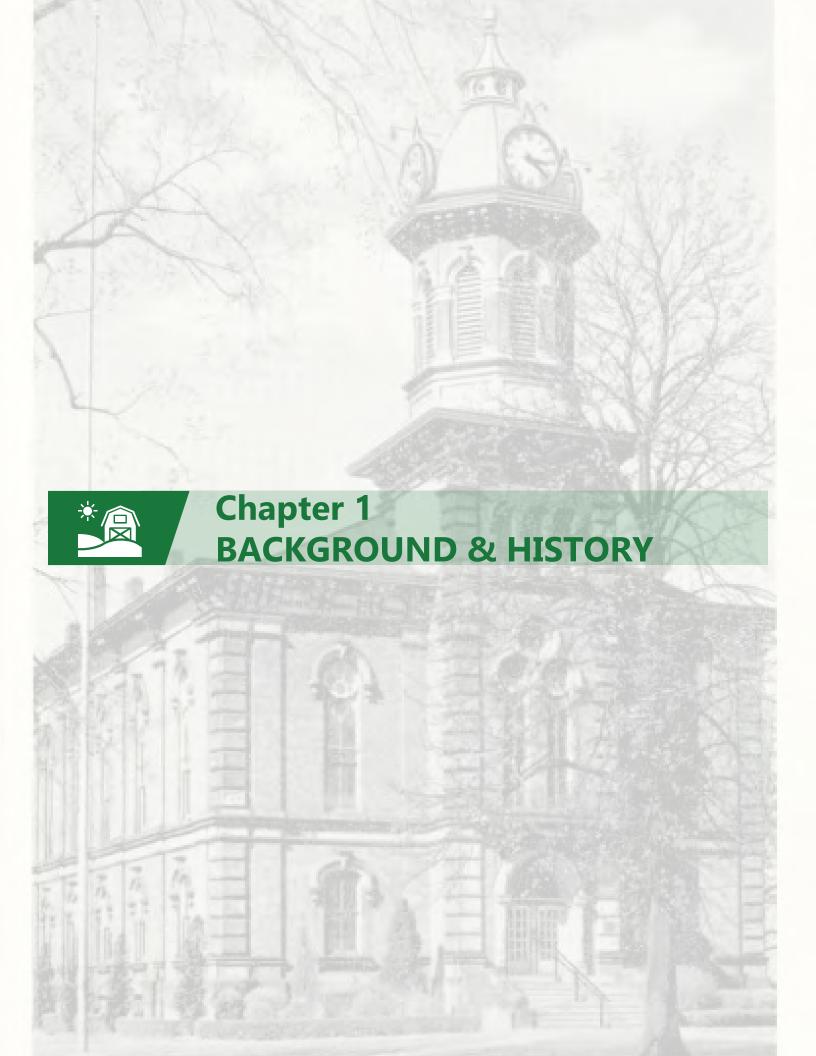

The pages that follow in this Executive Summary are organized into brief three-page summaries of each Planning Theme by Plan Section.

EXECUTIVE SUMMARY

Goals

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

Land Use	Maintaining rural character, vibrant commercial and industrial corridors, and focusing strategic development in
	underutilized areas should be encouraged.
Housing	Maintaining high quality housing options for residents of all
Housing	ages should be encouraged.
Natural	Protecting ecologically sensitive areas such as wetlands,
Resources	streams, and wooded areas should be encouraged.
Infrastructure	Providing safe and reliable transportation and utility
imastructure	infrastructure should be encouraged.
Economic	Retaining, expanding, and attracting businesses in
Development	commercially and industrially zoned areas to expand the
Development	local tax base should be encouraged.
Community	Providing quality public safety services, education,
Facilities	recreation, and civic spaces should be encouraged.

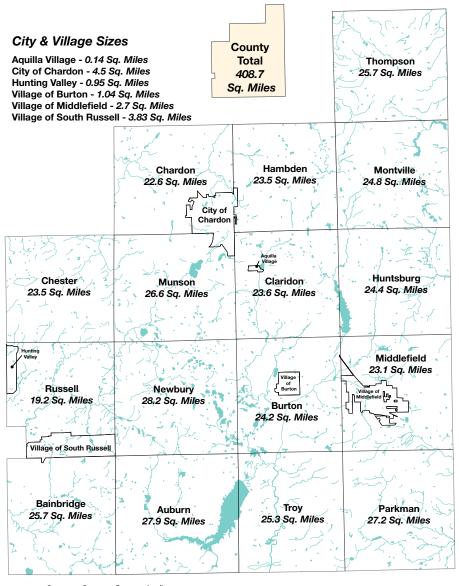

BACKGROUND & HISTORY

County Background

Geauga County is located in the northeast quadrant of Ohio, about 35 miles east of Cleveland and is adjacent to Lake, Ashtabula, Trumbull, Portage, and Cuyahoga Counties. It encompasses about 408.7 square miles. Geauga is one of the few counties in the state that contains the headwaters of three significant drainage basins within its borders. The Chagrin, the Grand, and the Cuyahoga Rivers all begin in the county. The county's 2010 population was 93,389 and has remained relatively flat over that past decade with a 2020 population of 95,397 (U.S. Census Bureau). The City of Chardon is the county seat and the largest municipality. Other municipalities include Middlefield, Burton, Aquilla, South Russell, and a part of Hunting Valley. Geauga County is also comprised of 16 townships.

BACKGROUND & HISTORY

County History

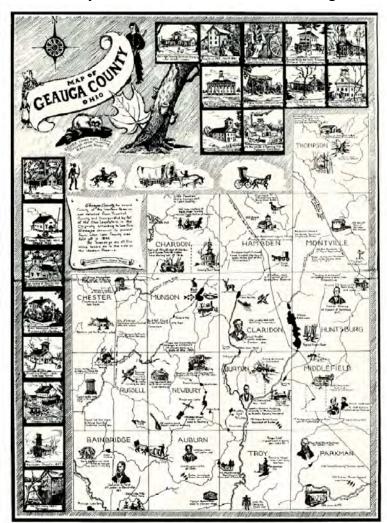

Geauga County was originally part of the tract known as the Connecticut Western Reserve. The Colony of Connecticut claimed title to the land. In 1795, Connecticut conveyed title to about 3,000,000 acres of the easterly portion of the Western Reserve to the Connecticut Land Company for \$1,200,000.00. The officers of the land company decided to subdivide the region east of the Cuyahoga River into townships about five miles square.

The townships were subsequently divided into sections approximately one-mile square. Some sections were further carved into tracts and lots. Geauga County was established in 1806. The creation of the various townships and municipalities followed.

By the end of 1800, there were about thirty-two settlements in the Reserve. However, no organized government existed. Geauga County was the second county established in the Reserve. Geauga's

name was derived from the Indian name for the present day Grand River, "Sheauga Sepe," or Raccoon River. The county was created by an act of the legislature in 1805. In 1806, Geauga County government was established and the first meeting of the Board of County Commissioners was held. The contract to build the first courthouse was entered into in 1807. In 181 1, the county seat was established in Chardon, named after Peter Chardon Brooks, the owner of the tract of land where the town was founded. Geauga's total land area was reduced in the early 1800's when Ashtabula County and Cuyahoga County were created. In 1840, Lake County was organized by taking seven northern townships from Geauga. The population of Geauga County at that time was 16,297.

The first courthouse in the county was a simple log building with a single room. The jail was built in Chardon and was attached to a tavern. The courthouse was replaced in 1813. It burned along with many of the other wooden structures in Chardon in the great fire of 1868. The courthouse was rebuilt after the fire out of brick and remains on the square in Chardon today.

BACKGROUND & HISTORY

The Natural Environment

Over 15,000 years ago, the Wisconsin glacier crept inexorably across northeastern Ohio's Appalachian Plateau, shearing off and grinding down mountain tops, then depositing fine layers of topsoil and hills of glacial till, full of sandstone and granite pebbles. Massive ledges of Sharon Conglomerate were exposed to weathering and later used for the construction of buildings, roads, and bridges. With the

retreat of the glacier, ancient Lake Maumee shrank to become today's Lake Erie, leaving behind sand ridges for travel. These ridges developed from animal and Native American trails to the roads we know today as Johnny Cake Ridge, Middle Ridge, North Ridge, and Mentor/Euclid Avenue. During the glacial period, valleys were carved for the Grand, Cuyahoga, and Chagrin Rivers. All three of these major rivers rise today in Geauga County, flow south, then fishhook abruptly northward into Lake Erie.

As the climate warmed, life returned to the lakeshore region. Hemlock and white pine trees grew on the hilltops, surrounded by valleys thick with maple, black walnut, chestnut, and oak. The heavy forest sheltered geese, elk, beaver, black bear, and timber wolves. Wild cats (which we know as raccoons) were so prevalent that the Native Americans named the rivers for the animal. The Grand Geauga River took it name from "Sheauga", a Native American word for raccoon. Native Americans hunted game using the ridges and rivers as transportation networks. Archaeological excavations have uncovered remains of the Whittlesey people. When the Whittleseys departed the lakeshore during the Iroquois annihilation of the Erie tribe in the 1650's, Geauga became a part of the far-flung hunting territory claimed by the Iroquois. Through the 1740s European trade focused on the Cuyahoga River, so little evidence has been found of the Native American in Geauga. A pioneer reminiscence recounts a small Native American village on the Upper Cuyahoga near Connecticut Wester Reserve Burton and a chief so taken with a young girl named Limery Umberfield that he offered to purchase her for \$1000. When his offer was refused, he threatened to steal her.

Maple Syrup

Maple sugaring has been a big part of Geauga County's rural heritage since the pioneers arrived in this area of the Western Reserve. In 1899 Geauga County was the leading county in the nation in maple syrup production. Today Geauga County is still the #1 producer of maple syrup in State of Ohio.

Native Americans are widely recognized as the first to discover the sweet sap dripping from broken branches or cuts in the bark of maple trees. The sap was boiled down in hollowed out logs by placing hot rocks into the sugary solution.

For 90 years generations of volunteers have been tapping trees and making syrup on the square in Burton at the historic Burton Log Cabin and Sugar Camp. The City of Chardon is also home to the annual Maple Festival which draws hundreds of visitors each year, many of whom are not from Geauga County.

BACKGROUND & HISTORY

The Amish

Today Geauga County is home to the world's fourth largest Amish community, which was started over 132 years ago when Samuel W. Weaver, his wife and their nine children arrived to build a new future.

On March 28, 1886, Weaver and his family traveled north from Holmes County by horse and buggy to find land. Rather than building a home, Weaver made arrangements to rent a farmhouse on 85-acres of land on Madison Road, just south of Shedd Rd. in Parkman Township. Most of the Amish came from Holmes County, but many moved from Indiana, Pennsylvania and other states. Amish families were widely scattered throughout the eastern part of the county. Some lived in Huntsburg, Burton, Middlefield and Parkman Townships.

Early Amish settlers were welcome in Geauga County in spite of what the non-Amish population might have thought about their dress and lifestyle. They were trusted and admired because of their honesty and work ethic. These early settlers were mostly farmers, drawn to this area because of availability of farms. Some Amish farmers rented on a 50/50 crop-sharing basis, while others paid cash. Later, more farmland became available to buy from their non-Amish neighbors.

Amish dairymen became prosperous because their large families helped to milk the cows and do other farm work. They could milk 20 to 30 cows a day. With milk and syrup as the main source of income, the community prospered.

Amish settlers were instrumental in introducing new farming practices to the county. The farmers who lived the county did not consider it financially wise to spend money on lime and fertilizer. All this changed when the farmers saw the lush crops of clover the Amish were putting into the barns.

Today the Amish still live outside mainstream culture and make decisions about their lives based on the Bible. The foundation of Amish culture and family life is based on what they learn in church and at home as children. Most youth settle into the Amish way of life by the time they are 18 or 19 years old and become members of the church.

BACKGROUND & HISTORY

Rural Setting

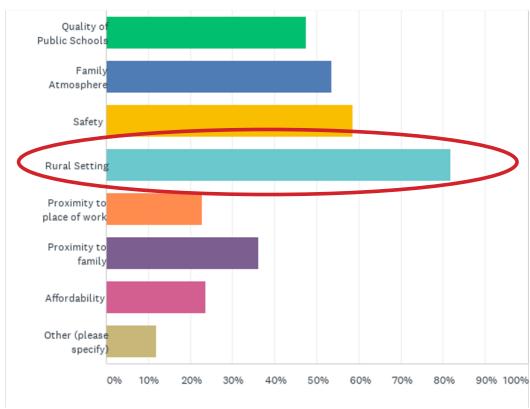

Geauga County is a predominately rural community where residents enjoy a high quality of life. Located a short drive from urban employment centers on the east side of the Cleveland metropolitan area, Geauga County provides an opportunity to take advantage of country living within easy access of urban amenities and jobs.

More than four out of five community survey respondents cited the rural setting as a reason for residing in Geauga County.

BACKGROUND & HISTORY

The following is a short history of each City, Township, and Village within Geauga County.

Auburn Township: Bildad Bradley, in 1815, settled the township of Auburn. It was the twelfth township to be settled in Geauga County. Early settlers migrated primarily from Massachusetts, Virginia, and New York. Auburn was a central point in stagecoach days, situated halfway between Cleveland and Warren. During the early years, a steady influx of settlers created a thriving community at Auburn Corners. Auburn was home to a diverse industrial economy. Some industries included a stove works, a basket factory, a cheese box mill, sawmills, and cheese factories. The first cheese factory to become operational was located about two and one-half miles north of Auburn Center. By 1936, with a decrease in prior population counts of nearly 50 per cent and the immense competition from the encompassing region, factories began closing and farming became a primary occupation.

Bainbridge Township: In 1811, the first settler of Bainbridge, David McConoughy, purchased and built a log cabin on 100 acres of land situated in the southeast corner of the township. Other early settlers followed suit, and the land which once had an abundance of trees, including maple, cherry, and oak, was cleared to plant wheat and build dwellings. By 1820, the first saw mill was put into operation, enabling the millers the opportunity to use the trees, which had been cleared for open land. The maple trees were also tapped for maple sugar production. As was the case across Geauga County, cheese production was an important industry in Bainbridge. The area of Geauga Lake was settled in approximately 1826. Geauga Lake Amusement Park opened nearly 60 years later, in 1884. The oldest road in Bainbridge, Chillicothe Road (State Route 306), was surveyed in 1801 by Edward Paine. The first rail service to pass through the township was established in 1856. From 1900 to 1915, an electric car line ran between Chagrin Falls and Garrettsville, passing through Bainbridge.

Burton Township and Village: Burton Township was the first settlement in Geauga County. It was founded by Thomas Umberfield, Isaac Fowler, and Amariah Beard, all originally from Connecticut, in July of 1798. The first town hall was constructed in 1871 at the northeast corner of the square. The township rel ied heavily upon its agricultural economy. Dairying was significant through the early 1900's along with the manufacturing of cheese. Colonel Henry A. Ford sold the land used as the fairgrounds to the county in 1856. In 1874, the Baltimore and Ohio Railroad line opened a stop in Burton, known as the Burton Station. The Burton and Mantua Hack Line also ran daily, passing through South Newbury, Auburn Corners, Mantua Corners, and to Mantua Station. The first passengers of the Burton-Middlefield Line of the Cleveland and Eastern Railroad were transported on February 22, 1900 and it remained operational until 1925. This line allowed for regular trips to Cleveland as well. Burton Village was incorporated in 1895.

Chardon Township and City of Chardon: The first settlers arrived in Chardon in 1808. Peter Chardon Brooks, an early settler from Boston, dedicated the public square provided that the county seat be located in Chardon and that his middle name (a French word meaning "thistle") would become the official name of the community. The central square began to function as the focal point for the early settlers, and would continue to do so over the years that fol lowed. The square was used as a field

BACKGROUND & HISTORY

for raising crops as well as for grazing. In addition, many celebratory events were held on the square, such as carnivals, concerts, and political events. Chardon Village was established in 1851.

In 1868, a devastating fire completely destroyed Chardon's business section as well as the courthouse. The buildings and courthouse were subsequently rebuilt. Chardon has hosted a diverse set of industries over the years. Since the earliest days, farmers came from surrounding areas for the purpose of trading goods. Several saw mills and cigar manufacturing establishments helped define the economy, as did the production of other items such as cider and cheese. Stone quarries and brick making operations were also established due to the availability of large deposits of sandstone.

The Chardon Macaroni Company and the Chardon Rubber Company were early industrial firms. The Painesville and Hudson Railroad Company ran a line through Geauga County in the mid to late 1800's. The company constructed a narrow gauge track between Painesville and Chardon. From 1871 to 1872, the Painesville and Youngstown Railroad Company continued this track. When the line was purchased by the Pittsburgh and Western in June of 1886, the existing gauge was changed to the standard gauge. Service on this new line began in late summer of the same year. At the turn of the century, rail service became available to Cleveland on the Cleveland and Eastern Railway Company. This railroad ran from Chardon to Cleveland and from Burton to Middlefield and operated until March of 1925.

Chester Township: Chester Township was preliminary surveyed in 1796 and settled in 1801 by Justice Miner. It was the fourth settlement in Geauga County and was named Chester for Chester, Massachusetts because a number of settlers were originally from there. Farming and dairying were the early major activities in the township. The Moss Farm Dairy was one of the major dairy farms in the township. Chester was found to be a good locality for fruit trees. From 1910 to 1915, there were large plantings of fruit trees, especially apples. Austin Turner built the first store in Chester in the early 1840's at the northwest corner of the intersection of Center and Chillicothe Roads. About 1870, a store at Mulberry corners was built. After World War II, Chester gradually changed from a farming community to being more business oriented. Several successful business enterprises were established and included a lumberyard, sheet metal operation, a refrigeration company, paint rollers manufacturing, thermostatic controls, heater manufacturing, and an upholstery business. Chester's early post offices were usually located in an existing store. From the earliest history, there was one located near the intersection of Mayfield and Chillicothe Roads. The address for this area was written as Chester X Roads. When the township grew, the postal address changed and the name adopted was Chesterland. The first rural delivery was established in 1902. The first school building was established in 1810 and was known as the Old Settlement. It was located on Mayfield Road west of Fullertown Road. In 1904, the township high school was established. Chester and Russell Townships schools were united in 1948 forming the West Geauga School District. Fire protection in Chester started in 1923. The Chester Township Fire Association was formed in 1943. Chesterland Light and Power Company was organized in 1920 and was sold to the Cleveland Electric Illuminating Company in 1925. The increased demand for home sites in Chester brought about the opening of several residential allotments. The first one being Merlin Heights which was situated south off Mayfield Road. Others

BACKGROUND & HISTORY

along Opalocka and Ward Drives followed.

Claridon Township and Aquilla Village: Claridon Township was settled in 1808 by Asa Cowles and Seth Spencer. Early settlers relied heavily upon an agriculturally based economy, which included dairying, poultry, and potato crops. Several cheese factories were built in the township, including the Hall Cheese Factory constructed in 1863. Other industries were blacksmith shops, carpentry shops, maple sugaring, and Nathaniel Spencer's chair factory (the oldest manufacturing business in the township, built in 1811). A railroad was constructed in 1872, with a line running through the eastern and northern sections of Claridon. This aided in shipping butter, eggs, cheese, and maple syrup to other communities. One of the oldest roads in Geauga County, Old State Road (State Route 608), runs diagonally across the eastern part of Claridon. In 1932, the City of Akron started a reservoir project, seeking to supply the city with fresh water, known as East Branch Reservoir.

Aquilla Village was formed in 1946. Located on Aquilla Road, adjacent to the Aquilla Lake Wildlife Area, the area was used as a summer retreat until the mid 1900's. With assistance from federal grants, the roads were paved and a centralized sewage treatment plant was installed in the 1980's.

Hambden Township: The land comprising Hambden Township was purchased by Oliver Phelps in November of 1798. It was settled by Dr. Solomon Bond and others from Connecticut in 1801. Bond had purchased 12,000 acres of land from Phelps, upon which he built a house in the southwest corner of the township. In 1810, the Bondstown Logging Society was founded. The township was called Bondstown until 1819, when it became Hambden. Many of the early settlers came from New York and Vermont, resulting in a New England character to the township. Hambden's economic base was largely agricultural. Cattle, sheep, and some poultry were introduced soon after land had been cleared. With the opening of a cheese factory in the early 1860's, the dairy industry grew rapidly.

Huntsburg Township: The township of Huntsburg (spelled Huntsburgh until the 1880's) was settled by Stephen Pomeroy in 1807. Many of the early settlers were of Russian and Polish descent, with people of Hungarian, Czechoslovakian, Italian, Finn, and German extraction arriving in the early twentieth century. The Old Order Amish also migrated to Huntsburg, many coming from Middlefield Township. Currently, Huntsburg is home to a sizable Amish population, which has helped maintain its rural character. Settlers in the 1800's were involved primarily in farming, however, other industries were in existence. There were two apple jelly factories, a mill for dressing and planing lumber, a number of cider mills, and several cheese factories. The current town hall was built in 1908.

Middlefield Township and Village: The township of Middlefield was settled by Isaac and James Thompson in 1799, the year following the first settlement (Burton) in Geauga County. Farming was the primary occupation of the early settlers, although around 1810 a distillery, a sawmill, and a gristmill were established in the Swine Creek area. A railroad was built through the township in 1873, linking Middlefield with Painesville and Warren (it has since been abandoned). Various industries were established in the early 1900's. These included basket making and a pail factory. Beginning in 1887,

BACKGROUND & HISTORY

Old Order Amish families began migrating to the area. The Amish presence in Middlefield remains today. Middlefield Village was incorporated in 1901.

Montville Township: Roswell Stevens settled the Montville area in 1815. Agriculture was the primary industry in the community. Early farming involved raising livestock and crops. Milk and cheese were difficult to transport in the early days due to a lack of sufficient roads and the distance to rail lines. Montville eventually had a number of industries. A variety of mills, in addition to tanneries, wood carving shops, wagon and blacksmith shops, bowl factories, and chair factories were some of the first enterprises in the township. Jack Randall started the production of cheese, with the opening of the first factory near the town center in 1865. For many years, Montville was also noted for the manufacturing of cutters and sleighs. With the introduction of mass production and the advancement of transportation systems, however, these small enterprises found ii hard to compete. By the end of the 1800's, many of the small businesses found in the town center had declined.

Munson Township: Because of the sizeable woods and hilly terrain, Munson Township was among the last settlements in Geauga County. Munson was known as Burlington until 1820. The first permanent settler in Munson was Samuel Hopson, who built his log cabin near the corner of Rockhaven and Wye roads in 1816. Because of our vast supply of water, many mills were built in the early township. The first gristmill became operational in 1818 and soon several other mills were built. Hiram and Milo Fowler settled in Munson in 1831. Their mill located on Fowlers Mill Road near the Mayfield intersection was restored by Rick and Billie Erickson and is currently producing flour. The first cheese factory in Ohio located at Sand Hill opened in 1859 and it remained in business for nearly 50 years. Between 1899 and 1925, the Cleveland and Eastern Traction Company operated an electric line through Munson. This assisted in the transport of farmers' goods to other markets in the region. On May 4, 1948, a rural zoning resolution was passed by Munson Township voters. It was the first rural zoning resolution adopted in the state of Ohio.

Newbury Township: Newbury was settled in 1810 by Lemuel Punderson. Manufacturing began to grow after 1815. Some industries at the time included saw mills, a box factory, a woolen mill and dyeing plant, cheese factories, and a furniture factory. Blacksmith shops, a wagon maker shop, tanneries, and a distillery were established as well. The interurban railway lines linked Newbury with surrounding communities and the Cleveland area. Service was abandoned around 1925.

Parkman Township: The area, which comprises Parkman Township, was purchased by Samuel Parkman and General Joseph Williams in 1797. In 1803, Samuel Parkman surveyed lots and by 1804 his nephew, Robert Breck Parkman, had settled 600 acres of land in the area. The township was the first to be settled in the southern tier of townships in Geauga County. At one time, Parkman consisted of three settlements: Little Ireland, Smithville, and Bundysburg. A gristmill was built along the Grand River in 1805. A general store was opened in 1808 and it was the only one operating in the county at the time. Processing milk and cheese was once a staple in the Parkman economy. The business section of town, which had been comprised of wooden structures, suffered a great loss as a result of

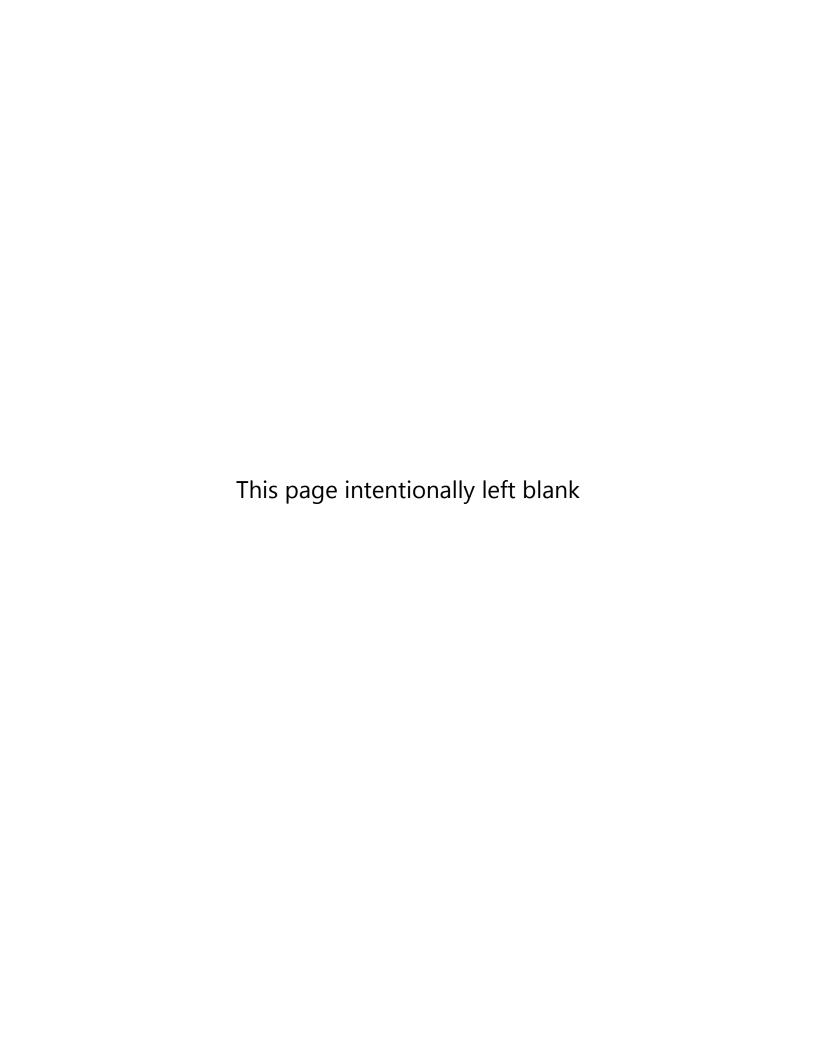

BACKGROUND & HISTORY

a fire in 1899. Brick buildings replaced those, which had been destroyed. The migration of Old Order Amish families to Parkman began in the late 1880's. Sam Weaver was the first Amish settler in the Parkman region.

Russell Township, South Russell Village. and Hunting Valley Village: Russell Township was settled in 1817 by William Russell. Agriculture was the primary focus of economic activity. In the late 1890's, the Cleveland and Eastern Electric Railroad were built. Two interurban rail lines traversed the township. The rail linkages enhanced the market for agricultural products. South Russell Village was created in 1923. A portion of Hunting Valley Village, incorporated in 1924, is located along the westerly portion of Russell Township.

Thompson Township: Dr. Isaac Palmer originally settled Thompson Township in 1800. Early settlers established a diversity of industries, such as chair factories, cheese factories, creameries, a tannery, cooper shops, wagon shops, and blacksmith shops. By the 1830's, South Thompson had become a center for commercial activity. Seven water wheels, all built on a stream from an established pond, were the sources of power for a gristmill; a carding mill, a cider mill, a chain factory, a shingle mill, and two saw mills. For over 70 years, stone quarries provided large blocks of sandstone, which were used for road culverts, railroad bridges, and road bridges. R. W. Sidley started the first major quarry operation in approximately 1932.

Troy Township: Jacob Welsh first settled the township of Troy in 1811. Other settlers soon followed, coming from Connecticut and Massachusetts. A township government was established by 1820 and the township was named Welshfield. Fifty acres of land were to be given to the township by Welsh under the condition that the township be named after him. With in several years, citizens petitioned to change the name of the community from Welshfield to Troy. Shops were established by wagon makers, shoemakers, coopers, tanners, blacksmiths, carpenters, and masons. Agriculture, however, was the primary component of Troy's economic base. Dairying was undertaken by a large number of farmers. Cheese factories were established as a result of the large dairy industry. With subsequent changes in transportation and production technologies, the factories eventually disappeared. Nevertheless, agriculture has remained a significant element in the community. The Chagrin Falls and Eastern Electric Railroad completed a line between Chagrin Falls and Middlefield in 1900, and between Steele's Crossing and Garrettsville the following year. Although the portion of the line between Steele's Crossing and Middlefield was abandoned due to competition from the Cleveland and Eastern Electric Railway, the line that ran through Troy to Garrettsville remained in operation for a number of years. This enabled farmers to transport milk to Cleveland in the morning and produce to the city in the afternoon. The rail service remained operational until 1915, at which time it was terminated due to financial hardships resulting from a decrease in service. Ohio Route 16, running through Troy and now known as U.S. Route 422, introduced the reinforced concrete road to Geauga County in November of 1922. Of great importance to the township was the change in its social make-up, which began in the 1890's, when the first members of what was to develop into a sizable Old Order Amish population settled in Troy.

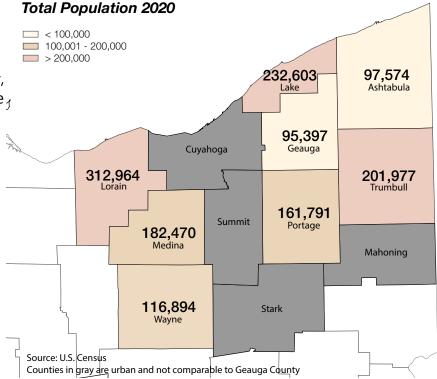

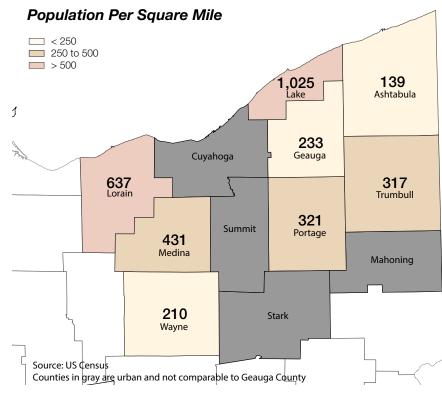

DEMOGRAPHICS

Total Population and Density

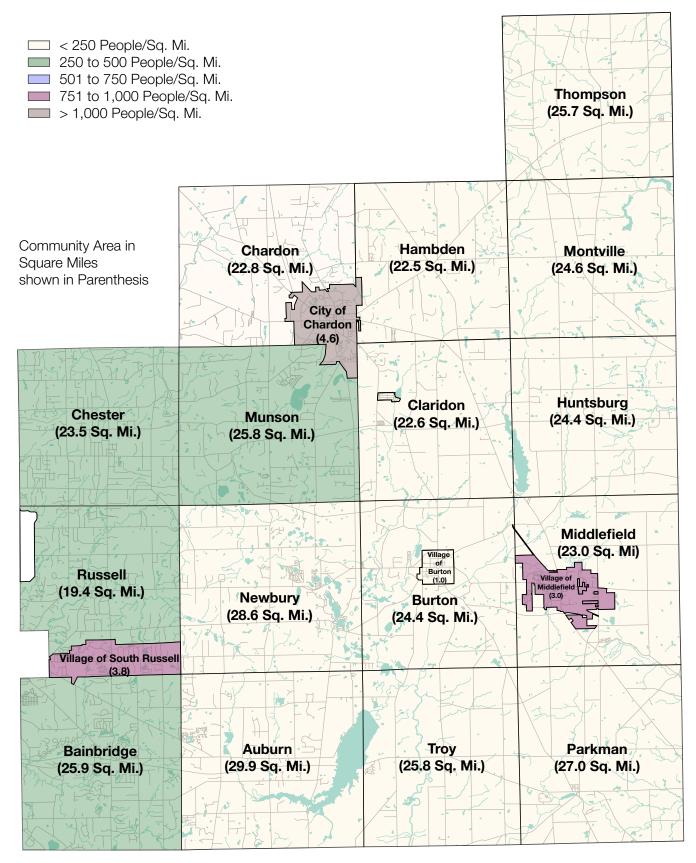

As of the 2020 U.S. Census, the total population in Geauga County was 95,397, making it the least populous county in Northeast Ohio. Consequently, the County is also one of the least dense counties in Northeast Ohio with 233 people per square mile. Only Ashtabula and Wayne Counties are less dense per square mile. The lack of density helps reinforce the rural character of the County.

The map on the following page illustrates population density per jurisdiction in Geauga County. Population density is higher within the western side of the County where more development has taken place. Population density is also concentrated within the City of Chardon and Villages of Middlefield and South Russell. The remainder of the County has a population density under 250 people per square mile.

Population Projections

When the 2003 General Plan was completed there was anticipation of moderate population growth

throughout the County. The table to the right illustrates population projections from the 2003 General Plan. The plan projected a population of roughly 110,000 people in 2020 and 118,000 people by 2030. These projections were based off of population growth in the County throughout the second half of the 21st century. The total population in Geauga County increased from 26,646 in 1950 to 90,895 in 2000. A population increase of 240% over that time period.

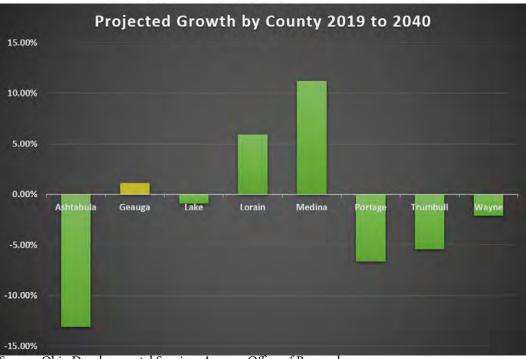

Though the County did experience population growth throughout the 1980s and 90s, population growth has stalled since the last General Plan Update was completed. Population growth since 2000 has remained steady with 3 percent growth from 2000 to

2019. It is anticipated that population within the County will remain flat for the foreseeable future. State projections anticipate a 1 percent population growth through 2040. The chart to the right illustrates Geauga County's population projections compare with other Northeast Ohio counties. A slower and manageable rate of growth is desirable and aligns with resident desires to maintain rural character.

Population by Jurisdiction

Consistent with the overall County, no one jurisdiction within the County has seen large population growth or loss since 2010. The chart below shows the total population by jurisdiction from 2010 and 2020. Slight growth was seen in townships on the western side of the County including Bainbridge and Russell Townships, while no growth or slight population losses were seen in eastern townships including Thompson Township.

Population by Age

While the overall County population has remained relatively flat since 2010 the population within the County is aging. The median age within the County has risen from 42.1 in 2010 to 44.8 in 2019. As shown in the chart below, all age cohorts above age 55 saw an increase in their population as a percentage of the County since 2010. This trend is consistent with other communities in Northeast Ohio as the "Baby Boomer" generation continues to age in place. Though some population growth was seen in age cohorts between age 20 and 29, these population increases did not offset the larger, older population that continues to age in place. The Planning Commission should continually update population and housing statistics on the website and notify the public of such updates.

LAND USE

Goals

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

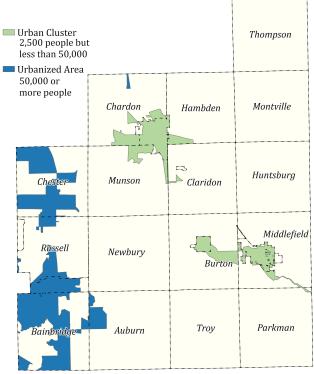

Preservation of Rural Character	Geauga County is a predominantly rural community that presents a unique opportunity to reside in a tranquil country setting near Northeast Ohio's major urban employment centers. Any future development should complement the County's rural character in size, scale, and appearance.
Commercial Corridors / Primary Intersections	The County's major highways are the primary location of commercial and industrially zoned properties. The County should explore opportunities to assist local governments in maintaining vibrant commercial and industrial corridors (such as US 322 in Chester Township and SR 87 in Newbury Township) through technical support and possible financial assistance (e.g. Revolving Loan Fund for commercial revitalization).
Strategic Development	The County is home to several industrial parks and underutilized development areas such as the County's Merritt Road campus. The County should encourage land uses in these strategic development locations that result in long-term increases in property values, job growth, sales activity, and tax revenue.

Low Intensity Development

Half of Geauga County is wooded and about one-quarter of the County's land area is used for agriculture. Nearly 6% of the County is covered by wetlands and another 1.4% is comprised of open water. Just over 16% of the County is developed with the vast majority of those areas being low intensity development, with high intensity development most concentrated in the County's urbanized areas and urban clusters (see left).

Assessment

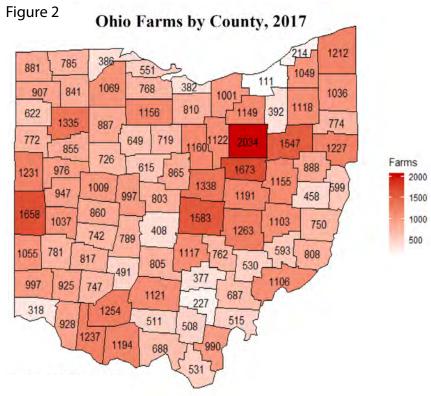

Agriculture in Ohio

The Census of Agriculture definition of a farm is "any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year." The United States has seen a decline in the number of farms since the 1974 Census. The 2017 Census reported that there were 2,042,000 farms in the U.S., 77,805 (3.8%) of which are located in Ohio. United States farms declined 7.4% and 3.2% since the 2007 and 2012 Census, respectfully. In contrast, Ohio farms in 2017 numbered 2.6% more than in 2007.

Figure 1 illustrates the number of Ohio farms and the acres of land in farms for the last five censuses. Land in farms has remained stable around 13.9 million acres with a slight increase since 2012 and 2007. With more farms and stable land in farms, the average farm size declined 3% to 179 acres. In contrast, acres per U.S. farm increased to 441 acres- up from 434 in 2012 and 418 in 2007. This increase is likely due to commercial farmers buying and incorporating smaller farms.

Figure 2 contains the distribution

of Ohio's 77,805 farms by county, with darker red counties representing more farms and white counties representing the fewest farms. The geographic size of counties in some cases explains the variation in number of farms across counties. Wayne County is home to the most farms, where Cuyahoga County, is home to the fewest number of farms. Outside a few pockets of counties, the Northeastern quadrant Ohio has a highest concentration of farms-likely due to farm size and diversification of operations. High population density of Amish in the region is likely a contributing factor in farm size and diversification.

As shown in the Figures 3 and 4 to the right, Geauga County has seen an increase in both the total number of farms and land used for farming from 2007 to 2017.

Agriculture in Geauga County

Agriculture is extremely important to Geauga County's economy and rural character. The County has seen a steady increase in the number of active farms within the County since 1992. As of the 2017 Agricultural Census there are 1,049 farms encompassing over 69,000 acres of land within the County. Average farm size has continued to decrease throughout the County and as of 2017 the average farm size was 67 acres.

Geauga County's agricultural economy is diverse, thanks in part to the large Amish population in the southeastern section of the County. Roughly half (48%) of the County's agricultural sales come from crop production, while 52% come from livestock and poultry products. The majority of land devoted to crop production is for hav (over 13,000 acres) and soybeans (over 7,000 acres). The County is also home to 96 family-owned farms.

Prime Agricultural Soils

Prime agricultural soils have the appropriate quality, moisture supply, and attendant growing season to produce a high crop yield when treated and managed in accordance with modern farm methods. Generally, prime agricultural soils will be more productive under intense cultivation than other soil types using similar management practices. The table to the right reflects the prime agricultural land classification system utilized by the U.S. Soil Conservation Service. The numbers under the "Agricultural Rating" column represent progressively greater limitations on the choice of crops and how they respond to management. The letter "E" means that the primary limitation is erosion and "W" indicates that water is on or near the surface.

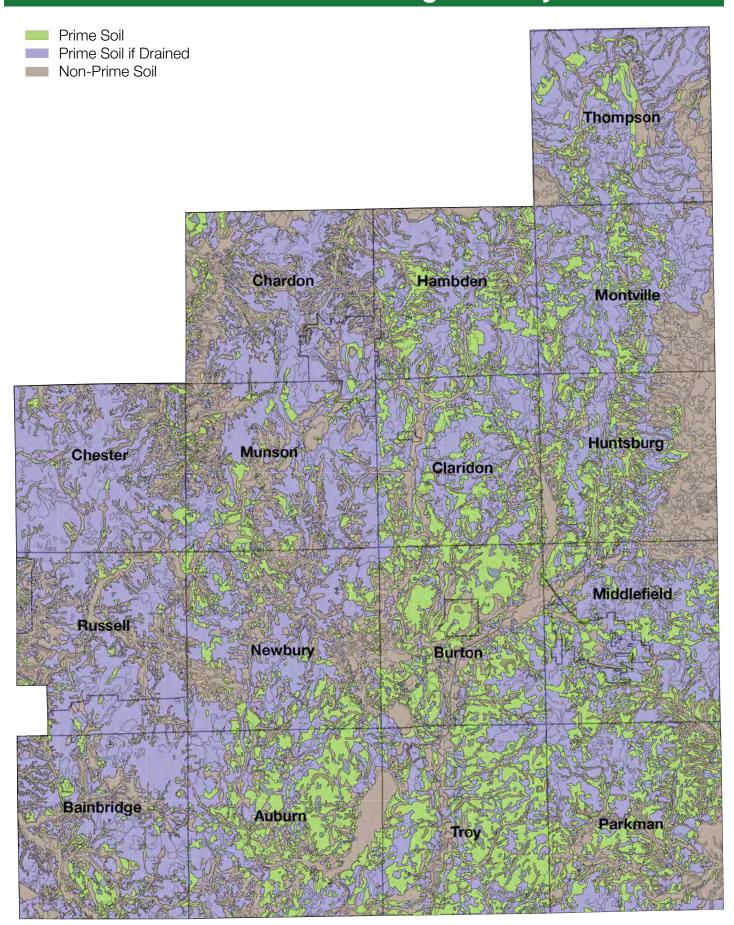

As shown on the map on the following page, the majority of the soils in the county are considered "prime" for agricultural purposes. Ironically, many of the same qualities that make a soil prime for agriculture also make it prime for development purposes. Seventy-two percent of Geauga County soils are rated "prime" and "prime with drainage" representing 187,006 acres.

For more information on soils, consult the Geauga County Soil Survey from the United States Department of Agriculture.

Forestland Tax Reduction

Enrollment into the Forestland Tax Reduction program is initiated by private landowners through the Ohio Department of Natural Resources. The Ohio Forest Tax Law program grants tax reductions for qualified forest tracts. The program taxes forestland at 50% of the local tax rate as long as landowners manage their forestland for the production of timber and other forest products.

To qualify the landowner must meet the following requirements.

- 1) Forest tract must be 10 or more contiguous acres and no less than 120 feet wide
- 2) Certified as forestland by the state forester
- 3) The landowner must follow the provisions of their forest management plan

CAUV Program

The CAUV program allows farmland devoted exclusively to commercial agriculture to be valued based on their value in agriculture, rather than the full market value, resulting in a substantially lower tax bill for the working farmer. Any Ohio property owner currently engaged in commercial agriculture may qualify for the program.

For land to qualify for CAUV, land must meet one of the following requirements during the three years preceding an application for CAUV:

- Ten or more acres must be devoted exclusively to commercial agricultural use; or
- If less than ten acres are devoted exclusively to agricultural use, the owner must demonstrate an average income of at least \$2,500 or more from agricultural activity during each of the previous years, or have an anticipated gross income of \$2,500 from agricultural activity during the year of application.

The chart and map on the following pages illustrate the total land area under CAUV by jurisdiction in Geauga County. Parkman and Middlefield Townships have the most land area under CAUV within the County with 10,180 acres and 8,967 acres respectively. Both townships also have the highest percentage of land under CAUV in the County with 59 percent of Parkman Township's and 61 percent of Middlefield Township's land under CAUV.

Agricultural District Program

An agricultural district provides protection against nuisance suits over farm operations, deferment of tax assessments on land to build sewer and water lines, and allows for additional review if land is taken by eminent domain for a public purpose. Agricultural districts must be renewed by the County Auditor every five years.

The land must be in agricultural production. Agricultural production includes commercial agriculture, animal husbandry or poultry husbandry, the production for a commercial purpose of field crops, tobacco, fruits, vegetables, timber, nursery stock, ornamental shrubs, ornamental trees, flowers, sod, or any combination of such husbandry or production. It also includes the processing, drying, storage, and marketing of agricultural products when those activities are conducted in conjunction with such husbandry or production (Ohio Revised CodeORC 929.01[A]). This is a rather broad definition of agricultural production and would include such activities as grain drying, even when it is located on a parcel where the grain is not growing, and if it is associated with other parcels managed for grain production.

The land also qualifies if it is enrolled in a federal government land retirement or conservation program during the year of application and for at least three years prior to the year of application. In addition, the land must be composed of tracts, lots, or parcels that are at least 10 acres in size, or have generated an average gross income of at least \$2,500 during the past three years. Or, the owner can present evidence of an anticipated gross income of \$2,500 (ORC 929.02). It is possible for a farmer to place all parcels, or a portion of the parcels of the farmland into an agricultural district.

The purpose of the agricultural district program is to mitigate the push to convert farmland to other uses. The amount of protection offered to farmland must be balanced by society's need for public easements and development. Creation of agricultural districts does not take into account the productivity of the soil or the amenities that agricultural land contributes to the community (such as scenery, rural character, wildlife habitat, and the protection of watersheds). The agricultural district legislation attempts to establish agricultural activities as legitimate and somewhat a priority use in rural areas and within municipalities with special review. The districts provide very little effect as to the "pull," i.e. the financial incentive to convert farmland to other uses. Other tools such as exclusive agricultural zoning, and purchase of development rights, would be needed to protect agricultural land from development. However, the agricultural district program does provide the landowner some risk protection. Often delays in land use conversion afforded by this program can help an owner operator time land sales to meet retirement plans or other occupational goals.

The chart and map on the following pages illustrate the total land area under Agricultural Districts by jurisdiction in Geauga County. Parkman and Thompson Townships have to most land area under agricultural districts with 1,864 acres and 1,567 acres respectively. Thompson and Claridon Townships have the highest percentage of land under agricultural districts with 11 and 10 percent respectively.

LAND USE

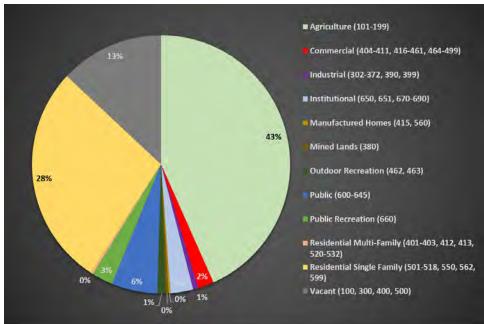

Existing Land Use

To gain a sense of the scale of existing land uses throughout the County and the change in land uses over the past decade analysis was conducted using Geauga County Auditor's property class data in both 2011 and 2021. Existing land uses were segmented into 12 different land uses. The table on the following page describes what property class codes make up each of the 12 land uses.

The most dominate land use throughout the County is agriculture, which currently encompasses 40 percent of all land within Geauga County. Single family residential is the second most dominate land use encompassing 36 percent of land area. The remaining 24 percent of land in the County is divided among the other ten land uses.

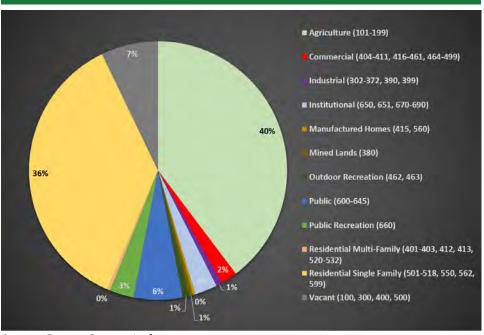

Nine of 12 land uses as a percent of the County's total area from 2011 to 2021 have remained consistent. One change to note is the difference in single family residential land up from 28 percent in 2011 to 36 percent in 2021. Vacant land has conversely reduced from 13 percent in 2011 to 7 percent in 2021. Agricultural land has seen a slight decrease in land area as well down from 43 percent in 2011. This drop in

Residential Zoning - Minimum Lot Sizes by Township

Prevalence of Large Lot Zoning

Private water wells are the largest source of domestic water in Geauga County. There are over 25,000 residences served by household sewage treatment systems in Geauga County. Any part of a sewage treatment system must be located at least 10 feet from a property line and 50 feet from a water well. Additionally, sufficient area must be provided for both a primary sewage treatment system and a replacement system if the primary system were to fail. These water well and septic requirements dictate the prevalence of large lot zoning in Geauga County.

Tax Exempt Properties

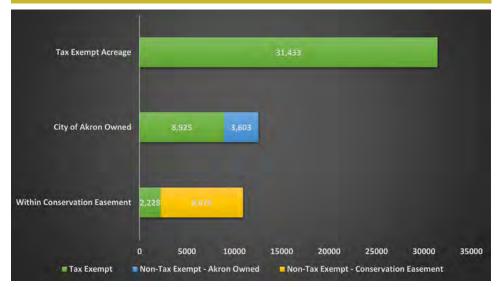

The Planning Commission raised concerns about the amount of property under a tax exempt status in the County. As such, Geauga County Auditor and GIS data was used to determine the amount of tax exempt property in the County.

Properties with conservation easements in Geauga County are not taxed any differently than properties without conservation easements. For decades Geauga County has refused to change property taxes based on the granting of or the presence of a conservation easement on land.

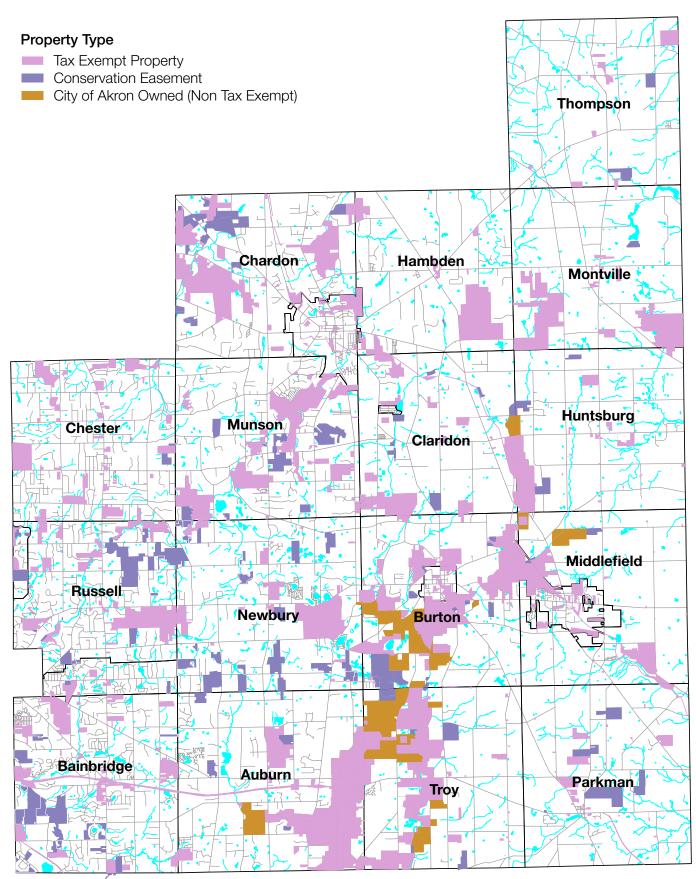

As shown to the right, roughly 12 percent of County land is under tax exempt status. A portion of the total tax exempt land (8,925 acres) is owned by the City of Akron, the County's largest land owner. Roughly 20 percent of land under tax exempt status is also part of an existing conservation easement. The maps on the following pages illustrate where all tax exempt, City of Akron and existing conservation easement properties are located throughout the County, as well as the owners of each tax exempt property.

LAND USE

Tax Exempt Ownership and Scale

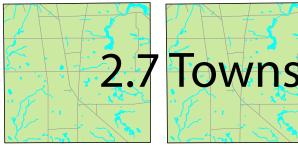

Municipalities hold the most tax exempt land in the County with 9,959 acres in total. The City of Akron owns over 8,800 acres of tax exempt land in the County and accounts for roughly 89 percent of municipally-owned, tax exempt land in the County. Municipalities located within Geauga County own 1,064 acres of land, similar to the amount of land owned by school boards throughout the County.

The Geauga County Park District owns the second most tax exempt land in the County with over 8,000 acres in total. Charities, which includes land owned by the Holden Arboretum, account for over 4,000 acres of tax exempt land. The majority of tax exempt land owned by the State of Ohio is within

Punderson State Park.

If all of the tax exempt, City of Akron-owned taxable, and conservation easements on taxable land in the County were placed contiguous to each other they would equal approximately 2.7 townships.

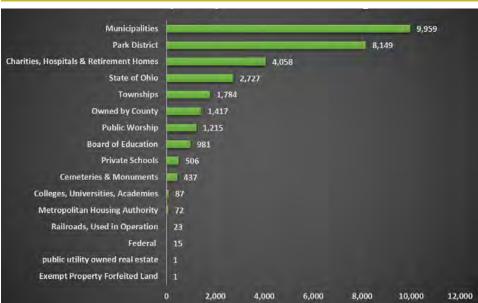

Countywide total of Tax Exempt, Conservation Easement & City of Akron properties equate to the land area of 2.7 Townships

City of Akron-owned property

The City of Akron is the largest single land owner in the County with over 12,000 acres of land. Much of the City's fresh water comes from the Cuyahoga River and the damed reservoirs within Geauga County. While the majority of this land includes and surrounds both the East Branch and LaDue Reservoirs some of the land is actively farmed. The City of Akron owns roughly 5% of the County land.

Tax Exempt Property Impact on Property Taxes

Though the County has a fair amount of land under tax exempt status their impact to overall taxable value of all land in the County is low relative to other counties in Ohio. The State's percentage of exempt to total real property was 17.11 in 2018, while Geauga County was ranked the tenth lowest percentage in the State at 7.71 percent.

Planning Commission Initiatives

In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize county goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to the following land use initiatives:

- Monitor Regional Planning Initiatives: At the time of this plan's preparation, NOACA is
 finalizing their long range plan for the region "eNEO2050: An Equitable Future for Northeast
 Ohio". Planning Commission should monitor this plan and subsequent regional planning efforts
 going forward and be mindful of the impacts these plans may have on outlying rural communities
 like Geauga County.
- Develop a Policy Agenda: Planning Commission should consider developing a formal Policy
 Agenda at the outset of regional planning efforts to clearly articulate the County's position on
 the goals and strategies being developed. Consideration should be given to broadening Geauga
 County's coalition of support for the Policy Agenda to include other similarly situated rural
 communities with similar interests.
- **Promote Public Opportunities for Input:** Planning Commission should help promote advertised opportunities for stakeholder and public engagement in the regional planning process as the arise. Regardless of whether a formal Policy Agenda is developed, promotion of opportunities for public comments should include a brief summary of how the plan/policy/initiative being developed affects Geauga County and how it could be improved to better serve the County.

Potential Tools & Strategies

Below is an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals:

Model Zoning Resolution

• The County should consider periodically reviewing the County's Model Zoning Resolution for consistency with the latest changes in state law, case law of significant merit, or other sources as determined appropriate. Opportunities to integrate new best practices and innovative zoning techniques should be considered as they arise.

Local Updates

• Local officials should refer to and update, when necessary, the township land use plans, Subdivision Regulations, and the County Farmland Preservation Plan.

Monitor Farm Bureau Planning Efforts

 County officials should follow the efforts of the Geauga County Farm Bureau and the Ohio Farm Bureau including those impacting public policy such as the 2021 Ohio Agriculture and Rural Communities Action Plan.

LAND USE

Potential Tools & Strategies

The following pages provide information on other tools that could be implemented to protect and preserve agriculture and rural character throughout the County.

Agricultural Easement Donation Program (AEDP)

The Agricultural Easement Donation Program (AEDP) is a tool for landowners to protect their farm's soils, natural resource features, and scenic open space. It provides landowners the opportunity to donate the easement rights on viable farmland to the Ohio Department of Agriculture (ODA). The department assures the land remains in agricultural use forever. The standard cost for services needed to secure the easement (i.e., title examination, title policy, escrow, closing and recordation) are covered by ODA. All easement transactions are permanent. They are recorded on the property deed and will transfer with the land to successive owners.

Requirements: To be eligible for the program, the land must meet the following criteria:

- 1) The applicant farm must be enrolled in CAUV and the Agricultural District Program through the county auditor's office.
- 2) The farm must be a minimum of 40 acres unless the farm is adjacent to a preserved farm, then it must be a minimum of 25 acres.
- 3) Any liens or mortgages on the farm must be subordinated to the easement.
- 4) The farmland owner must certify the property does not contain hazardous substances.
- 5) The farmland owner must have been in compliance with state and federal agricultural laws for the past five years.
- 6) The farmland owner must have possession of clear title to the applicant property.

Clean Ohio Local Agricultural Easement Purchase Program (LAEPP) (Purchase of Development Rights)

The Clean Ohio Local Agricultural Easement Purchase Program (LAEPP) provides funding to farmland owners for placing an agricultural easement on their property. Monies are issued for up to 75 percent of the appraised value of a farm's development rights. A payment cap has been set at \$2,000 per acre, with a maximum of \$500,000 per farm. All easement transactions are recorded on the property deed

and transfer with the land to successive owners.

Funds from the purchase of these easements are invested in the local economy by the landowners who use them by expanding their farming operations, purchasing new equipment, reducing debt, adding conservation practices, planning for retirement, sending their children to college or for other purposes. When the state purchases a farmland easement, the proceeds are plowed into Ohio's economy.

There are four properties totaling 559 acres of land in Geauga County that contain an agricultural easement through the LAEPP Program.

The following requirements must be met by the farmland and owner at the time of application submission:

- The farm must be enrolled in CAUV and the Agricultural District Program through the county auditor's office.
- The farm must be a minimum of 40 acres unless the farm is adjacent to a preserved farm, then it must be a minimum of 25 acres.
 - NOTE: Farms that are 10-24 acres and also share a substantial border with permanently protected land compatible with agriculture must submit a written request with supporting documentation before eligibility for application can be determined.
- The farmland owner must certify that the property does not contain hazardous substances.
- The farmland owner must have been in compliance with state and federal agricultural laws for the past five years.
- The farmland owner must have possession of the clear title to the applicant property.
- The local sponsor must agree to share monitoring and enforcement responsibilities.
- A minimum of 25 percent of the points-based appraised value of the agricultural easement must be provided either in cash match by the local sponsor, donation by the landowner, or a combination of donation and cash match.

Agricultural Security Area Program

The Agricultural Security Area (ASA) Program is a tool that promotes agricultural retention by creating special areas in which agriculture is encouraged and protected. ASAs provide certain benefits to farmers, including protection from non-agricultural development, a critical mass of land to help keep farming viable, and possible tax benefits for investing in new real-agricultural property. The ASA program authorizes one or more landowners, with at least 500 acres of contiguous farmland, to request enrollment into an ASA for a 10-year period from the boards of county commissioners and township trustees.

Eligible landowners, who individually or collectively own 500 or more contiguous acres of farmland, must submit an application to both the boards of county commissioners and township trustees requesting enrollment in an ASA for 10 years.

LAND USE

As an attachment, a map must be prepared identifying the proposed ASA boundaries, parcel numbers of the land, and names and locations of all water ways, utility rights-of-way, and road ways. The map must show any existing residential, recreational, commercial, or industrial facilities that are situated on the land or within 500 feet of the perimeter of the boundary of the proposed ASA.

The commissioners or trustees may hold separate or joint public hearings prior to approving or rejecting an application. Approval of an ASA requires passing a resolution by the trustees and commissioners.

To be eligible for the program, the following criteria must be met:

- 1) The ASA must consist of at least 500 contiguous acres of farmland.
- 2) The land must be in the unincorporated area of the county or counties.
- 3) Landowners must be enrolled in the CAUV tax program and enrolled in the Agricultural District Program.
- 4) Landowners must be using "best management practices."
- 5) Landowners must not have any civil or criminal actions in violation of Ohio or U.S. environmental law in the 10 years prior to the date of application.

If the ASA straddles more than one township or more than one county, an ASA application must be submitted to and approved by each county's board of commissioners and/or township trustees.

Note: Many townships through their individual land use plans have developed their own version of an Agricultural Security Area with different qualification criteria, most notably, a lesser acreage requirement. Refer to each township land use plan accordingly.

Natural Resources Conservation Service - Agricultural Conservation Easement Program (ACEP)

The 2014 Farm Bill streamlines and consolidates three former programs, the Wetlands Reserve Program, Grassland Reserve Program, and Farm and Ranch Land Protection program into a new program, Agricultural Conservation Easement Program (ACEP). Although these three former programs were repealed in the 2014 Farm Bill, all existing easements remain valid. There is one Farm and Ranch Land Protection program easement in Geauga County.

The Agricultural Conservation Easement Program (ACEP) helps landowners, land trusts, and other entities protect, restore, and enhance wetlands, grasslands, and working farms and ranches through conservation easements. Under the Agricultural Land Easements component, NRCS helps American

LAND USE

Indian tribes, state and local governments and non-governmental organizations protect working agricultural lands and limit non-agricultural uses of the land. Under the Wetlands Reserve Easements component, NRCS helps to restore, protect and enhance enrolled wetlands.

Over the past 25 year, NRCS has worked with landowners to protect more than 4.4 million acres of wetlands and agricultural lands, a value of over a billion dollars in a diversified real estate portfolio that has resulted in improved soil health, water and air quality and wildlife habitat. Read more about the easement successes around the nation.

Agricultural Land Easements

NRCS provides financial assistance to eligible partners for purchasing Agricultural Land Easements that protect the agricultural use and conservation values of eligible land. In the case of working farms, the program helps farmers and ranchers keep their land in agriculture. The program also protects grazing uses and related conservation values by conserving grassland, including rangeland, pastureland and shrubland. Eligible partners include American Indian tribes, state and local governments and non-governmental organizations that have farmland, rangeland or grassland protection programs.

Under the Agricultural Land Easement component, NRCS may contribute up to 50 percent of the fair market value of the agricultural land easement. Where NRCS determines that grasslands of special environmental significance will be protected, NRCS may contribute up to 75 percent of the fair market value of the agricultural land easement.

Wetland Easements

NRCS also provides technical and financial assistance directly to private landowners and Indian tribes to restore, protect, and enhance wetlands through the purchase of a wetland reserve easement.

Through the wetland reserve enrollment options, NRCS may enroll eligible land through:

- Permanent Easements Permanent easements are conservation easements in perpetuity. NRCS
 pays 100 percent of the easement value for the purchase of the easement. Additionally, NRCS pays
 between 75 to 100 percent of the restoration costs.
- 30-year Easements 30-year easements expire after 30 years. Under 30-year easements, NRCS pays 50 to 75 percent of the easement value for the purchase of the easement. Additionally, NRCS pays between 50 to 75 percent of the restoration costs.
- Term Easements Term easements are easements that are for the maximum duration allowed under applicable State laws. NRCS pays 50 to 75 percent of the easement value for the purchase of the term easement. Additionally, NRCS pays between 50 to 75 percent of the restoration costs.

Wetland Reserve Enhancement Partnership (WREP) – WREP continues to be a voluntary program through which NRCS signs agreements with eligible partners to leverage resources to carry out high priority wetland protection, restoration and enhancement and to improve wildlife habitat.

Partner benefits through WREP agreements include:

Wetland restoration and protection in critical areas
Ability to cost-share restoration or enhancement beyond NRCS requirements through leveraging
Able to participate in the management or monitoring of selected project locations
Ability to use innovative restoration methods and practices

Eligibility

Land eligible for agricultural easements includes cropland, rangeland, grassland, pastureland and nonindustrial private forest land. NRCS will prioritize applications that protect agricultural uses and related conservation values of the land and those that maximize the protection of contiguous acres devoted to agricultural use.

To enroll land through agricultural land easements, NRCS enters into agreements with eligible partners.

Land eligible for wetland reserve easements includes farmed or converted wetland that can be successfully and cost-effectively restored. NRCS will prioritize applications based the easement's potential for protecting and enhancing habitat for migratory birds and other wildlife.

Enrollment

To enroll land through wetland reserve easements, NRCS enters into purchase agreements with eligible private landowners or Indian tribes that include the right for NRCS to develop and implement a wetland reserve restoration easement plan. This plan restores, protects, and enhances the wetland's functions and values.

To enroll land through agricultural land easements, eligible partners may submit proposals to the NRCS state office to acquire conservation easements on eligible land.

To enroll land through wetland reserve easements, landowners may apply at any time at the local USDA Service Center.

Agricultural Protective Zoning

Agricultural zoning strives to protect the viability of agriculture in a region and is generally used by communities that are concerned about maintaining the economic viability of their agricultural industry. A carefully written agricultural zoning ordinance can prevent farmland from being converted to nonfarm uses, can prevent the fragmentation of farms, prevent land-use conflicts, and protect agricultural producers from nonfarm intrusion into agricultural areas as well and as vigorously as residential zoning can protect housing areas from commercial or industrial intrusions. (Ohio State University)

LAND USE

Many agricultural producers are finding that they can no longer afford to purchase land for agricultural purposes. Residential development in agricultural areas drives up the cost of public services and the price of land to the point that it is not profitable for agricultural production. Establishing agricultural zones in areas of prime farmland can, in conjunction with other agricultural protection methods, reduce competition and keep the cost of farmland reasonable. Protecting large blocks of farmland through agricultural zoning will also aid in preserving the rural character of a community and in preventing constant increases in property taxes. (Ohio State University)

Agricultural zoning limits the density of development and restricts nonfarm uses of the land. In many agricultural zoning ordinances, the density of residential development is controlled by establishing a minimum lot size that corresponds to the amount of land needed to sustain an individual farm. Densities may vary depending upon the type of agricultural operation. The list of permitted uses in an agricultural zone should be consistent with viable farming alternatives. (Ohio State University)

Advantages

Agricultural zoning can help to protect a farming community from becoming fragmented by residential development. Individuals purchasing land in an agricultural zone know up front what is permitted in that area, and agricultural zoning is often less expensive than other voluntary incentive methods, such as Purchase of Development Rights, for protecting agricultural lands. It is also more comprehensive and effective than programs that rely on individual owner initiative. (Ohio State University)

Disadvantages

Like other zoning ordinances, agricultural zoning is vulnerable to change. If community attitudes or political leadership shift, an ordinance may be dismantled. As a result, some communities have implemented agricultural zoning in conjunction with other farm-protection measures. As with other zoning ordinances, intentions are not always fully communicated in the ordinance, so they must be written very precisely, which in turn does not always allow for flexibility for new practices or technology. Zoning is enacted on a community scale, and some landowners, if in a minority, may become part of a plan they individually oppose. (Ohio State University)

HOUSING

Goals

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

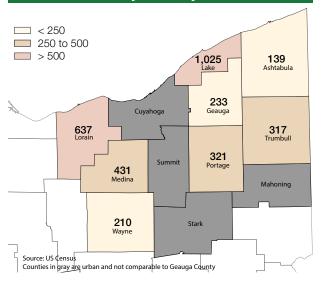

Large Lot Single Family Housing	Geauga County is a predominantly rural community that presents a unique opportunity to reside in a tranquil country setting near Northeast Ohio's major urban employment centers. Any future development should complement the County's rural character in size, scale, and appearance. As such, large lot single-family zoning should generally be continued in Townships, with denser housing types concentrated in urbanized areas.
Senior Housing	Geauga County is projected to have a larger increase in its advanced senior population (75 and over age cohorts) over the next 20 years as Baby Boomers living in the County continue to age in place. While a need for additional dedicated senior housing in the County may arise in the future, such housing should be concentrated in areas consistent with local zoning with adequate infrastructure capacity.
Other Housing Types	The County is predominantly rural, with very limited strategic opportunities for denser (e.g. multifamily or mixed-use) housing development. The County should work to ensure any future denser housing types are concentrated in urbanized areas consistent with local zoning with adequate infrastructure capacity in close proximity to employment centers and commercial services such as in the City of Chardon, the Village of Middlefield, and Bainbridge Township.

Population Density

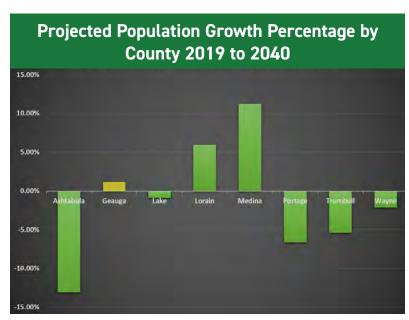

Geauga County is less dense (see left) than the other Counties in the NOACA region.

Home Values

Larger lot sizes and home sizes in Geauga County have correlated with the County having the highest median home values in Northeast Ohio (see bottom left).

Future Growth Projections

Projections from the State (see bottom right) show Geauga County's population increasing only slightly which contrasts with anticipated population losses in neighboring counties, and more rapid population growth on the southwest side of the Cleveland metro area in Lorain and Medina Counties.

HOUSING

Assessment

Housing Types and Age

The vast majority of residential housing options in the County are single family housing units, however multi-family living options are available per the table to the right. Of the 80,258 acres of land devoted to residential land use in the County, 77,785 acres are used for single family residential

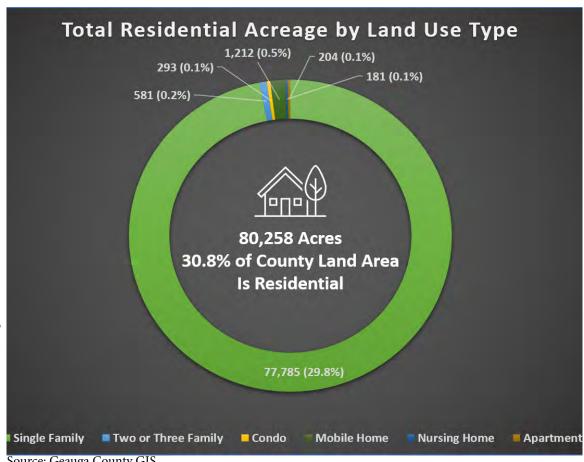

housing. Mobile homes are the second largest residential land use by type with 1,212 acres, followed by two/three family homes (581 acres), condos (293 acres), apartments (204 acres), and nursing homes (181 acres).

The average age for a single family home is over 50 years old. Condos and mobile

homes which have been built and/ or replaced more recently have the youngest average age of 32 years and 28 years respectively.

The map on the following page illustrates the median year built of homes by jurisdiction in Geauga County. Auburn Township has the newest housing stock while Chester, Russell, Newbury and **Burton Townships** have the oldest.

Housing Types by Jurisdiction

In concert with the overall County each jurisdiction's most dominant housing type is single family. The chart below illustrates the number of parcels dedicated to each housing type per jurisdiction. Bainbridge and Auburn Townships have the most parcels devoted to condos than any other in the County. As condos are generally newer homes, this contributes to a younger median housing age for each township. Mobile homes are spread fairly evenly between Parkman, Huntsburg, Thompson, and Middlefield Townships. Mobile home parks are present in Burton, Chardon, Chesterland, Claridon, Hambden, and Troy Townships. Apartments are concentrated in the City of Chardon, and Villages of Burton and Middlefield.

Single Family Housing and Lot Size

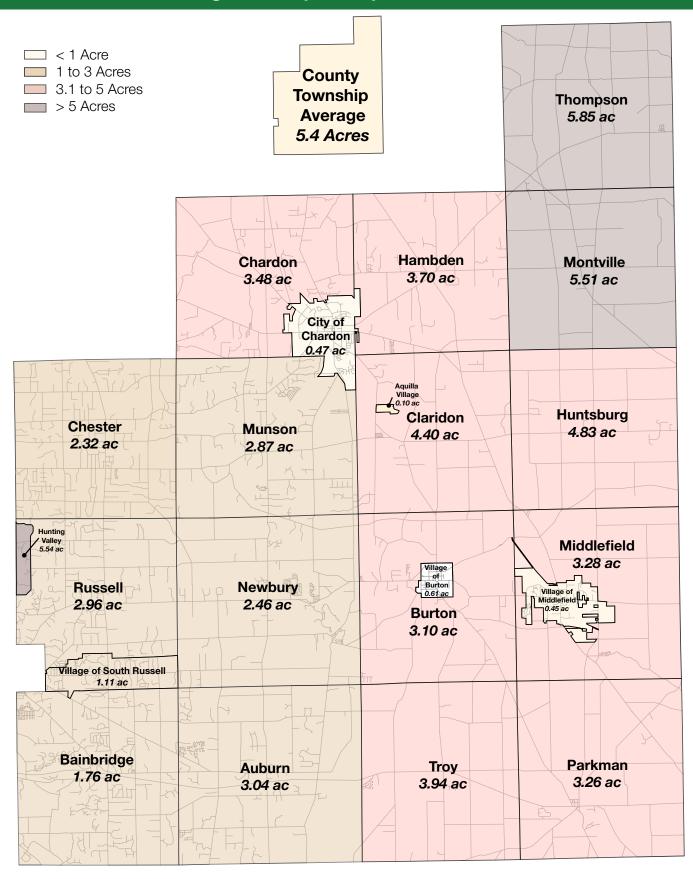

The average living area for a single family home in Geauga County ranges from 1,200 square feet in Aquilla Village to over 2,700 square feet in Russell Township. Many of the County's larger single family homes are concentrated on the western side of the County in Russell Township, the Village of South Russell, and Bainbridge Township. The majority of the remainder of the County has an average single family home size between 1,600 and 2,200 square feet.

The map on the following page illustrates the average single family lot size in the County and by jurisdiction. The average single family lot size in Geauga County is 5.4 acres. Outside of the City of Chardon and Villages of Burton and Middlefield, whose average single family lot sizes are under 1 acre, townships on the western half of the County have smaller average lot sizes ranging between 1 and 3 acres. Townships in the middle and southeastern portions of the County have slightly larger average single family lot sizes ranging from 3 to 5 acres. Montville and Thompson Townships have the largest average single family lot sizes with each exceeding 5 acres.

Housing Starts

Housing starts throughout the County have remained relatively steady from 2015 to 2019 with an average of 167 new units built annually. Roughly 90 percent of new housing units over the past five years have been single family units. The average cost of a new single family home has ranged from \$305,659 to \$384,491 since 2015. A total of 93 multi-unit buildings have been constructed since 2015. The townships with the most new housing starts between 2003 and 2019 are: Bainbridge (553), Auburn (433), Hambden (259), Munson (254), and Parkman (214).

Geauga County ranks in the middle of other Northeast Ohio counties in terms of both annual single and multi-unit housing starts. Medina County has the most new housing starts per 1,000 people,

followed by Lorain County. Housing start data is consistent with population trends throughout the region.

Home Value and Household Income

Geauga County has both the highest owner occupied median home values and median household income within suburban and rural counties in Northeast Ohio. Geauga County's median home value of \$240,900 is over \$40,000 dollars higher than the second highest county (Medina). Large lot sizes and proximity to high paying jobs contribute the both the high median home values and high household median incomes.

The map on the following page illustrates median home values by jurisdiction in Geauga County. Similar to many other housing trends throughout the County, the western side of the County has higher median home values. The Village of Hunting Valley, South Russell and Auburn Township have the highest median home values, each exceeding \$300,000. Home values for the eastern half of the County are much lower ranging between \$150,000 and \$200,000 in every jurisdiction.

The County's high median household income is roughly 1.75 times higher than neighboring Ashtabula and Trumbull Counties.

The average household size in Geauga County has changed from 2.84 persons per household in 2000 to 2.68 in 2010, and 2.63 in 2019.

Owner Occupancy

Geauga County has the highest owner occupancy rates of comparable counties in Northeast Ohio with 86.3% of units owner occupied. This is consistent with the high volume of single family homes in the County and lack of denser, urban cities.

Median Gross Rent

Rents in Geauga County rank in the middle of other comparable counties in Northeast Ohio. Median rent is just over \$800 dollars per month. Lake County has the highest median gross rent in the region with median rents around \$875 per month.

Senior Population

As stated in the demographic section of this plan, Geauga County has a higher number of seniors, over the age of 65 within the County as compared to 2010. Though the total number of seniors in the County is one of the lowest in Northeast Ohio, the senior population as a percentage of the overall population is 21.1 percent, second to only Trumbull County within the region.

According to population projects conducted by the Ohio Development Services Agency in 2018, Geauga County will continue to see an increase in its senior population relative to its total population over the next 30 years. As illustrated on the following page, the senior population will peak in 2030 at 25.5% of the total population, one

of the highest percentages in the State. The senior population is expected to stay above the current percentage of the overall population (21.1%) through 2050.

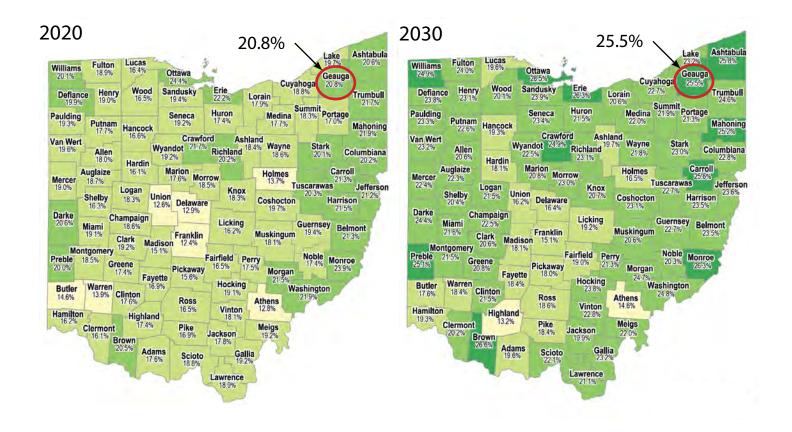

The market will respond to the need for senior multifamily and/or low-maintenance housing. Age restricted housing is not necessarily the only viable housing option for seniors as existing multi-family developments and in-law suites where a second dwelling unit is not created are options as well.

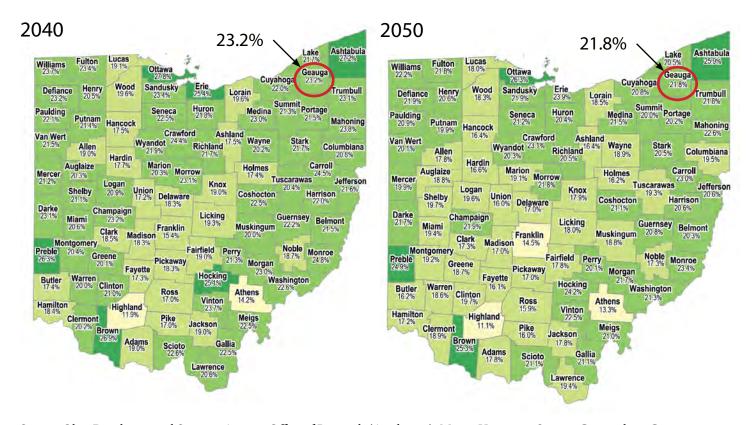

The map on the following page illustrates the existing assisted living facilities throughout Geauga County.

Planning Commission Initiatives

In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize county goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to the following housing initiatives:

- Inventory of Housing Units: At the time of this plan's preparation, the Geauga County
 Auditor does not include GIS data fields for the exact number of individual housing units within
 multifamily residential complexes. Planning Commission may consider working with the County
 Auditor, local government officials, and various housing agencies and private property owners to
 create an inventory of the number of existing housing units of various types and to establish a
 mechanism for tracking new units constructed going forward.
- Monitoring of Senior Housing Needs: The Geauga County Department on Aging fields regular
 requests from local seniors seeking assistance with the maintenance of their private residences,
 often as a result of deferred repairs due to reduced mobility or the passing of spouse who
 handled property upkeep. Planning Commission may consider coordinating with the County
 Department on Aging to monitor these requests for housing assistance to see if any patterns
 emerge in the age and geographic location of residential structures and the socioeconomic
 status of the requesting seniors.
- **Update of the Growth Study of Senior Housing Needs:** The Planning Commission should consider assisting the Dept. on Aging and County Auditor with updating the 2011 Growth Study of Senior Housing Needs in Geauga County that identified the number of seniors in each township and the projected growth based upon census data.
- **Monitor Housing Sales:** Track and analyze the County Auditor's housing sales data that includes vacant and improved parcels for trends.

Potential Tools & Strategies

Below is an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals:

Senior Housing

- Local governments may consider allowing Senior Housing as a permitted or conditional use in appropriate zoning districts with adequate infrastructure. An example exists in Troy Township which allows nursing homes as a conditional use in their B-1 General Commercial district.
- County officials and local partners may consider promoting already available senior housing financial incentives for housing rehabilitation (e.g. USDA Section 504 Home Repair program) to qualifying individuals in need.
- Expand resident awareness of existing senior housing (independent living, assisted living) developments within the County through lists and maps of those facilities, as well as housing that is not age-restricted, through websites, newsletters, etc.
- Townships and municipalities should give consideration to granting setback or area variances for proposed dwelling addition, as long as a second dwelling unit is not created, to accommodate family members as an alternative to senior housing development or assisted living.

Conservation Development

• Conservation Development is density-neutral development tool that accommodates smaller lot sizes while preserving a portion of a subdivision. Some communities mind find value in adopting a Conservation Development Planned Unit Development (PUD) as a conditional use that could potentially be applied for on a case-by-case basis in appropriate residential districts.

Goals

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

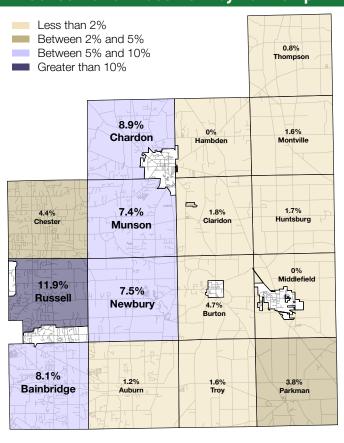

Public Acquisition of Land	Over 12% of the County's land area is comprised of tax-exempt properties. The County should carefully consider the fiscal impacts of removing a property from the tax base on a case-by-case basis before pursuing the acquisition of additional land for conservation or other purposes.			
Private Conservation of Land	There are over 100 privately owned parcels under conservation easement in Geauga County. While private individuals have the right to enter into conservation easements, the County should educate the public on the fiscal and other impacts of preserving a property in perpetuity on a case-by-case basis before encouraging or facilitating additional conservation easements.

Watersheds

Geauga County is situated within four major water basins and 38 watersheds. The county contains the headwaters of four of the major drainage systems in northeast Ohio: the Cuyahoga, Grand, Chagrin, and Mahoning. The Cuyahoga, Grand, and Chagrin all flow in to Lake Erie and drain 99% of the county. The remaining 1 % is within the Mahoning basin and flows into the Ohio River.

Cuyahoga River Basin: The origin of the Cuyahoga River is in the northeasterly portion of the county. The East Branch of the river flows in a southerly direction through Huntsburg Township, where it is artificially dammed to form East Branch Reservoir (owned by the City of Akron). The reservoir is about 2.3 miles in length. South of the reservoir, the river joins Tare Creek which continues to flow through a depression about 0.5 mile wide and 3 miles in length. The Cuyahoga continues south into Burton and Troy Townships for about 11 miles where it goes into Portage County. Near Burton, the Cuyahoga is joined by its West Branch, which originates in Hambden Township and drains a large portion of Hambden, Claridon, and Burton Townships as well as a small part of Munson Township. In Claridon, the West Branch is part of a large depression which is about 0.8 mile wide and about 5 miles in length. Another major tributary to the Cuyahoga River is Bridge Creek, which drains a substantial part of Auburn Township. Bridge Creek was artificially dammed in Troy Township to form LaDue Reservoir, which is about 5.5 miles in length and about one mile wide.

Grand River Basin: The Grand River originates in the northwestern portion of Parkman Township. It flows southward and then in an easterly direction toward Trumbull County. The river gradually bends northward near the easterly Geauga County line. Near Mechanicsville in Ashtabula County, the Grand is diverted in a westerly direction and ultimately enters Lake Erie about 10 miles northwest of Chardon. The Grand River is fed by various tributaries flowing in an easterly and northerly direction. These tributaries drain most of eastern and northern Geauga County and include, for example, Swine Creek, Bates Creek, Big Creek, and Cutts Creek.

Chagrin River Basin: The Chagrin River drains the western third of Geauga County. It originates in the valley flat area south of Chardon. It flows in a southwesterly direction through the lowland area of Bass Lake to Fowlers Mill. The river then meanders through a large flat area. From northwestern Newbury Township, the river flows across northern Russell Township and then bends southwesterly toward Chagrin Falls. At Chagrin Falls, the river turns sharply northward. The major tributaries to the Chagrin include the East Branch and the Aurora Branch. The East Branch begins in northern Munson Township and flows southwesterly to Chester Township, where it then turns in a northerly direction. The river flows into Kirtland (Lake County) and then into western Chardon Township for about 2.5 miles. It then returns to Lake County and joins with the Chagrin, flowing in a westerly direction, and then turns northerly to Lake Erie. The Aurora Branch of the Chagrin and its tributaries (including

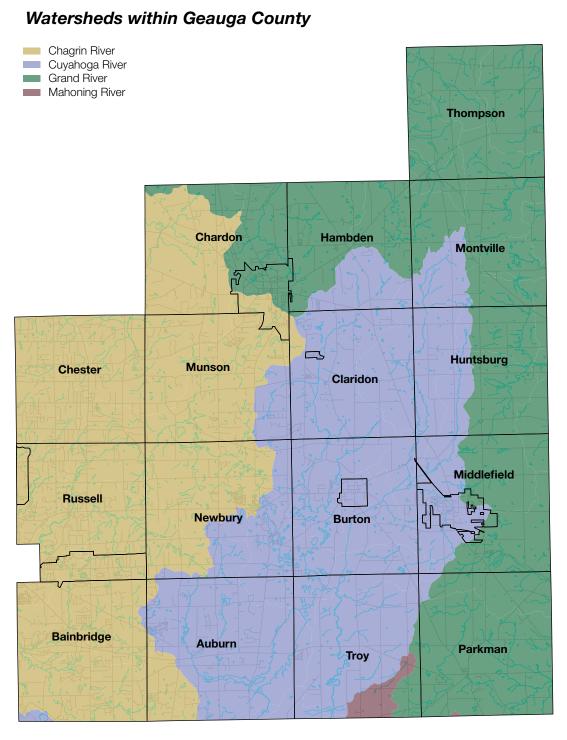

NATURAL RESOURCES

McFarland Creek) drain all of Bainbridge Township (except its southwest corner), the southwesterly corner of Auburn Township, and a small portion of south central Russell Township. The Aurora

Branch flows in a northwestward direction across the southwesterly portion of the county in a narrow valley.

Mahoning River Basin: An area of about a square mile in southern **Troy Township** is drained by a creek which is a tributary to the Mahoning River. The Mahoning flows into the Ohio River. The headwaters of the creek is in a swamp that occupies a lowland area that connected the Cuyahoga and Grand River drainage basins.

NATURAL RESOURCES

Floodplains

The map titled "100-Year Floodplain Limits" on page 83 illustrates the designated "100-year" flood plain areas in the county. All of the major river systems in the county fall within the jurisdiction of the National Flood Insurance Program (NFIP) regulations adopted by the Board of County Commissioners or by individual municipalities. According to the regulations, proposed buildings within the flood plain must either be flood proofed or the first floor (including basement) elevated at least one foot above the "100 year" base flood elevation. In addition, no onsite sewage disposal system may be installed within a regulatory flood plain. A "100 year" flood zone is based upon the hydrologic studies authorized by the Federal Emergency Management Agency (FEMA). There is a 1 % chance in any year that a flood of the magnitude identified by FEMA on its maps will occur. There are 15,368.3 acres of flood plain, which is 5.9% of the total area of the county.

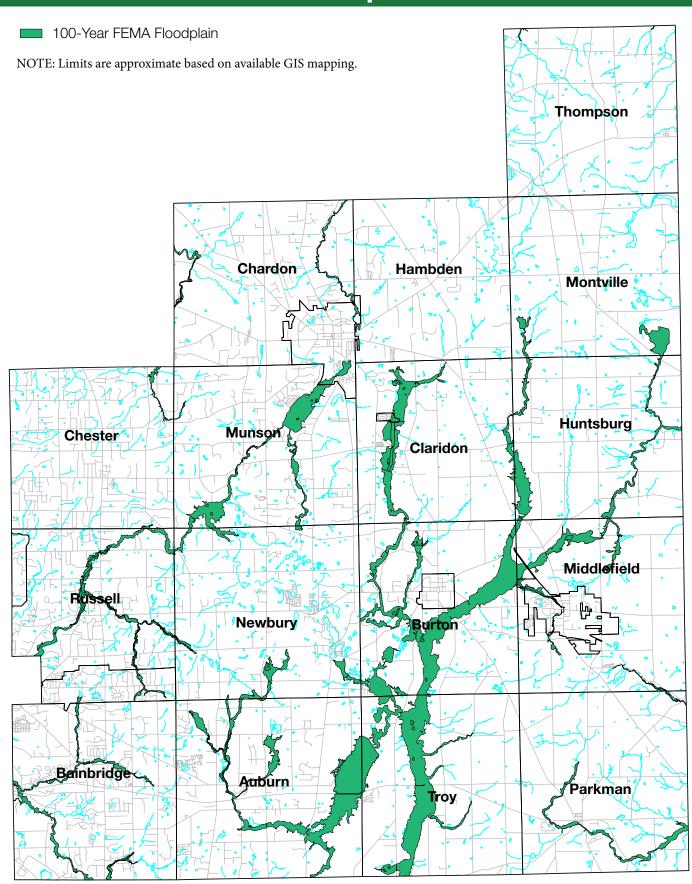

Wetlands

The map titled "Existing Wetlands" on page 84 generally shows wetland areas in the county. As wetland size, composition, and classification may change over time, the information mapped does not replace a wetland delineation prepared by a qualified wetlands professional using current delineation protocol accepted by the U.S. Army Corp of Engineers. An area may be classified as a wetland if it has one or more of the following attributes.

- 1. Hydrophytic vegetation: Hydrophytic vegetation is plant life which grows in water, soil, or a substrate that is at least periodically deficient in oxygen as a result of excessive water content.
- 2. Hydric soils: Hydric soils are soils that are saturated, flooded, or ponded long enough during the growing season to develop anaerobic conditions (absence of free oxygen) in the upper portion thereof.
- 3. Wetland hydrology: Permanent or periodic inundation, or soil saturation to the surface, at least seasonally.

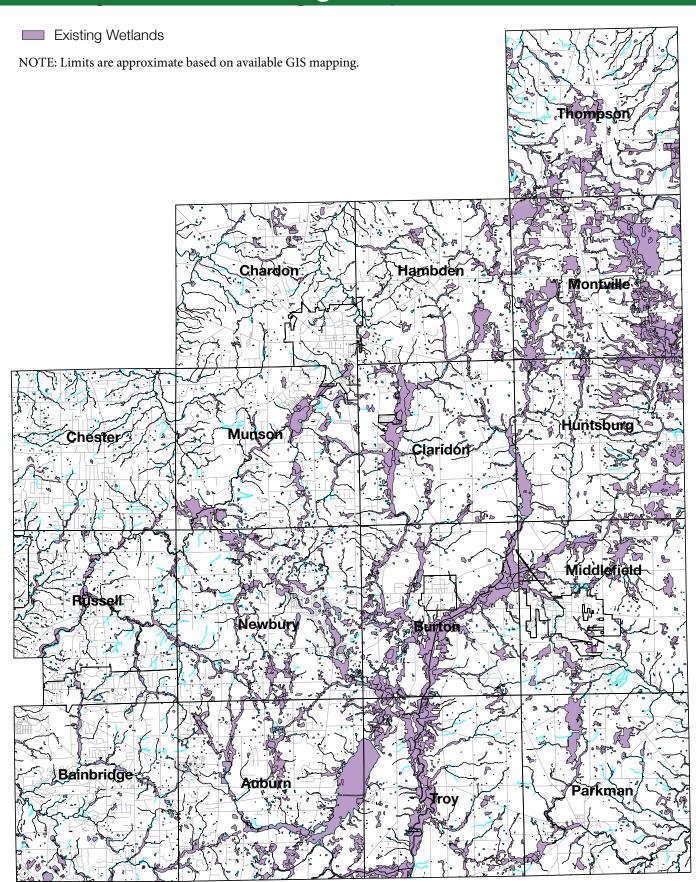

Wetlands merit protection due to the array of useful functions they perform. They improve water quality by serving as a natural filtration system. The vegetation traps sediment and other pollutants from the water. Wetlands retain large quantities of water, thereby providing downstream protection during periods of heavy rainfall and conversely, supplementing streams during periods of dry weather and low flow. Finally, wetlands serve as havens for some rare plant species as well as breeding, nesting, and feeding grounds for a variety of wildlife. Geauga has 31 ,257.6 acres of wetlands, which is about 12% of the county. The U.S. Army Corps of Engineers is involved with the regulation of jurisdictional wetlands under Section 404 of the Clean Water Act. The Ohio EPA regulates wetlands as well.

NATURAL RESOURCES

What is a Conservation Easement?

Someone who owns land also "owns" many property rights associated with it. A landowner may volunteer to give up certain rights in order to limit its current and future use to agricultural or keep it in its natural condition. A conservation easement is a voluntary conservation agreement between a landowner (donor) and a qualified governmental entity or non-profit organization like a land trust (donee). When a person donates or sells a land conservation easement to a land trust, they permanently extinguish certain development rights, while binding future owners of the land to the terms stated in the agreement.

Each conservation easement is individually written to meet the needs and interests of the landowner. It may cover the entire property or just a portion of it, such as the land along the shore or a lake or stream, leaving the option of development open for the remaining part. Permissible land use practices, such as farming, timber harvesting, hunting, future home site development are stated in the agreement, in addition to non-permitted practices such as commercial development for landfills, telecommunication facilities, and extraction of minerals, etc. The public does not have access to property protected by an easement unless granted by the original document.

Landowners who donate a "qualifying" conservation easement to a "qualified" land protection organization under the regulations set forth in 170(h) of the Internal Revenue Code may be eligible for a federal income tax deduction equal to the value or their donation. The value of the easement donation, as determined by a qualified appraiser, equals the difference between the fair market value of the property before and after the easement takes effect.

To qualify for this income tax deduction, the easement must be: 1) perpetual; 2) held by a qualified governmental or non-profit organization; and 3) serve a valid conservation purpose, meaning the property must have an appreciable natural, scenic, historic, scientific, agricultural, recreational or open space value.

NATURAL RESOURCES

Future Land Use Implications

Conservation easements prohibiting development in perpetuity inevitably interact with land use and zoning processes. Only the State of Massachusetts (detailed below), requires the integration of conservation easement creation and zoning hearings and approval processes.

Case Study - Increased Transparency - Massachusetts

Massachusetts has one of the earliest enabling laws in the nation, and requires both state and local government review and approval of conservation easements. The state's Executive Office of Environmental Affairs has easement guidelines, criteria, and forms that must be used in the absence of demonstrated reason otherwise (Massachusetts EOEA 1991). To be legally durable, conservation easements held by land trusts or local governments in Massachusetts must be reviewed and approved by the state's Secretary of Environmental Affairs and found to have discernible public benefit.

Easements held by land trusts also must obtain approval of the local government where the land is situated. For an easement to be terminated in whole or in part, all of these same approvals are required. This system of public conservation easement review and approval assists the land trust community by providing comments and recommendations from an agency with considerable statewide experience. Land trusts in the state also benefit from agency support in negotiating with landowners who may want to depart from the standard terms.

Massachusetts land trust officials look favorably on the local review process because it ensures community involvement and consistency with local land use plans.

Conservation Easements in Geauga County

Research conducted during this General Plan Update found that over 10,000 acres of land within the County are under conservation easement. According to the National Conservation Easement Database, Geauga County has both the most total acreage under conservation easement, and the highest percentage of land area under conservation easement in the State of Ohio. If all conservation easements in the County were placed contiguous to each other, it would be equal to 65% of the total land area of an average Geauga County township.

While properties with conservation easements in Geauga County are not taxed any differently than properties without conservation easements, there may be long term property tax impacts from restricting future development on these parcels.

Conservation History and Location

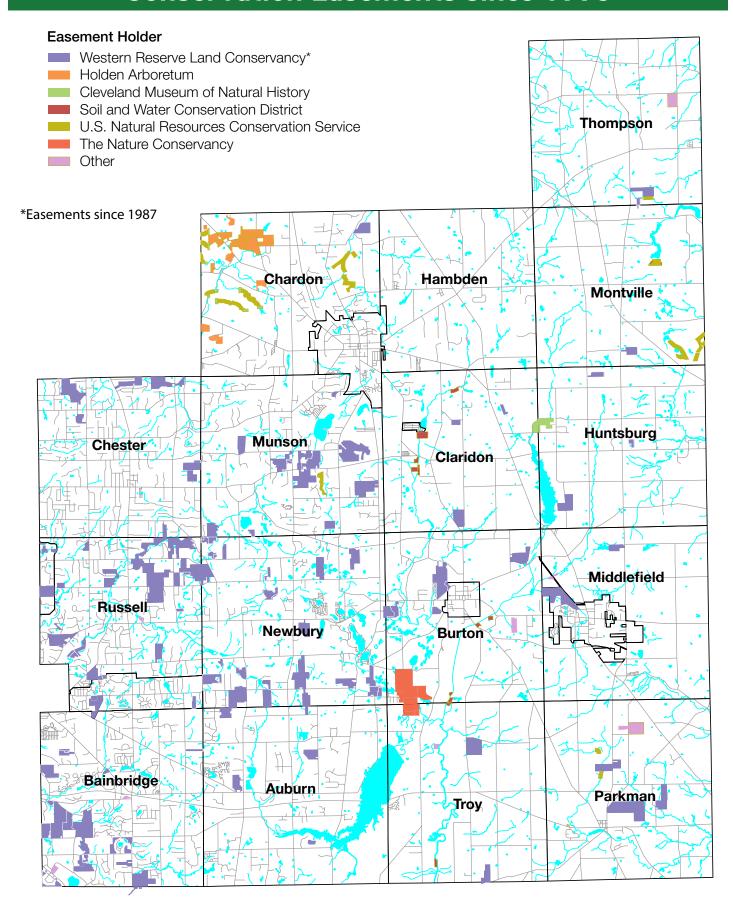

The first known conservation easement in the County was completed in 1987. Conservation easements did not become widely utilized as a conservation tool within the County until 1998. Many of these early conservation easements centered around preserving the Chagrin River Valley. Since 1998, conservation easements have been widely used by private property owners to conserve wetlands, riparian corridors, and in some cases farmland.

The majority of conservation easements are concentrated in the western half of the County. Russell Township has the most land area under conservation easement at 11.9%, followed by Chardon and Bainbridge Townships that have 8.9% and 8.1% of their land areas under conservation easement respectively. Fewer conservation easements exist in the eastern half of the County.

Planning Commission Initiatives

In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize county goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to the following natural resource initiatives:

- **Monitoring of Conservation Easements:** Planning Commission may consider monitoring new conservation easements as they are filed with the County Recorder as a standing agenda item each month on the Director's Report.
- **Engage Land Conservancies in a Discussion:** Planning Commission may consider meeting with local land conservancies to express their concerns over the amount of land being conserved in the County and gain a better understanding of long-term land conservancy goals in the County.
- Raising Public Awareness: Planning Commission may consider educating the public on the potential negative consequences of entering into a conservation easement relative to both an individual's private property rights and the short-term and long-term property value and local tax base implications.

Potential Tools & Strategies

Below is an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals:

Community Dialogue

The County should encourage its local government to engage in a thoughtful and transparent
community dialogue about the advantages and disadvantages of conserving land in perpetuity.
In a community with future growth potential land that is desirable for conservation today may
be needed at a later date to meet community facility or infrastructure needs. In a developed
community close to buildout, a conservation easement may play a critical role in protecting one
of the last tracts of natural land. Each situation needs to be carefully considered on a case-by
case basis.

Creative Partnerships

 In cases where a community decides it is in their best interest to dedicate land for conservation, opportunities should be explored to leverage outside financial assistance (e.g. Clean Ohio Greenspace Fund).

INFRASTRUCTURE

Goals

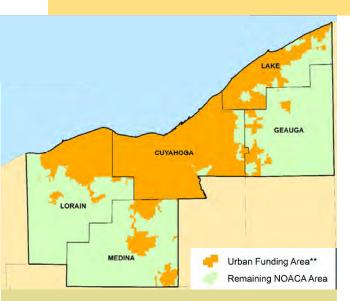

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

Transportation	Reliable transportation infrastructure is critical in connecting households to jobs and education, while allowing for the movement of goods and services within local supply chains. The County should maintain a state of good repair for roadway pavement, bridges, and culverts and work to ensure that the local transportation network facilitates the safe and efficient movement of people, goods, and services.
Water & Sewer	Maintaining rural character is essential to Geauga County residents and the County should work to ensure any future water and sewer expansion projects be installed in accordance with development areas identified in local land use plans, local zoning, subdivision regulations, and land capability (soil type, topography, etc.).
Broadband	Access to high-speed internet is vital for many industries and enables efficient, modern communications between households, schools, and healthcare centers as well as markets and customers around the world. The County should seek to leverage opportunities for investment in the local broadband network to ensure local electronic connectivity.

INFRASTRUCTURE

Assessment

NOACA Distribution of Surface Transportation Program (STP) Funds

Through the 2016 to 2019 funding period, a total of \$89.7 million in STP funding was committed to 63 projects across the 5-county region. 14.4% of STP funding commitments in the region were allocated to 4 projects outside of the Urban Funding Area (see table below), with the majority of that funding (\$11.7 million) allocated to the Vrooman Rd Bridge in Lake County.

Transportation

Roadway funding in Geauga County is primarily through state, county, and local programs. Federal MPO transportation funding in predominately rural Geauga County is restricted by regional investment priorities that favor metro Cleveland's urban core (see left and below). Numerous rural roadway safety priority locations have been identified by ODOT and are worthy of outside agency funding investment.

Water & Sewer

Existing water service areas in the County are largely limited to municipalities and Bainbridge Township. There is demand for water service in Bainbridge, Chester, and Russell Townships due to their relatively poor groundwater. Sanitary sewer service is limited primarily to municipalities and isolated systems more heavily concentrated in the denser western portion of the County. Future planning for sanitary sewers is needed as septic systems in residential developments are increasingly coming under scrutiny by state regulatory agencies. Water and sewer systems within municipalities are owned by each municipality, systems outside municipalities are owned by the County.

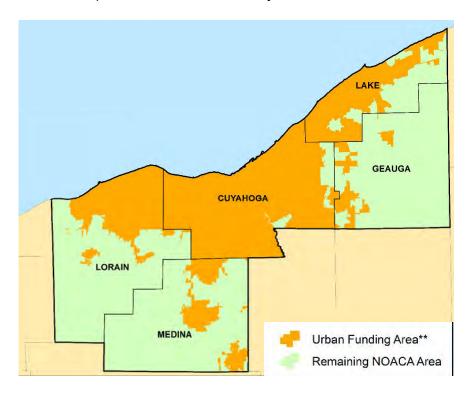

Broadband

Broadband connectivity speeds in Geauga County lag behind much of the Cleveland metropolitan area, particularly in the Southeastern portion of the County.

Geauga County has 15 locations identified in ODOT's Top 100 statewide safety priority locations. Note, the numbers referenced within the map below are from a safety priority list maintained by ODOT.

2019 County Road High Crash Locations

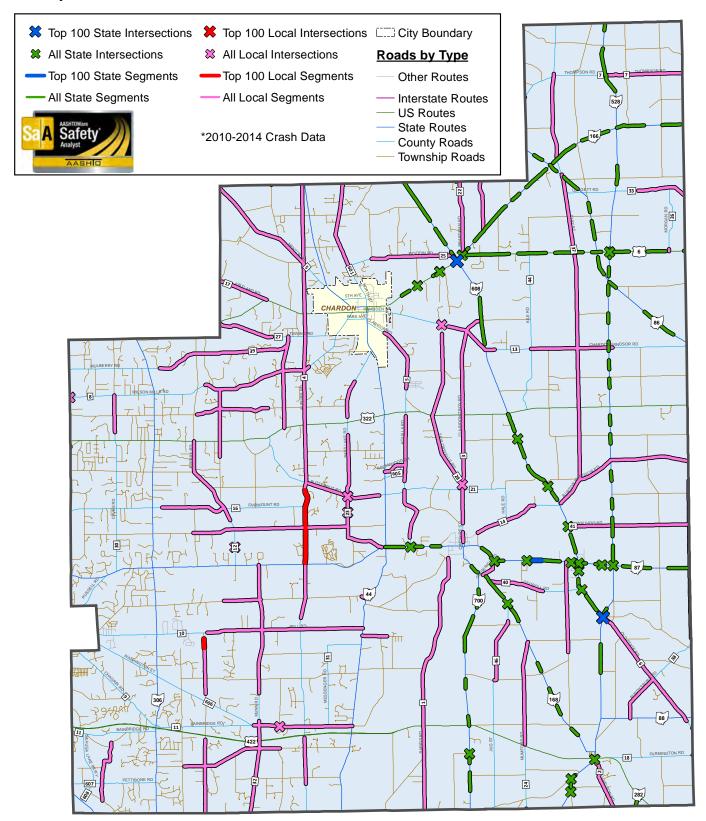

County Road crash frequency is generally higher in the more populated western half of the County with the Auburn Road, Washington Street, and Bainbridge Road all exhibiting multiple high crash locations.

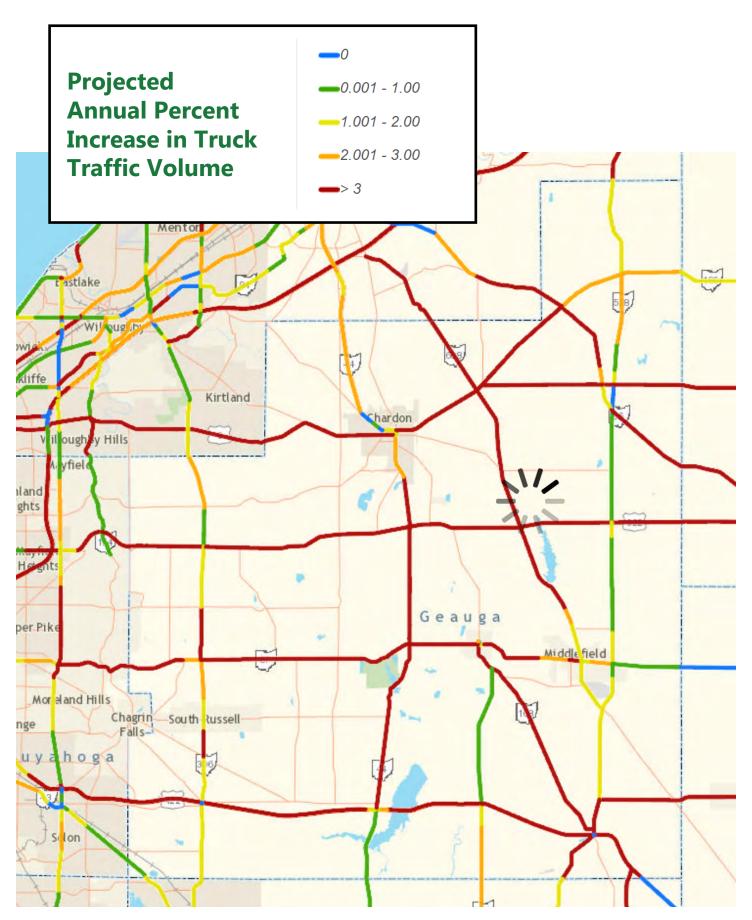

ODOT High Risk Rural Road Locations (2014)

High risk rural road segments and intersections are widespread across the rural areas of the County. Two locations are on the list of ODOT's Top 100 local roadway segments:

- Auburn Road from SR 87 to Butternut Road
- Snyder Road south of Bell Street

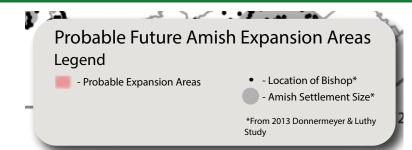

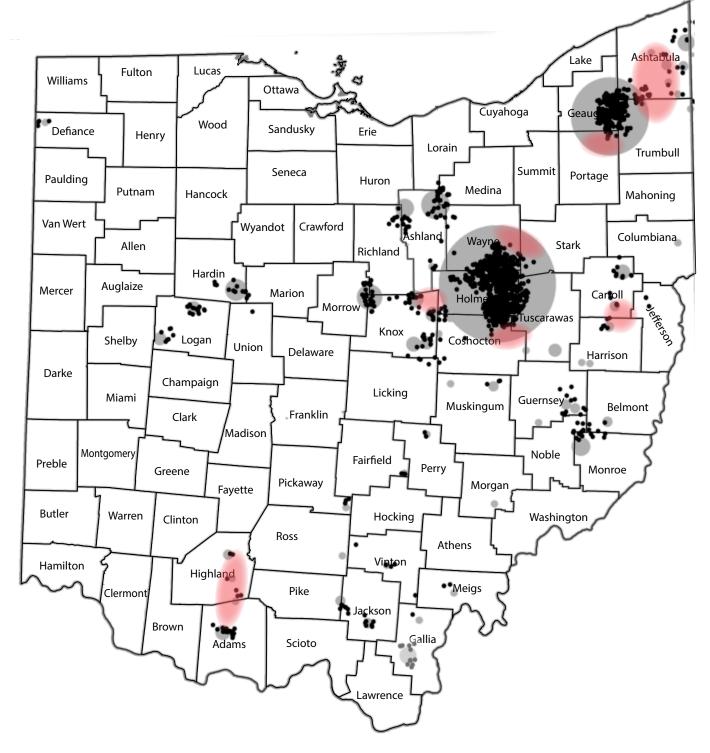

ODOT Truck Traffic Volumes - Projected Future Growth

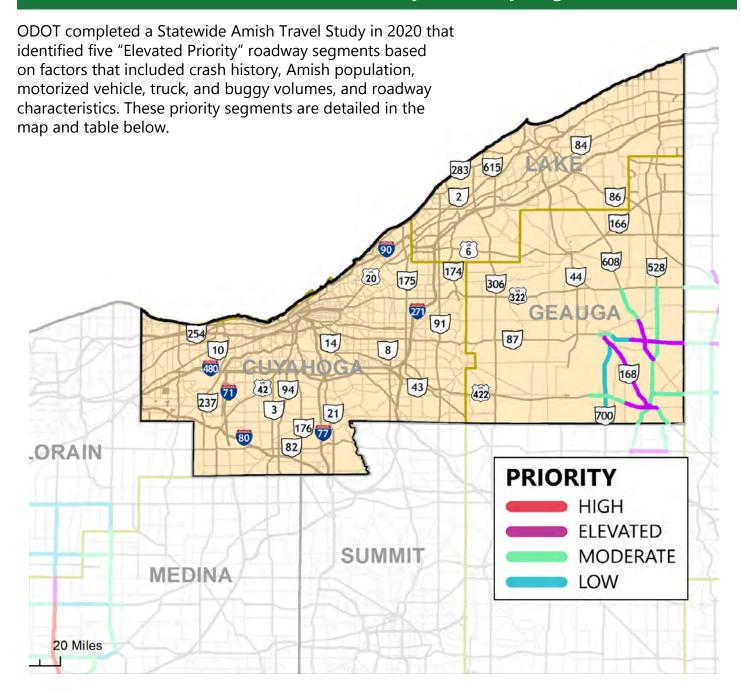

ODOT Statewide Amish Travel Study - Amish Settlements (2020)

Southeastern Geauga County is home to Ohio's second largest Amish settlement, which poses additional transportation safety and mobility challenges along rural roadway corridors with increasing truck traffic.

Sewer Service Areas

Sanitary sewer service is limited primarily to municipalities and isolated systems more heavily concentrated in the denser western portion of the County.

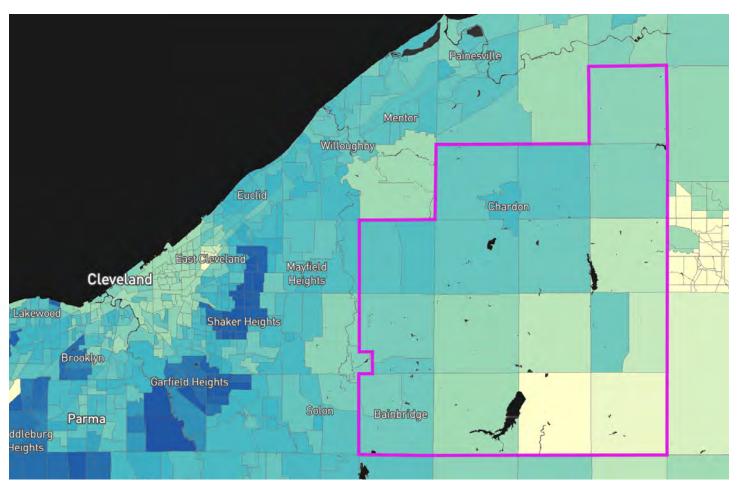

Water Service Areas

Existing water service areas in the County are largely limited to municipalities and Bainbridge Township.

FCC Fixed Broadband Deployment

The number of fixed service broadband providers is limited in the Southeastern areas of Geauga County.

Broadband Service Speeds

Broadband connectivity speeds in eastern Geauga County lag behind the western and centrals areas of the County. The Federal Communication Commission (FCC) defines high-speed broadband as download speeds of 25 megabits (Mbps) per second or greater and upload speeds of three Mbps per second or greater. The map below shows the areas where median fixed broadband speeds do not meet the 25/3 Mbps high-speed standard.

INFRASTRUCTURE

Planning Commission Initiatives

In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize county goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to the following infrastructure initiatives:

- Rural Roadway Safety: Planning Commission may consider working with the County Engineer
 to maintain an inventory of rural roads with documented safety issues within the Amish
 community to build the business case for additional financial investment by funding agency
 partners to improve heavily traveled routes as identified in ODOT's 2016 Geauga County Amish
 Safety Study.
- **Regional Transportation Investments:** Given that regional transportation funding is a serious challenge for Geauga County as an outlying, rural community, Planning Commission may consider working with the County Engineer to document transportation system preservation and safety enhancement needs for existing infrastructure to best position those projects for outside investment from applicable programs (e.g. Ohio Highway Safety Improvement Program).
- **Amish Community:** Given that Geauga County boasts a large Amish population, the Planning Commission should be available to participate and/or assist the County Engineer and County Department of Emergency Services, and other agencies, with issues identified by the Amish Safety Committee to ensure resident needs are continually addressed.
- **Wireless Telecommunication Mapping:** Creating a GIS inventory of all wireless telecommunication towers within the County and the providers co-located on each tower will help to understand the existing network and where it may be deficient.

Potential Tools & Strategies

Below is an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals:

Transportation

- The County should continue to work with government funding agencies (e.g. ODOT, OPWC, CEAO, and NOACA) to leverage outside federal and state funding assistance for transportation maintenance projects, as well as strategic safety and operational enhancements.
- Work through the County Department of Community & Economic Development to track local business requests for transit service, and if demand arises, connect corporate leaders so they can explore their potential need for shared investment in privately funded "last-mile" transit service to major employment centers.

Water & Sewer

• When utility infrastructure needs arise for rehabilitation and/or capacity expansion, work with state partners (e.g. Ohio Water Development Authority) to obtain below-market rate financing to offset the local share of the costs of water and waste water projects.

Broadband

- Explore potential partnership models for enticing private fiber optic company investment in underserved areas of the County.
- The Planning Commission may consider monitoring of the Ohio Residential Broadband Expansion Grant Program and any other programs that may arise to support increased rural broadband connections.

Transportation

ODOT Highway Safety Improvement Program

How to Apply for Funds

ODOT accepts applications twice a year. The deadlines are April 30 and September 30. Applications must be reviewed by the local District Office before they are submitted to Central Office. The department encourages project sponsors to coordinate with the local District Office at least 12 weeks in advance of these deadlines – though more time will likely be necessary for complex projects (e.g. interchange modification, corridor, TWLTL), which require additional reviews. Early coordination with the local District Office is essential to developing a realistic timeline for submitting an application.

Applications are reviewed by multi-disciplinary committees in the District and Central Office. The committees have expertise in safety analysis, roadway design, traffic engineering and highway maintenance. These committees evaluate investments based on factors such as crash analysis; statewide, regional or local priority; matching funds; and cost/benefit analysis. The committee reviews about 70 applications per year requesting more than \$150 million.

Information Required

Funding is awarded based on a demonstrated problem and long-term crash trends. All applications should include information that clearly links the crash patterns with the suggested safety improvement.

To determine the best solutions for fixing locations, each District Office or local sponsor typically must conduct a formal safety study that includes a review of existing roadway conditions and detailed crash analysis. This analysis helps identify common crash patterns to determine the best strategies to reduce crashes.

ODOT may waive the formal study for an abbreviated study for low-cost safety requests. At a minimum, the department will need basic crash trend information, collision diagrams and reliable cost estimates.

Project sponsors are encouraged to examine a full range of options starting with low-cost strategies, such as new signs, pavement markings and guardrail to mid-cost strategies such as new traffic signals, turn lanes and road realignments. Higher-cost projects, such as corridor improvements to arterial roads and interchange reconfigurations, may be considered up to \$10 million. Funding can be paired with other sources.

Ohio Public Works Commission (OPWC)

SCIP

The State Capital Improvement Program (SCIP) was created in 1987 and renewed in 1995, 2005 and 2014 by amendments creating Sections 2k, 2m, 2p and 2s, Article VIII of the Ohio Constitution. These Constitutional provisions allow the State to use its general revenues as debt support to issue general obligation bonds up to \$175 million in fiscal years 2017 to 2021 and \$200 million in fiscal years 2022 to 2026. Eligible applicants are counties, cities, villages, townships, and water and sanitary districts (ORC 6119 or 6117). Eligible projects are for improvements to roads, bridges, culverts, water supply systems, wastewater systems, storm water collection systems, and solid waste disposal facilities.

Funding is provided through grants, loans, and loan assistance or local debt support. Grants are available for up to 90% of the total project costs for repair/replacement, and up to 50% for new/expansion. Loans can be provided for up to 100% of the project costs. Grant/loan combinations are also available. There is no minimum or maximum loan amount with a term of one to thirty years, not exceeding the useful life of the project. The interest rate is 0%. Once the project is completed a final amortization schedule is provided requiring payments every January and July until the term of the loan expires. Loans may be paid in full with no prepayment penalty.

LTIP

The Local Transportation Improvement Program was created by the legislature in 1989. The OPWC currently receives less than one penny of the annual gasoline tax receipts (approximately \$61 million). Since the use of such receipts is constitutionally limited to roads and bridges only counties, cities, villages and townships may apply for these funds. Applicants may apply for grants up to 100% of the project cost.

Water & Sewer

Grant Sources

The Geauga County Department of Water Resources utilizes grant programs from many agencies and programs including USEPA-DEFA (WPCLF), OWDA, OPWC, and USDA.

Water Service Expansion

Private water wells are the largest source of domestic water in Geauga County. The Geauga County Department of Water Resources has identified demand for water service in some western areas of the County due to relatively poor groundwater.

Sewer Service Expansion

Septic systems in residential developments are increasingly coming under scrutiny by state regulatory agencies. There is a need to plan for more future sanitary sewer service as there are over 25,000 residences served by household sewage treatment systems in Geauga County. Any part of a sewage treatment systems must be located at least ten (10) feet from a property line and fifty (50) feet from a water well. Additionally, sufficient area must be provided for both a primary sewage treatment system and a replacement system if the primary system were to fail. The Department of Water Resources and the Health Department work together as needed when Ohio EPA mandates sewer extensions due to failing septic systems.

All non-residential sewage treatment systems are regulated by the Ohio EPA.

Broadband

Future Technology Considerations

It is critical that any broadband infrastructure deployed in Geauga County will have the ability to evolve, sustain, and scale for future advanced services that will also be important to the local economy. In the years ahead, emerging technologies such as cloud technologies, artificial intelligence, health IoT and telemedicine, smart grid, and 5G, will all require broadband networks capable of delivering much faster speeds, lower latency, and higher reliability than those now codified by various federal agencies.

Broadband Service Expansion Case Studies

Several potential models for public-private partnerships exist to enhance broadband connectivity:

Broadband Public-Private Partnership (P3) Models						
P3 Framework	Private Investment, Public Facilitation	Private Execution, Public Funding	Shared Investment & Risk			
Public Agency Role	Economic & procedural incentives (e.g. tax benefits, streamlined permitting, right-ofway access)	Significant capital Investment (usually lease payments over extended 20-40 year period)	Varies, but often contribution of fiber already in use for civic purposes			
Private Partner Role	Capital investment, O&M, retail services	Combination of engineering, construction, financing, and/or O&M responsibilities	Varies, but often expansion of fiber network to businesses & residents			
Public Agency Risk	Low	High	Medium			
Potential Challenges for Geauga County	Public incentives alone in underserved rural areas may not be enough to close private sector financing gap	Customer participation rates may inhibit profitability leaving public agency as guarantor of project	Lack of existing public broadband assets and potential private utility resistance			

Broadband

Broadband Service Expansion Case Studies

Several potential models for public-private partnerships exists to enhance broadband connectivity. Several case studies are described below for informational purposes.

Medina County Fiber Network (Medina County, OH)

Completed in 2013, the Medina County Fiber Network (MCFN) is a project managed through the Medina County Port Authority. Funded through revenue development bonds, the MCFN was designed to help companies grow through access to the best technology available. With an eye to the future, the MCFN allows tomorrow's needs to be met today. Medina County is the owner of the fiber network.

Dublink (Dublin, OH)

Dublink is 125 miles of fiber optics that run underground throughout Dublin and many surrounding Central Ohio communities. This City-owned network makes the City of Dublin the best-connected community in Central Ohio and has brought attention to the city in the form of recognition as a top national and global broadband environment. Dublink's ultra-high speed and ultra-low latency network connectivity is capable of delivering business traffic at the speed of light and provides a superior choice of service providers and global carrier networks.

FairlawnGig (Fairlawn, OH)

FairlawnGig is a municipal broadband utility established by the City of Fairlawn that delivers a better Internet experience for residents and businesses in Fairlawn and the Akron/Bath/Fairlawn JEDD. FairlawnGig's high-speed fiber network offers an unprecedented level of Internet service to the Fairlawn area with a gigabit fiber connection to every home and business. The City of Fairlawn established FairlawnGig as a forward-thinking, economic development strategy founded on the belief that business growth, innovation, and community transformation will follow with every connection.

The \$10.1 Million capital investment required for the fiber network that passes every home and business was paid for through the City's General Fund. The network is a completely city staffed (and city owned), self-sufficient Internet Service Provider. Services for local residents and businesses include internet and phone.

ECONOMIC DEVELOPMENT

Goals

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

Business Retention & Expansion	Local businesses are critical to maintaining a strong tax base in Geauga County. The County should work to better understand the current and future needs of local businesses and encourage them to prosper and grow in the County.
Strategic Development	The County is home to several industrial parks and underutilized development areas. The County should encourage private investment in new, rehabilitated, and expanded commercial/light industrial properties that result in long-term increases in property values, job growth, sales activity, and tax revenue.
Intergovernmental Cooperation	The County benefits when its local governments work together to achieve common goals. The County should support local government efforts to collaborate on projects and initiatives that maintain and expand the County's tax base.
Marketing & Promotion	Define a value proposition for Geauga County that defines its distinctive competitive position in the area given its assets, location, and strength. The County should market and promote its value proposition to prospective developers and site selectors.

ECONOMIC DEVELOPMENT

Assessment

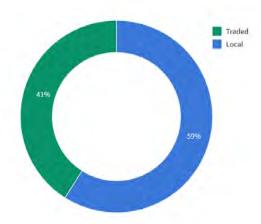

Employment Inflow-Outflow

The number of Geauga County residents employed outside the County exceeds the number of Geauga County employees residing outside the County, as shown in the diagram on the left.

As a result Geauga County experiences a net loss of 9,476 employees in its daytime population.

Traded vs. Local Clusters GEAUGA COUNTY

Regional Industry Clusters

Regional economies are made up of two types of clusters:

- Traded clusters are groups of related industries that serve markets beyond the region in which they are located.
- Local clusters, in contrast, consist of industries that serve the local market. They are prevalent in every region of the country, regardless of the competitive advantages of a particular location.

While local clusters account for most of the employment and employment growth in regional economies, traded clusters register higher wages, and much higher levels of innovation.

ECONOMIC DEVELOPMENT

Inflow-Outflow

Outbound commuters living in Geauga County exceed workers employed in the County but residing elsewhere by 1.43 to 1. The County sees a net loss of nearly 9,473 employees in its daytime population.

Target Industries

Location Quotient

Location quotients (LQ) are calculated by comparing the industrial composition in the region to a larger reference region, in this case the county of interest in comparison to the nation. Location quotients enable us to quantify how concentrated an industry is in the region, which allows us to determine how that region is unique in comparison to the nation. A location quotient over one suggests that industry is more specialized in the region than the national average.

Mnemonic:	Description:	LQ 2015	LQ 2020	LQ 2025
3252	Resin; synthetic rubber; and artificial synthetic fibers and filaments manufacturing	21.16	21.12	21.51
3261	Plastics product manufacturing	17.85	16.03	16.27
3212	Veneer; plywood; and engineered wood product manufacturing	9.64	11.02	11.44
3322	Cutlery and handtool manufacturing	8.93	9.92	10.46
3262	Rubber product manufacturing	8.57	8.46	8.57
3333	Commercial and service industry machinery manufacturing	7.45	6.85	7.01
3371	Household and institutional furniture and kitchen cabinet manufacturing	6.70	6.67	7.01
3334	Ventilation; heating; air-conditioning; and commercial refrigeration equipment manufacturing	6.37	6.43	6.51
3259	Other chemical product and preparation manufacturing	6.60	6.37	6.63
3169	Other leather and allied product manufacturing	4.69	5.88	5.96

The primary industries in which Geauga County specializes include Chemical Manufacturing, Plastics and Rubber Manufacturing, and Machinery Manufacturing.

Resin, synthetic rubber and fiber, and filaments manufacturing make up the most specialized area of Geauga county's economy.

There are 21 times more jobs in resin, synthetic rubber and fiber, and filaments manufacturing in Geauga County, than would be expected if the county's employment pattern was identical to the nation's.

Over the next 5 years, the county is projected to become even more specialized in resin, synthetic rubber and fiber, and filaments manufacturing, plastics product manufacturing, and veneer, plywood, and engineered wood product manufacturing.

ECONOMIC DEVELOPMENT

Specialized Industry Clusters

Regional Specialization

Regional economies are made up of two types of clusters, each with different patterns of geographic presence and different competitive dynamics.

- **Traded clusters** are groups of related industries that serve markets beyond the region in which they are located. They are free to choose their location of operation (unless the location of natural resources drives where they can be) and are highly concentrated in a few regions, tending to only appear in regions that afford specific competitive advantages. Since traded clusters compete in cross-regional markets, they are exposed to competition from other regions. Examples of traded clusters include Financial Services in New York City, Information Technology in Silicon Valley, and Video Production and Distribution in Los Angeles. Traded clusters are the "engines" of regional economies; without strong traded clusters it is virtually impossible for a region to reach high levels of overall economic performance.
- **Local clusters**, in contrast, consist of industries that serve the local market. They are prevalent in every region of the country, regardless of the competitive advantages of a particular location. As a result, a region's employment in local clusters is usually proportional to the population of that region. Moreover, the majority of a region's employment comes from jobs in local clusters. Since local clusters are tied to the regions in which they are located, they are not directly exposed to competition from other regions. Examples include Local Entertainment such as video rental services and movie theaters, Local Health Services such as drug stores and hospitals, and Local Commercial Services such as drycleaners.

While local clusters account for most of the employment and employment growth in regional economies, traded clusters register higher wages, and much higher levels of innovation. Local clusters provide necessary services for the traded clusters in a region, and both are needed to support a healthy and prosperous regional economy.

Geauga County has five traded industries:

- 1. Plastics
- 2. Furniture
- 3. Vulcanized Materials
- 4. Metalworking
- 5. Downstream Chemicals

ECONOMIC DEVELOPMENT

Economic Impacts

Hypothetical Redevelopment Scenario

A hypothetical redevelopment scenario - a 100,000 square foot industrial building - was analyzed using IMPLAN software to estimate the overall economic impact to Geauga County. The results of the analysis are summarized on the pages that follow. Definitions of key terms are included below.

Measures of Economic Impact

Direct Effect: The set of expenditures applied to the predictive model (i.e., I/O multipliers) for impact analysis. It is a series (or single) of production changes or expenditures made by producers/consumers as a result of an activity or policy.

Indirect Effect: The impact of local industries buying goods and services from other local industries. The cycle of spending works its way backward through the supply chain until all money leaks from the local economy, either through imports or by payments to value added.

Induced Effect: The response by an economy to an initial change (direct effect) that occurs through re-spending of income received by a component of value added. IMPLAN's default multiplier recognizes that labor income (employee compensation and proprietor income components of value added) is not a leakage to the regional economy.

Value Added: The difference between an industry's or an establishment's total output and the cost of its intermediate inputs. It equals gross output (sales or receipts and other operating income, plus inventory change) minus intermediate inputs (consumption of goods and services purchased from other industries or imported). Value added consists of compensation of employees, taxes on production and imports less subsidies (formerly indirect business taxes and nontax payments), and gross operating surplus (formerly other value added).

Output: Output represents the value of industry production. In IMPLAN these are annual production estimates for the year of the data set and are in producer prices. For manufacturers this would be sales plus/minus change in inventory. For service sectors production = sales. For Retail and wholesale trade, output = gross margin and not gross sales.

Planning Commission Initiatives

In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize county goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to the following economic development initiatives:

- Intergovernmental Cooperation: Planning Commission may consider serving as a technical advisory resource for local governments seeking assistance on potential cooperative development agreements and multi-jurisdiction corridor/area plans, including the development of a county CEDS (Comprehensive Economic Development Strategy), as recommended in the Geauga County Strategic Plan for Economic Development.
- **Inventory of Available Development Sites:** Planning Commission may consider working with the Department of Community and Economic Development to develop an interactive GIS map of available commercial/industrial properties for use by prospective developers and site selectors.
- Industrial Park Directory: The Planning Commission should work with the County Department
 of Development on various analysis and mapping projects such as the Industrial Park Directory
 and others as needed.

ECONOMIC DEVELOPMENT

Potential Tools & Strategies

Below is an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals:

Business Retention & Expansion

• The County should consider a formal Business Retention & Expansion program that conducts regular visits to local businesses to better understand their current and future needs.

Strategic Development Areas

• County leadership should further explore partnerships with Geauga University Hospitals at the expanding County office campus to energize the current footprint into a "health care hub" which will be further enhanced by the future relocation of County offices to this location.

Financial Incentives & Innovative Financing

- The County may consider offering financial incentives for private investment in new, rehabilitated, and expanded commercial/light industrial properties that result in long-term increases in property values, job growth, sales activity, and tax revenue.
- The County should explore innovative financing mechanisms for strategic infrastructure investments such as Tax Increment Financing (TIF).

Marketing & Promotion

• The County should consider updating and modernizing its website as part of a branding effort.

Collaboration

• The Planning Commission and County Department of Development should maintain regular contact with Geauga Growth Partnership, NOACA, Rotaries, Kiwanis, etc. so each entity may stay informed of various activities, initiatives, programs, etc. that could be of mutual benefit and to support opportunities to collaborate.

Goals

The broad goals identified below are intended to serve as an overarching policy framework for the General Plan. The County, its various departments, political subdivisions, and other partners may all play a role in realizing these goals.

Public Schools	The County and local governments should collaborate with local school districts to ensure that future development results in positive fiscal impacts to the schools which are funded through property tax revenue and, in the case of Berkshire Local Schools, income tax revenue. In particular, commercial/industrial properties are highly desirable from a school district standpoint as they increase the property/income tax base without increasing the student population.
Higher Education	The County should encourage partnerships between secondary and higher learning institutions and the County's major employers to help create a workforce pipeline for the jobs of tomorrow that encourages future generations to work and live in the County.
Parks & Recreation	Geauga County has a tremendous number of public parks, nature preserves, and wildlife areas. Efforts should be made to support the Geauga Park District and local government efforts to expand recreational opportunities and public access to these properties, with an emphasis on enhancing trail access.

Schools

Geauga County is home to five public school districts:

- Berkshire Local Schools (Burton and Thompson area)
- Cardinal Local Schools (Middlefield area)
- Chardon Local Schools
- Kenston Local Schools (Bainbridge area)
- West Geauga Local Schools (Chesterland area)

Chagrin Falls Exempted Village School District in Cuyahoga County serves the Village of South Russel and small portions of Bainbridge and Russel Townships. In addition, several other public school districts in neighboring counties serve small areas of Geauga County.

Four of the County's public school districts participate in the Auburn Career Center joint vocational school in neighboring Lake County.

Geauga County is home to nine private primary and secondary schools. Notre Dame Cathedral Latin, Hawken School, and Laurel School - Butler Campus are among those that feature college preparatory curriculum.

Geauga County is home to one institute of higher learning, Kent State University - Geauga, located in Burton.

School Enrollment

In general, public school enrollment is down across Geauga County from 2010. In 2010, there were 11,750 students enrolled in the six major school districts (Berkshire, Cardinal, Chardon, Kenston, Newbury, West Geauga). In 2019 total enrollment was 9,746, a roughly 20 percent drop over the ten year period. Only the Berkshire Local School District saw a slight increase in its student population over the last ten years. (Note: 2019 Enrollment data was tallied before the COVID-19 Pandemic)

The Kent State University Geauga Campus

The Kent State University Geauga Campus is centrally located on eighty-seven acres of land in the approximate geographic center of Geauga County. Founded in 1964 and located in Burton, Ohio, it is thirty miles east of Cleveland, 25 miles north of Warren, and about 40 miles northeast of Kent. The Geauga Campus is the only institution of higher education in the third wealthiest county in Ohio.

Kent State University Geauga and Twinsburg Academic Center is committed to helping employers respond to the training and lifelong learning needs of Northeast Ohio. Their wide

variety of non-credit continuing-education programs are designed to help develop a premier workforce in our region.

COMMUNITY FACILITIES

Home Schooling

Homeschooling has changed drastically over the last 40 years. Laws have been amended, resources are more readily available, and attitudes around homeschooling have changed. As of 2019, over 32,000 children within Ohio were receiving a home school education. That number has been on the rise consistently over the past decade, up from roughly 23,000 in 2010.

The change in laws, attitudes, and available resources has not only contributed to the rise in homeschooling but also enhanced its credibility as a viable education option. The National Home Education Research Institute reported that homeschooled students score above average on both the SAT and ACT. These students have consistently scored higher on standardized tests than their public-school counterparts. Studies by the NHERI have shown evidence that homeschooled children's social, emotional, and psychological development is above average, as well.

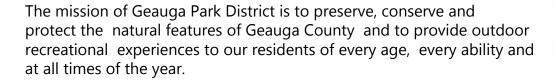

As of September, 2021 there are currently 736 students being homeschooled within Geauga County (Source: Ohio Department of Education).

COMMUNITY FACILITIES

Geauga County Park District

The quality of life in Geauga County is directly linked to its citizens' commitment to protecting natural resources. Geauga Park District is dedicated to the protection and conservation of the county's natural areas, which provide abundant opportunities for people to connect with the natural world.

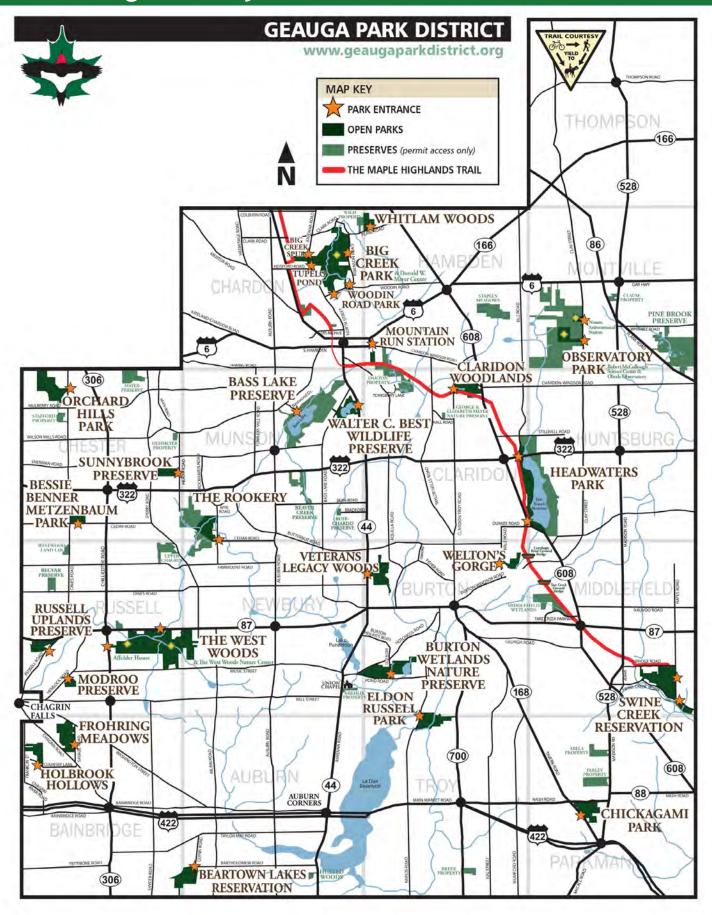

Each of the 25 open parks and preserves highlight unique features of Geauga County, with a large network of trails that are available for activities such as hiking, bicycling, cross-country skiing or horseback riding. The Park District offers numerous public programs and special events of all kinds are held regularly throughout the parks throughout the year. A map of all park district parks and preserves is on the following page.

The Maple Highlands Trail stretches more than 20 miles across Geauga County, from Chardon Township south to Middlefield Township. A ride or walk on this great paved trail will give you a taste of everything the Geauga County Park District has to offer, from returning migratory birds to growing numbers of buds and blossoms to warmer weather more suitable for recreation. The trail can be accessed from several parks – Claridon Woodlands, Headwaters Park, Swine Creek Reservation, Mountain Run Station – as well as several other inlets along the way.

COMMUNITY FACILITIES

Punderson State Park

The landscape surrounding Punderson State Park features evidence of the last glacier to scrape across Ohio. A natural kettle lake, Punderson Lake is the largest and deepest of its kind in Ohio. The lake provides a perfect destination for paddling, fishing, and relaxing along its lovely shoreline. Other outdoor pursuits include camping, hiking, and golfing (both traditional and disc golf).

Another one-of-a-kind feature is the stately English Tudor manor home, which took nearly 20 years to build. The enchanting lodge features charming guest rooms, modern conference space, and lakeside dining. Families will enjoy spending their vacation in one of the updated rustic two-bedroom cabins available year-round.

Holden Arboretum

Though the majority of the Arboretum is located just over the Lake County border, a portion of the Arboretum sits within Geauga County as well as large amounts of land preserved by the Arboretum within Chardon Township.

The Arboretum is a regional asset and is the 12th largest public garden in the country,

Holden Forests & Gardens has close to 15,000 member households and an annual attendance of over 350,000 for whom we strive to provide inspirational and educational visitor experiences.

Century Village

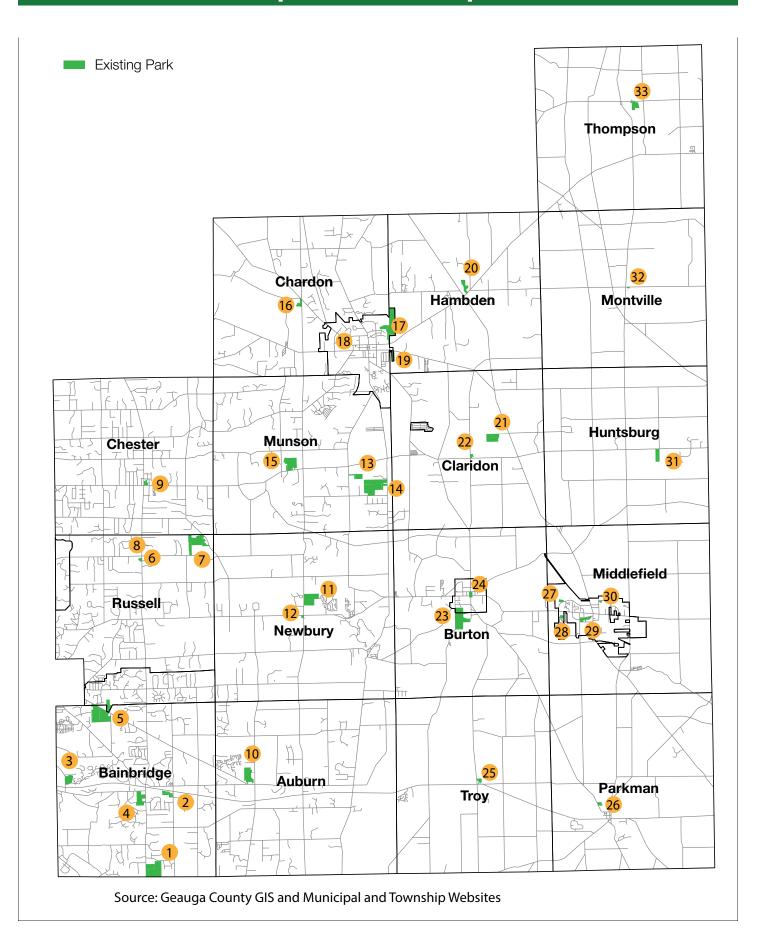

The Century Village Museum, located in Burton, Ohio is an authentic representation of a Western Reserve Village from 1798 to the end of the 19th century. The Museum contains over twenty historically authentic buildings, more than 15,000 museum artifacts, and a working farm with a sugar bush for making maple syrup. Century Village Museum provides guided tours, offers educational programs, and hosts numerous festivals and special events each year.

Law Enforcement

Geauga County Sheriff

The Geauga County Sheriff is assigned many responsibilities under the Ohio Revised Code. Most of these responsibilities primarily fall into one of five categories. The first responsibility the Sheriff has is to run the County Jail. He is responsible for security, housing and care for the inmates awaiting trial or serving a jail sentence imposed by the Courts. Geauga County has a new 182 bed facility with state of the art security systems.

The second is to run the County Dispatch system. The Geauga County Sheriff's Office dispatches or handles radio and telephone duties for eleven law enforcement agencies and thirteen fire and rescue companies. The Dispatch Center handles nearly 8,000 incoming phone calls per month

Third is to serve the courts by providing security, delivering writs or papers of the court, and the service of warrants. Deputies handle prisoner transports to and from penal institutions, serve arrest warrants throughout the United States and perform court ordered sales of property. They assist the courts with jury duty notices, summons and subpoenas.

The fourth responsibility is record keeping. The Sheriff's Office generates a lot of records or documents and maintaining them, filing them, and retrieving them is vitally important. Records have to be shared regularly with courts, other law enforcement agencies, prosecutors, insurance companies, the public and others.

The final responsibility is to provide law enforcement services in the County. Deputies can also be called upon to assist other Sheriffs in other counties during emergencies.

In Geauga County, the Sheriff's Office is the largest law enforcement agency in the county.

Mission: The Geauga County Sheriff's Office is a dedicated group of professionals who are committed to working with the community to make Geauga County a safe and desirable place to live, work or visit. Our mission is to partner with the community to solve problems and improve public safety in a manner that is fair, impartial, transparent, and consistent.

COMMUNITY FACILITIES

Local Police Departments

In addition to the Geauga County Sheriff, the following political subdivisions have their own local police departments:

- Bainbridge Police Department
- Burton Village Police Department
- · City of Chardon Police Department
- Chester Township Police Department
- Hunting Valley Village Police Department
- Middlefield Village Police Department
- Russell Township Police Department
- South Russell Village Police Department
- Thompson Police Department

Fire and Rescue Services

Volunteer members within each community generally provide fire department and rescue services:

- Auburn Fire Department
- Bainbridge Fire Department
- Burton Volunteer Fire Department
- City of Chardon Fire Department
- Chester Township Fire Department
- Hambden Fire Department
- Hunting Valley Village Fire Department
- Middlefield Village Fire Department
- Montville Township Fire Department
- Munson Fire Department
- Newbury Township Fire Department

- Troy Township Fire Department

COMMUNITY FACILITIES

Merritt Road Area Campus

There are several County facilities on Merritt Road and Ravenwood Drive including the County Sheriff's Office, Department of Emergency Services, County Engineer, Human Services Department, Department on Aging, and Dog Warden. The Geauga County Public Library Administrative Center Branch is also located at this campus.

A new County Administrative Building will be completed at the site in 2022.

Geauga-Trumbull Solid Waste Management

State law requires each Ohio County to establish or join other counties to form a solid waste management district. Geauga and Trumbull Counties formed the Geauga-Trumbull Solid Waste Management District (District) in 1993.

The District is responsible for implementing a solid waste plan designed to achieve goals determined by the Ohio EPA for waste reduction, recycling, and reducing reliance on landfills. Funding for our District is received through a contract fee with landfills and transfer stations that agree to accept solid waste from the counties of Geauga and Trumbull. These fees are then used to provide programs and services to residents that include household hazardous waste collection, scrap tire collection, appliance recycling, and recycling drop-off sites.

Geauga-Trumbull Solid Waste Management has decreased the number of recycling drop-off locations throughout the County but a comprehensive location is planned for the Merritt Road area in Claridon Township.

COMMUNITY FACILITIES

Planning Commission Initiatives

In accordance with powers granted to it by ORC 713.23, the Planning Commission may prepare studies and reports on priorities and policies to realize county goals. As a follow-up to aid in the implementation of the General Plan, the Planning Commission may decide to dedicate staff time and resources to the following community facility initiatives:

- Workforce Development: Planning Commission may consider working with the Department
 of Community and Economic Development and local secondary and higher education partners
 to track the latest available local employment data, school enrollment figures, and educational
 attainment levels to identify where potential jobs skills and education gaps may exist in the local
 workforce so that future training and education programs can help address these needs.
- Community Facilities Funding List: Planning Commission may consider working with the Geauga County Department of Development to create a comprehensive list of grants and loans available for park and other community facility projects.
- Public Officials Directory: Planning Commission may consider expanding upon the Geauga
 County Directory of Public Officials to provide additional detail as to the services each
 department/agency provides to the residents of Geauga County as a comprehensive, one-stop
 information resource.

COMMUNITY FACILITIES

Potential Tools & Strategies

Below is an outline of potential tools and strategies that the County, and its departments, local governments, and other partners may reference to aid in achieving the County's goals:

Partnerships with Schools

• The County and its local partners should continue to maintain an active dialogue with local school districts to capitalize on the potential to integrate community facilities and programming into underutilized and/or vacant facilities.

Higher Education Workforce Pipeline Programs

The County should explore the potential to build upon established partnerships with Kent State
University Geauga Campus such as the nursing internship program which serves as a workforce
pipeline for many healthcare organizations throughout the region and encourages future
generations to work and live in the County.

Parks & Recreation Enhancements

- The County and its local partners should continue to work with government funding agencies (e.g. ODNR) to leverage outside funding assistance for recreational enhancement projects.
- The Planning Commission may consider working with local townships to create a master inventory of all township park amenities (baseball fields, pavilions, miles of trails, etc.) to assist with assessing the condition of the existing facilities, analyze the potential need for additional amenities, or determine no additional facilities are warranted.

Recreational & Ecotourism

 Geauga County is home to numerous active and passive recreational amenities including LaDue Reservoir, the Cuyahoga River Water Trail, the Maple Highlands Trail, multiple state public hunting and wildlife areas, and numerous parks. Coordination between the Department of Community and Economic Development and Destination Geauga should continue as part of County marketing and promotion efforts to attract visitors and increased discretionary spending in the County.

Glossary

American Community Survey (ACS) – The American Community Survey (ACS) is an ongoing survey by the U.S. Census Bureau. It regularly gathers information previously contained only in the long form of the decennial census, such as ancestry, citizenship, educational attainment, income, language proficiency, migration, disability, employment, and housing characteristics. These data are used by many public-sector, private-sector, and not-for-profit stakeholders to allocate funding, track shifting demographics, plan for emergencies, and learn about local communities.

Arterial - A roadway that provides intra-community travel and access to the countywide highway system. Access to community arterials should be provided at collector roads and local streets, but direct access from parcels to existing arterials is common.

Broadband - The transmission of wide bandwidth data over a high speed internet connection. According to the FCC, the definition of broadband internet is a minimum of 25 Mbps download and 3 Mbps upload speeds. Broadband provides high speed internet access via multiple types of technologies including fiber optics, wireless, cable, DSL and satellite.

Collectors - Major and minor roads that connect local roads and streets with arterials. Collectors provide less mobility than arterials at lower speeds and for shorter distances. They balance mobility with land access.

Community Reinvestment Area (CRA) – Community Reinvestment Areas are areas of land designated within a City in which property owners can receive tax incentives for investing in real property improvements. The CRA program is a direct incentive tax exemption program benefiting property owners who renovate existing or construct new buildings.

Current Agricultural Use Value (CAUV) - For property tax purposes, farmland devoted exclusively to commercial agriculture may be valued according to its current use rather than at its "highest and best" potential use. This provision of Ohio law permits values to be set well below true market values, which normally results in a substantially lower tax bill for working farmers.

Federal Communications Commission (FCC) - Federal agency that regulates interstate and international communications by radio, television, wire, satellite, and cable in all 50 states, the District of Columbia and U.S. territories. An independent U.S. government agency overseen by Congress, the Commission is the federal agency responsible for implementing and enforcing America's communications law and regulations.

Highway Functional Classification - System used to determine which roads, streets and highways are eligible for federal transportation funds. It is used to establish design criteria for various roadway features, and also serves as a management tool to measure a route's importance in project selection and program management

Joint Economic Development District (JEDD) – A Joint Economic Development District (JEDD) is an arrangement where one or more municipalities and a township agree to work together to develop township land for commercial or industrial purposes. One benefit to the municipality is that they receive a portion of the taxes levied in the JEDD without annexation. The revenue split between the municipality and township is negotiated through the JEDD agreement.

Glossary

Local Roads - Roads not classified as arterials or collectors that provide limited mobility and are the primary access to residential areas, businesses, farms, and other local areas.

Metropolitan Planning Organization (MPO) - A Metropolitan Planning Organization (MPO) is the policy board of an organization created and designated to carry out the metropolitan transportation planning process. MPOs are required to represent localities in all urbanized areas (UZAs) with populations over 50,000, as determined by the U.S. Census.

Northeast Ohio Areawide Coordinating Agency (NOACA) - The Northeast Ohio Areawide Coordinating Agency (NOACA) is the transportation and environmental planning agency that represents state, county, city, village, and township officials in Greater Cleveland. NOACA addresses the transportation, air quality, and water quality needs of Cuyahoga, Geauga, Lake, Lorain and Medina counties. NOACA has also been designated as an Areawide Water Quality Management Agency by the Governor of Ohio under section 208 of the federal Clean Water Act to perform areawide planning.

Overlay District - A zone or district created for the purpose of conserving natural resources or promoting certain types of development. Overlay zones are imposed over existing zoning districts and contain provisions that are applicable in addition to those contained in the zoning law.

Planned Unit Development - An overlay zoning district that permits land developments on several parcels to be planned as single units and to contain both residential dwellings and commercial uses. It is usually available to landowners as a mixed-use option to single uses permitted as-of-right by the zoning ordinance.

Prime Agricultural Soils - Soils that have the appropriate quality, moisture supply, and attendant growing season to produce a high crop yield when treated and managed in accordance with modern farm methods. Generally, prime agricultural soils will be more productive under intense cultivation than other soil types using similar management practices.

Subdivision - The subdivision of land involves the legal division of a parcel into a number of lots for the purpose of development and sale. The subdivision and development of individual parcels must conform to the provisions of local zoning which contain use and dimensional requirements for land development.

Urbanized Area - An urbanized area is designated by the U.S. Census Bureau with each census update. To be considered urbanized an area must have at least 50,000 people living in an area.

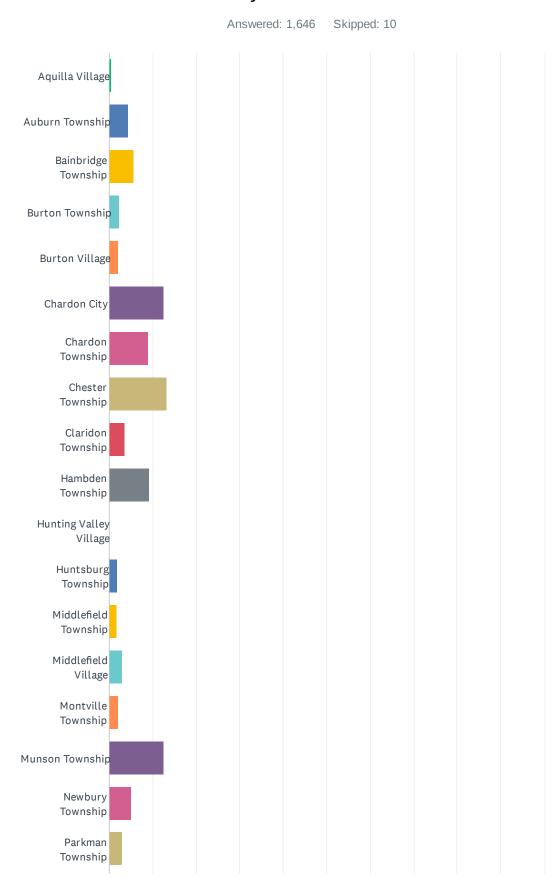

Watershed - A geographical area within which rainwater and other liquid effluents seep and run into common surface or subsurface water bodies such as streams, rivers, lakes, or aquifers.

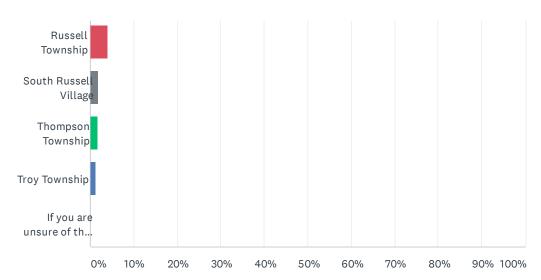

Wetlands - A geographical area within which rainwater and other liquid effluents seep and run into common surface or subsurface water bodies such as streams, rivers, lakes, or aquifers.

Zoning District - A part of the community designated by the local zoning law for certain kinds of land uses, such as for single-family homes on lots no smaller than one acre or for neighborhood commercial uses. Only these primary permitted land uses, their accessory uses, and any special uses permitted in the zoning district may be placed on the land in that part of the community.

37	I'm a single parent with a college-aged student and a recent grad who will likely be moving back from MA temporarily. So I assume that means I am a "multiple occupants" unmarried, but	6/22/2020 11:32 AM

that seems vague. Not sure what you're trying to capture - an unmarried couple with children, single parent with children, unmarried couple with no children, elderly married couple living with a child, and platonic roommates all would be "multiple occupants - unmarried."

8	All squares that used to provide amenities for locals. People shouldn't have to truck to Walmart. Especially Chardon Square and Washington and parts of Park Ave. I hate seeing woods cleared and strip malls built on the westside of Chardon (= sprawl) while these areas around the square sit under-used and uninteresting. Many store fronts in existing strip malls sit un-used for extended times and their giant parking lots are all more than is needed by farm. Why allow new commercial to be built only to have them (old and new) sit vacant!? Crazy.	8/6/2020 10:39 AM

We (residents) have a majority of medical needs in Mayfield Hts. or a location that can be accessed from 1-271. Stores and restaurants are north into Mentor where there's also access to I-90.	7/2/2020 11:18 AM

430	SR528 from just South of SR322 to US422 is a dream drive. Smooth, wide, and very few if any dangerous intersections. You're always gone have accidents though. Maybe a startled horse pulls a buggy into the road or a fast-moving semi drafts a little Amish boy off the side and onto the highway. You still need to let off the gas pedal and pass by them cautiously. I have a concern which is why do they not pay taxes to help support these projects?	7/2/2020 11:18 AM

27	Thus is a rural county. Keep the government out of my business. If people want the grass police, they can live in an HOA or move to Solon.	7/30/2020 10:14 PM
28	Most homes and properties are well cared for. Whoever thought up these questions is trying to develop Geauga County into another Cuyahoga County	7/30/2020 8:34 PM
29	There seems to be appropriate zoning to prevent complete trash zones in yards but allows people to use the freedom of living in the country. Not everyone is as neat as we want them to be; as long as there is some zoning to ensure nothing gets out of control; no junk trailer homes, abundance of junk cars, abundant trash, etc. I think if you want to live in Geauga but want the Chagrin Falls feel, then live in a development with those rules.	7/30/2020 9:15 AM
30	Very worried about our town. My property values are decreasing and I'm discouraged with the bligh	7/30/2020 9:05 AM

31	Overall people do a great job and the individualism adds to the appeal.	7/30/2020 7:17 AM
32	Most areas are maintained so nicely but there are some that could use assistance in basic spiffing up. And it concerns me how many places are abandoned in the countryside when they should be reused/adapted. "The greenest building is the one that is already built" (Carl Elefante) and that has been supported by studies from the National Trust for Historic Preservation. We need to educate local populations on the affordability and sustainability of reusing and adapting structures we have and limit the "new builds" to help stall climate change.	7/30/2020 5:48 AM

78	Coming from Cuyahoga County, I appreciate residents having the ability to maintain their property as they see fit. Rarely do I see mismanaged property. Those that desire a lot of property, historic homes, etc. tend to desire to care for them.	7/22/2020 2:52 PM
79	poorly kept homes bringing down property values	7/22/2020 12:52 PM
80	Not concerned with the exception of septic systems and way too much mowed lawns. Water quality is crucial for all residents, to the point that the County should help home owners with the cost of maintaining septic systems to assure that properly scheduled maintenance is happening. Residents could be educated about the benefits of incorporating plants like white clover into mowed lawns and of planting native trees, shrubs and wildflowers. See Doug Tallamy's new book, Homegrown National Park.	7/22/2020 12:39 PM

63	Many need clean up painted	7/18/2020 6:01 PM
64	Some places in Middlefield look like junk yards.	7/17/2020 7:04 PM
65	Townships / villages should have common architectural (appearance) rules	7/16/2020 8:33 PM
66	Some of the industrial areas could use nicer signs/exteriors could use sprucing up	7/16/2020 2:09 PM
67	I am more concerned about natural areas being replaced with commercial than I am with current appearances.	7/16/2020 8:52 AM

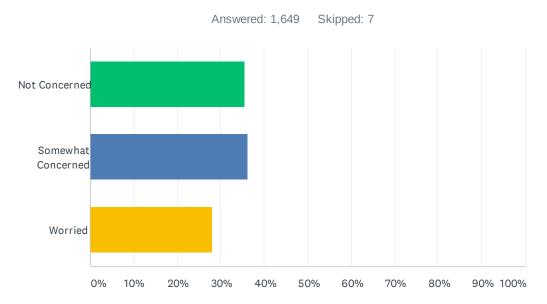

68	Empty buildings does not had a wall. Clad a faw were bull dozed, but need to do mare	7/16/2020 7:14 AM
	Empty buildings does not bode well. Glad a few were bull dozed, but need to do more.	
69	if commerce were more prosperous, the poor appearance of many of our commercial properties would take care of itself	7/15/2020 10:11 PM
70	Commercial areas on rt 87 in Newbury and Middlefield	7/15/2020 9:24 PM
71	Depends on who they are run by	7/15/2020 5:31 PM
72	It's a free country. Let business owners run their commercial properties how they want. Generally they are clean, but I don't care about a sloppy looking business. I can shop elsewhere if I dislike it.	7/15/2020 9:56 AM
73	It's a free country. Let business owners run their commercial properties how they want. Generally they are clean, but I don't care about a sloppy looking business. I can shop elsewhere if I dislike it.	7/15/2020 9:48 AM

80	Along 87 is somewhat trashy	7/14/2020 5:26 PM
81	There are several businesses that are well below par. As a business owner in Chardon, the city was very strict on landscape and overall appearance. Several other business neglect the property and things as simple as pulling weeds	7/14/2020 11:08 AM
82	too much commercial	7/14/2020 5:16 AM
83	There are some closed up areas that need to be fixed up.	7/13/2020 8:22 PM
84	Quite a few through Newbury look very unkempt from the street. Honestly, planting more native wildflowers and milkweed to support wildlife would look better than half-a\$\$ed efforts at landscaping.	7/13/2020 5:33 PM
85	empty storefronts	7/13/2020 1:15 PM

92	Landscaping needs maintained	7/13/2020 10:01 AM
93	Most do a good job	7/13/2020 9:57 AM
94	- Vacant Bldg at Hambden Corners where Rt 6 and 166 intersect. Appears for sale but very dilapidated. There also appears to be an old brick motel structure on Center Street, across from Mentor Hardware that is in questionable condition.	7/13/2020 8:40 AM
95	The industrial area of Chardon, disgusting. Waiting ting for the buildings to fall down	7/12/2020 2:05 PM
96	There seems to be no master plantoo many vacancies while other new structures go up	7/12/2020 10:23 AM
97	some properties could better screen themselves	7/11/2020 2:09 PM
98	With all the empty businesses something needs done when their lots & buildings look terrible	7/11/2020 8:58 AM

99	some architectural continuity in Chesterland would be extremely helpful. same with the Newbury rt 87 corridor	7/10/2020 10:30 AM
100	This is a rural area. Too much build up will lose that rural quality.	7/9/2020 11:28 PM
101	Too much junk and trash in their yard areas	7/9/2020 11:35 AM

105	Empty buildings near Target, Geauga Lake looks terrible	7/8/2020 9:27 AM
106	most seem to be OK	7/7/2020 9:35 AM
107	Chester	7/6/2020 11:58 AM
108	Same	7/5/2020 9:53 PM
109	Very uneven care of many places	7/5/2020 9:05 PM
110	Same as homes. It's very important to keep the natural ares surrounding the business	7/5/2020 12:09 PM
111	Most part they are fine but if you have the money to own a business out here then you should have the money to maintain the land and parking lots	7/4/2020 11:04 AM
112	Some areas dont care	7/3/2020 8:37 PM
113	Once again no standardization	7/2/2020 9:21 PM
114	The property across the street is an eye sore, but I don't want to see more apartments either.	7/2/2020 8:52 PM
115	Chester Twp has an over abundance of commercial properties, more than half have never been filled. Yet, they allow more of those and don't allow for living arrangements for their residents. Chester Twp is NOT zoned for my protection. That department is a farce and occupied by residents who have no plan on accepting change.	7/2/2020 11:18 AM
116	Businesses do a nice job keeping area clean, landscaped, and lots well paved.	6/30/2020 4:16 PM
117	Businesses do a nice job with landscape and respectable signage.	6/30/2020 3:22 PM
118	no common architectural theme in the Chester Township area, it's a hodge podge of old and new properties	6/30/2020 1:08 PM

120	Vacant properties need upkeep	6/29/2020 9:09 PM
121	Except for the dumps affecting residential areas. New unresponsible land owners.	6/29/2020 6:42 PM
122	Some properties look rough.	6/29/2020 11:28 AM
123	Some older businesses are unsightly but probably can't afford improvements	6/28/2020 8:09 PM
124	many commercial areas are just plain ugly. back alley of chardon square for one.	6/27/2020 2:20 PM
125	As above, especially the older historic looking ones	6/27/2020 8:41 AM
126	don't notice it being a problem	6/26/2020 10:39 PM
127	See answer to #30	6/26/2020 3:20 PM
128	A city of fountains is such an eyesore, not sure what can be done with that.	6/25/2020 3:32 PM
129	Other's property appearance is not my or the government's business.	6/25/2020 11:51 AM
130	Operator to maintain curb appeal	6/24/2020 9:25 PM
131	Most businesses are well-kept	6/24/2020 8:58 PM
132	Circle K needs to move forth with their construction to improve appearance at 306 and 87	6/24/2020 2:30 PM

133		6/24/2020 8:45 AM
134	More planting of trees and removal of invasive plants	6/23/2020 4:46 PM
135	Same as above.	6/23/2020 1:42 PM
136	Middlefield townshipno zoning	6/23/2020 1:28 PM
137	most are kept up well enough for their business, some could use a fence or a berm or trees on the road side	6/23/2020 12:23 PM
138	Chesterland commercial area is ugly and needs some zoning requirements.	6/23/2020 12:12 PM
139	What do I have to do with someone else's private property? What does the county (government) have to do with someone else's private property?	6/23/2020 9:12 AM
140	Sone are trashy looking	6/23/2020 7:15 AM
141	Vacant properties are not maintained and look terrible.	6/22/2020 10:49 PM
142	with everything closeing i hope the building dont get neglected	6/22/2020 7:31 PM
143	Abandoned commercial properties are eyesores, safety hazards, and bring down property values.	6/22/2020 7:09 PM
144	Take down abandened buildings.	6/22/2020 7:08 PM
145	upkeep is important. no need for eyesores	6/22/2020 4:46 PM
146	Businesses that have been vacant for many years and become eyesores should be cleaned up.	6/22/2020 4:44 PM
147	Too monoculture and usage of lawn equipment too often.	6/22/2020 4:31 PM
148	There are a few areas that are getting rundown SR 87 E of 528, 608 N of Tare Parkway, 87 W of Auburn, etc	6/22/2020 3:43 PM
149	Need updating	6/22/2020 3:36 PM
150	Again, not all businesses maintain their properties.	6/22/2020 1:17 PM
151	Parkman commercial properties are unplanned, unkempt, and detract from the town	6/22/2020 1:14 PM
152	Commercial/industrial owners are an important part of our community as they provide jobs. Just like residential properties, it is very expensive for commercial owners to make improvements, such as an updated facade, sign, landscaping, or parking lot. Owners should be contacted to educate them on local, state or federal funding sources.	6/22/2020 12:54 PM
153	Deserted properties	6/22/2020 12:19 PM
154	Stricter rules need to be maintained in the rural areas regarding aesthetics of the businesses	6/22/2020 10:35 AM
155	some owners are notorious for not taking care of property - vacant lot at Tanglewood Square	6/22/2020 10:14 AM
156	Only concerned when the property is vacated	6/22/2020 9:36 AM
157	Some are dumps. Especially in Middlefield, and some in Chardon. Bad for the county.	6/21/2020 9:22 PM
158	We have a lot of closed commercial buildings. Just sitting there like to see businesses in them	6/21/2020 5:48 PM
159	If they are not occupied, either tear down or utilize for other businesses	6/21/2020 9:14 AM
160	Unused commercial spaces sitting empty	6/20/2020 9:09 PM
161	Some commercial property looks run down	6/20/2020 6:40 PM
162	There is no coherent plan to the haphazard appearance of the commercial areas like f Cheaterland	6/20/2020 7:19 AM
163	In particular the empty building on the corner of GAR Highway directly in front Speedway in Hambden. It makes the entire are look like trash. Many if not all of the commercial buildings	6/19/2020 4:35 PM
	could really use a landscape clean up as well	

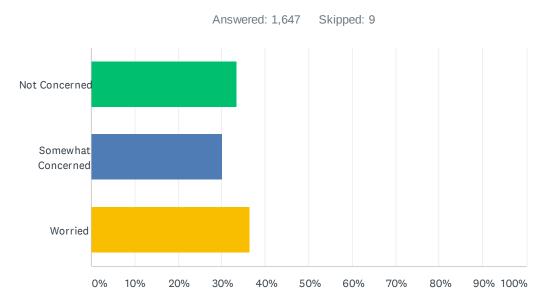

165	There are several industrial sites that are worrisome	6/19/2020 3:29 PM
166	Older business signage can look rundown or kind of seedy	6/19/2020 12:09 PM
167	most of the business areas look great	6/19/2020 12:04 PM
168	Some older, established businesses may need some improvement with fencing and yard maintenance as well as building maintenance	6/19/2020 10:30 AM
169	Hit or miss. Some places are great others not so much.	6/19/2020 9:34 AM
170	The only unsightly views are the ugly utility poles and dangling wires/loops hanging off them.	6/19/2020 9:30 AM
171	Again they sit vacant and then deteriorate	6/19/2020 9:18 AM
172	Commercial properties should adhere to a basic maintenance code, i.e. roofs, painting/siding, etc.	6/19/2020 8:52 AM
173	Most businesses upkeep with out problem	6/19/2020 8:45 AM
174	N/A	6/19/2020 8:40 AM
175	There are a few areas that could be improved, but most are well kept	6/19/2020 8:31 AM
176	Need to have more uniform zoning regulations. Just looks like a free for all.	6/19/2020 8:24 AM
177	Some of the industrial properties can use a facelift such as Chardon Rubber	6/19/2020 8:23 AM
178	The commercial properties have a lot of litter and trash lying around them. Driving past Home Depot and Walmart, the fields behind and in front of these businesses are covered in litter. Then the field gets mowed and they just run over the trash like it's nothing. It looks awful, not to mention the environmental impact of these larger businesses not being held accountable.	6/19/2020 8:16 AM
179	The individuals again are responsible. And they buildings are fine	6/19/2020 8:13 AM
180	Some could use some help	6/19/2020 7:55 AM
181	Most kept reasonable	6/19/2020 7:34 AM
182	mostly okay with a few exceptions	6/19/2020 6:42 AM
183	Also, most are well kept	6/18/2020 11:34 PM
184	Old and too many abandoned strip malls	6/18/2020 10:24 PM
185	It concerns me that the offices located in chardon square are stealing beautiful architecture when we could be enjoying those buildings in other ways.	6/18/2020 8:44 PM
186	I wish there was more master plan for commercial areas. They could be much more cohesive. Right now it seems everyone for themselves. Setting a vision makes things seem more inviting and united. Thinking downtown areas such as Hudson or Chagrin Falls.	6/18/2020 8:06 PM
187	Many empty large buildings/properties that have been for sale for years are looking pretty shabby.	6/18/2020 7:49 PM
188	A lot of vacant properties on Chardon Square that have been for lease for over 4 years.	6/18/2020 7:47 PM
189	More than a few are rather cluttered	6/18/2020 5:52 PM
190	There are some shabby businesses	6/18/2020 4:59 PM
191	n/a	6/18/2020 4:57 PM
192	Again we have a lot of vacant buildings, it does give us the impression the city is struggling to hold something in the lot, and if so it should be converted into something the community can utilize.	6/18/2020 4:47 PM
193	ALL properties should be maintained	6/18/2020 4:30 PM
194	All Depends on each Situation	6/18/2020 4:29 PM
195	The vacancies can get to looking messy, but we're not doing too bad.	6/18/2020 4:28 PM
	not too bad but again some areas better than others

5	purchase private land when available	8/23/2020 6:33 PM
6	Keep 75% of trees when developing wooded areas!! Do not develop farmland into "a development" of McMansions and dozens of the same house.	8/6/2020 11:56 AM
7	Planning should focus on creating facilities that are amenable to people while also retaining trees and permeable soil and bird and insect habitat. Efforts should be made to encourage or even incentivize landowners to maintain wood lots and unmowed, unsprayed pollinator habitat where the landowners otherwise mow but don't use/enjoy. Farmland should be preserved and farming should be encouraged - but I'm not talking about sprayed GMO corn and soy that pollutes/degrades water, soil, insects, people etc. I'd love to see a local dairy that isn't polluting surface and ground water with an overflowing poop lagoon like Hastings dairy is. I'd love to see Geauga county lead the inevitable shift toward solar and wind energy. Yes it is inevitable - even in red counties - so just do it.	8/6/2020 10:39 AM

60	Back in early 90's I was a founding member of the Lake County Farmland's Protection Taskforce. We did a historic study frequently referenced by planners now nationwide. The Cost of Community Services Study. It showed in Madison and Perry Townships that for each \$1 of residential tax collected; residences consumed \$1.50 of community services; commercial industry consumed \$0.72 for each dollar collected and agriculture consumed \$0.34 for each dollar of tax collected. These ratios really have not changed. You have to have appropriate balance. You can out build this situation with residential along. Study was done in conjunction with OSU and OSU Agricultural Extension for Lake County, OH.	7/14/2020 6:32 PM

84	We have great access to walking trails. More bike and horse trails might be in order. More playgrounds at existing parks would be great - my kids really love the new "ropes course" playground in South Russell on Bell St for example and the Middlefield Splash pad. We seem to have lots of baseball/soccer fields, but my kids play hockey so I am not well versed in field needs for other sports.	7/13/2020 5:33 PM

I've completed at least 3 surveys over the years, each on with the	7/2/2020 11:19 AM

similar questions and yet nothing has ever come from any of them. Maybe I'm the only person in the Twp or County that has the concerns and issues that I do. 96 Reduce wasteful spending. Stop trying to fix what isn't broken. Geauga is fine the way it is. 6/30/2020 4:16 PM Don't bring city problems to our peaceful townships. Keep us safe & quiet. Don't add apts or bus service. We don't need the traffic & problems like 6/30/2020 3:22 PM 97 Mayfield Hts & Richmond Hts.. 98 These questions are very leading. 6/30/2020 10:06 AM 99 Maintain open space zoning. Eliminate subsidizing developers. Growth based on land 6/29/2020 6:42 PM capability not city services. 100 It seems there is not a viable homeless shelter in Geauga County. That should be a priority. 6/29/2020 10:25 AM 101 Combatting systemic racism 6/28/2020 8:52 AM 102 I don't know 6/28/2020 8:24 AM 103 Preserving natural areas 6/27/2020 10:30 PM 104 Tax reduction 6/27/2020 3:30 PM 105 environmental impact of development 6/27/2020 2:20 PM 106 Minimizing growth 6/27/2020 8:37 AM 107 Continue improving schools without raising taxes. How can Geauga County be the best using 6/26/2020 9:12 AM the metric Education Rank per dollars spent per student. Businesses that win make a great product for less money than their competitors. Our school systems should run the same way. 108 Democrats that change party affiliation so they can get elected, i.e., Dvorak. 6/25/2020 10:39 PM 109 I think those three things will promote Geauga Co as a place for all families to live. I hope that 6/25/2020 3:32 PM Geauga Co will take steps to make it more inclusive to minorities and I think all three things can be done while maintaining a rural character. 110 Natural areas. Its a shame that this doesn't mean the parks anymore but its a fact. 6/25/2020 9:18 AM 111 For safety reasons, a light should be at the entrance to every street off a main road. Address 6/24/2020 2:30 PM the depth of ditches on the sides of 306. They are extremely dangerous especially in the winter. 112 Funding safety forces 6/23/2020 8:50 PM 113 Water quality 6/23/2020 2:54 PM Township roads 114 6/23/2020 1:28 PM 115 Racism 6/23/2020 12:12 PM 116 Racism 6/23/2020 7:15 AM 117 Lowering taxes 6/22/2020 10:49 PM 118 homeless shelter/affordable housing 6/22/2020 9:03 PM tourism and upgrades/improvements to Punderson State Park by the state 119 6/22/2020 7:40 PM 120 clean out the ditches and clean up intersections that have bad visibility. hate the trashy front 6/22/2020 4:46 PM yards that are net kept well maintained. 121 Increasing Diversity 6/22/2020 3:44 PM 122 Lack of diversity in our county is hurting our children. They are not going to be as well adapted 6/22/2020 3:41 PM to differences in people when they leave the county as adults. 123 Conservation of waterways and natural areas, and most importantly making target shooting 6/22/2020 3:36 PM illegal!!! 6/22/2020 3:21 PM 124 Services for homeless, there currently are no shelters or housing for homeless in the county 125 Promote acceptance and tolerance of those who live in poverty as well as minorities, and stop 6/22/2020 2:36 PM

prioritizing violent plans to subjugate citizens who may wish to exercise their freedom of speech and freedom to assemble.

1	Too much new building going on but empty buildings still stand empty. Slowly turing into Cleveland situation. Slum lords. Please keep standards high and keep developers out. Let them ruin land some where else.	8/30/2020 8:51 PM
2	Very concerned about the money that is used on our parks. Love the parks. But now we have enough parks.	8/30/2020 8:46 PM
3	Property tax relief for retired military veterans	8/30/2020 8:42 PM
4	The main concern is with our very dusty road. Why cant the Parkman Trustees chip and seal it this year?? We know Parkman has gotten lots of grant money. All they know is to put more limestone grovel on the road. It makes it very, very bad dust. Why dont they save money by not laying that horrible stuff. Seriously, Newcomb is so load it makes you sick. If the Parkman Trustees lived on Newcomb Road they would chip and seal it in a heart beat.	8/30/2020 7:40 PM
5	Please, get on the roads in Parkman Township. All the big maples along the road were cut years ago. Road still sitting same as it was! Dust is awful in the summer! Newcomb is a heavily traveled road.	8/30/2020 7:16 PM
6	Ive been on our 40-acre plzak/gilbert property for 88 years. It's so good to look out and see no new construction, no new homes, no new pavements, ect. We're protected from having to see all those "newonces" by a barrier of trees and brush dividing us from a 17-home development. We love where we are and pray there wont be "horrific" changes that would impact the rural character of Geauga County.	8/30/2020 6:58 PM
7	The county desparately needs more affordable housing and a transporation system.	8/30/2020 10:17 AM
8	A buggy path is needed on old state road (608) begining at state route 528 to Middlefield past Kraftmaid. Children walk along 608 going to and coming from school and it has very narrow shoulders and is dangerous.	8/30/2020 10:08 AM
9	I would like to see Chardon Schools come up with an affordable plan for school building.	8/30/2020 9:20 AM
10	Montville has turned into a dump. Businesses at 528 & 6 look like they belong in Cleveland. Trustees wont do anything about it multiple complaints.	8/30/2020 8:22 AM
11	Questions vague, jargon specific. Not clear to the average person. This was fun	8/28/2020 10:46 AM
12	THere is a need for affordable housing for elderly. Lack of zoning enforcment. Concern over abandoned buildings. Concern that the Amish community is moving to other townships and roads are suffering from buggy and horse feces. water quality concerns. too much advertisement of geauga parks attracting outside residents.	8/26/2020 10:12 PM
13	Geauga Lyric Theater is a big loss	8/26/2020 10:01 PM
14	Would like to see unilateral enforcement of zoning in all townships of Geauga. It is certainly not consistent	8/26/2020 9:40 PM
15	We think its beautiful and has a lot to offer. There are no condos/apts to downsize to once kids leave the nest. Need recreation park for ATVs & motorcycles (people always leave our county and go to PA or southern Ohio) lets keep people here.	8/26/2020 9:33 PM
16	restrict or limit the construction of new commercial, industrial and housing developments until the many current vacane buildings and houses are refurbished and occupied.	8/26/2020 9:23 PM
17	This survey is biased. It is unnecasary and a waste of our taxes. Leave the county alone do not put in sewers or we will become an urbanized county. Keep it rural!	8/23/2020 6:33 PM
18	Graig's County is a great place to live. Don't ruin it.	8/7/2020 11:07 PM
19	This is a beautiful county and I love it here but am worried more housing and industry will destroy the natural beauty and health of our delicate water resources, air and green spaces.	8/6/2020 12:05 PM
20	Keep it as much Rural as possible! Keep the trees and boost conservation and Recycling/repurposing. Make the main thru-roads (306, 322, 87, 44) better/easier to use (turn lanes or 2 lanes in each direction)) so short-cuts through small streets isn't tempting.	8/6/2020 11:56 AM
21	Individual liberty is only as good as the community that it builds and sustains.	8/6/2020 10:39 AM

22	Maintain parks, natural areas. Expand housing and commercial properties in areas where they already are. Chardon Square is a wonderful asset. Town squares should be considered highly important, keep businesses and restaurants in the town squares where possible. Chesterland is ugly and an example of what not to do.	8/6/2020 4:32 AM
23	Keep it rural that is why we moved here	8/5/2020 10:45 PM
24	Improve quality of education	8/5/2020 8:43 PM
25	Southeastern Geauga County has become a thoroughfare for truck. It is no longer a rural community.	8/5/2020 5:30 PM
26	Addressing homeless & economic crisis cases is a great need!	8/5/2020 9:59 AM
27	Please keep out county peaceful and beautiful and don't attempt to turn it into an industrial overpopulated waste land. Let the city remain city and the country remain county for the health and welfare of everyone.	8/5/2020 9:50 AM
28	Please try to keep it beautiful and don't turn it into a wasteland of factories and housing developments. Let the cities remain cities and the country remain country for the health and welfare of everyone.	8/5/2020 9:39 AM
29	minimize pollution and commercial/industrial development	8/5/2020 12:07 AM
30	would like rural and natural areas preserved and would like economic disparities recognized in housing and service accessibility. More walkable communities to encourage neighborhood unity	8/4/2020 11:27 PM
31	None	8/4/2020 11:00 PM
32	destruction of park land and water ways	8/4/2020 10:54 PM
33	Please maintain our natural resources and green space	8/4/2020 10:01 PM
34	Keep the parks natural for those of us who love nature.	8/4/2020 9:52 PM
35	Explore benefits of charter county, including elimination of antiquated elective offices & township government, but slightly expanding county commission & an elected executive. Reinvigorate county planning commission & increase its budget & scope of services. Actively support noaca.	8/4/2020 9:48 PM
36	I have seen a rise in extremism in the politics of the county. When the antics of a renegage Judge and an openly racist Commisioner are praised by many, we have a real problem attracting social diversity.	8/4/2020 8:34 PM
37	County Governments penchant for removing governmental offices from present locations in Chardon city especially abandoning the historic and iconic courthouse seems silly, shortsighted and more like some sort of retribution than anything else.	8/4/2020 7:57 PM
38	I would like to see continued preservation of natural areas.	8/4/2020 7:17 PM
39	First and foremost: Maintain the green/natural conservation lands is a must. This is the character of Geauga County and losing this quality will destroy the nature of our community. Restrict commercial and industrial development. Limit new housing projects. I'm serious. Don't turn Geauga County into Solon, Mentor, or any other average boring suburb. If it happens I hope I die first.	8/4/2020 7:16 PM
40	Needs more political diversity!	8/4/2020 6:07 PM
41	Keep us rural, please! It is a good place to live	8/4/2020 3:50 PM
42	N/A	8/4/2020 3:21 PM
43	Very worried about the direction the Geauga parks are going. More theme park than nature	8/4/2020 2:51 PM
44	It is no wonder Geauga County is the second most wealthiest county in Ohio. People are drawn here mainly because of its many natural areas, rural character and local businesses. Once these things are eroded, it can never be brought back. As with most things, the key is prevention. If we have appropriate laws and a vision for the future to direct our county to maintain these characteristics, above all else, then we will never turn into any of our	8/4/2020 2:40 PM

neighboring "city" counties. People will continue to flock here both to visit and live. Please work to keep Geauga a beautiful retreat for everyone.

	work to keep Geauga a beautiful retreat for everyone.	
45	Keep the character of Chardon Square as it is.	8/4/2020 2:39 PM
46	Would love to see Geauga County become even more of a haven for nature not only for itself but for all of us to enjoy as it is precious and delicate and should be treated with almost a religious respect as it gives to us in return for our respect for it	8/4/2020 2:21 PM
47	please stop adding big shopping centers	8/4/2020 2:18 PM
48	Geauga County is a naturally beautiful place we will NOT be well served by turning it into another Mentor. Protection of natural area is vital. There is economic value in protecting what we have - new businesses that understand that value will make us thrive into the future.	8/4/2020 12:36 PM
49	There has been too much development. There are empty stores already.	8/3/2020 10:59 AM
50	I live this area due to it's rural and natural area and hate to see unneeded development.	8/1/2020 5:28 PM
51	We are already overrun by Semi trucks and Dump Trucks. We do not need more homes more people and more businesses causing more trucks! Please be more selective and more restrictive we don't want to be the next CONCORD TWP!	8/1/2020 8:10 AM
52	keep it rural, please don't over develop it!	7/31/2020 9:58 PM
53	focus on redevelopment of older commericial area before looking to expand	7/31/2020 3:57 PM
54	Deteriorating properties and home values.	7/31/2020 2:10 PM
55	Keep any additional big box stores out.	7/31/2020 11:33 AM
56	please keep the rural nature of our community	7/31/2020 11:31 AM
57	Removal of corrupt public officials should be a top priority.	7/31/2020 9:49 AM
58	I'm concerned that current residents will not support new residents based on preconceived assumptions. I worry this will cause them to vote against every advancement. I've seen it happen in other communities.	7/31/2020 9:36 AM
59	Have Middlefield get rid of the sign that says "Fifth largest Amish settlement in the country". It is not right that they have chosen to highlight this religion over others.	7/31/2020 7:39 AM
60	I love the County but it needs to be updated some with residences and businesses held accountable for shabbiness.	7/31/2020 4:14 AM
61	none	7/30/2020 10:14 PM
62	Economic development, bringing in larger employers to help with tax base. Rising Property taxes will drive away seniors and younger families	7/30/2020 10:13 PM
63	Geauga County needs to transform its image and reputation from being rural and somewhat backward to young and energetic. The future of the county depends on younger families to be attracted to come here. This won't happen if the county feels old and dated (the school buildings). What is drawing a young crowd besides the annual brew fest?? The Maple Festival does not attract a young, hip crowd.	7/30/2020 9:31 PM
64	Geauga county is being ruined by hodge podge development and ugly construction of commercial buildings. All new commercial should look at the beautiful Guido Buildiing and the Funeral Home next to it. That's beautiful constructionthat should be what's allowed in Geauga County.	7/30/2020 8:34 PM
65	Please keep Geauga County RURAL! We have Lake County and Cuyahoga County abutting Geauga County to the North and West. I DO NOT want the congestion, crime, and close living as displayed in these counties.	7/30/2020 7:24 PM
66	I am wary of offering excessive tax breaks to lure in business	7/30/2020 10:05 AM
67	We are losing rural character due to lack of foresight	7/30/2020 9:05 AM
68	I would love to see more horse trails and a larger horse community	7/30/2020 8:19 AM
69	The cluster homes of Bainbridge in Canyon Lakes are awful. No more homes on less than a	7/30/2020 7:17 AM

	1/2 acre.	
70	Most of the people who moved here from the city and suburbs, moved to get away from those places. Do not ruin what we have here by changing it into the places we left.	7/30/2020 7:17 AM
71	Look to our past to see what people missed/needed 50 years after it was gone to discern patterns of how to plan movement forward. Geauga is not the only place I have lived in my life but it is the only county where people seem to identify as a county-wide community. To retain that cohesion and character, we need to focus on what preserves that identity and continue to nurture it. That strength of community feeling is what helps keep us safe and strong in times of disaster and disharmony. Cuyahoga and Lake sold their planning souls to commerce and industry and pay for it with constant conflict.	7/30/2020 5:48 AM
72	People like living in Geauga because it is a quite rural area. The county is not hurting for money and we do not need commercial development. My favorite thing about living here is that it is quite country living, a lot of the businesses are small family owned and we have lower crime rates than surrounding counties because we don't have large amount of low income housing and we don't have huge business sectors. Keep Geauga Rural.	7/29/2020 10:17 PM
73	None	7/29/2020 7:27 PM
74	I just returned to Geauga county, the county I grew up in because of the rural, quiet nature of the county compared to Cuyahoga and Lake county. Please preserve this county the way it is, and just make upgrades to existing buildings or putting new businesses in vacant buildings rather than making new buildings.	7/29/2020 7:25 PM
75	We do not need further development. I live here because I like the rural atmosphere. Please do not spend resources to add either commercial or residential development. That is the last thing I want. We have plenty of businesses to meet our needs and can get to anything we don't have with ease.	7/29/2020 4:10 PM
76	in my opinion the county will only progress with honest committed and dedicated representatives. We need better management in the county that get things done and dont waste time and money	7/29/2020 3:31 PM
77	Please change the county charter! It is archaic and the people need the power of recall elections.	7/29/2020 1:16 PM
78	I grew up here and recently moved back. What I love is the rural environment, friendly people and lots of hiking for me and the kids. I have lived in several places over the last ten years and geauga county is unique in its rural feel while still being close to the things you need shopping etc. I don't think that rural feel should be altered because it's what makes our county beautiful and desirable to live in.	7/29/2020 1:00 PM
79	Interesting that there were no questions regarding Burton and that is where the new mega school is being built	7/29/2020 10:16 AM
80	Fix these roads! Also, bring some fun into the county. Maybe that will keep young kids from trying drugs	7/29/2020 6:32 AM
81	Preserve the county seat in Chardon using the square as the hub.	7/29/2020 5:45 AM
82	If I could beg I wouldPLEASE help with internet/cable options down RT 168 (Tavern Rd.)	7/28/2020 9:17 PM
83		7/28/2020 7:51 PM
84	Dont ruin our wonderful gem by over development	7/28/2020 6:03 PM
85	Please keep us rural. We do not want ro live in a congested city.	7/28/2020 5:43 PM
86	Keep it rural	7/28/2020 5:39 PM
87	Keep Geauga County Beautiful!	7/28/2020 4:37 PM
88	Something akin to Auburn Career Center in central Geauga County, with focus on training workers for local employment and with investment from local industries.	7/28/2020 4:08 PM
89	Geauga is a special place. We need to invest in keeping its rural character, not suburbanization.	7/28/2020 2:47 PM
90	need to restrict the conversion of farm land to homes	7/28/2020 11:10 AM

91	adding a Dollar General every 5 mile is rural settings is not what a community wants. It also take away the character of a community and puts pressure on local small business. If I wanted to live somewhere where everthing was down the street and looked the same then I would live in Mentor or any other state. Leave Geauga county alone.	7/28/2020 11:04 AM
92	Would like to see more restaurants and shopping in the Chardon area. Too many small businesses leaving. Concord has done well in attracting retail and unique restaurants.	7/28/2020 8:45 AM
93	Geauga County has no future as an entity. The expansion of the Cleveland Metropolitan Area reached the western townships in the middle of the last century, first as a bedroom community, followed by retail and other commercial growth. The demand for services soared as did taxes, making it impossible to continue generations of family ownership, which killed off most agriculture, accelerating the eastward expansion as farmlands were sold and developed. Wal-Marts, and other mega stores replaced local shops. City living, city lifestyles, and city problems now define our County. Geauga is now just as much a suburb of Cleveland as Orange, Bedford, Beachwood, Chagrin Falls, et al. There can be no future for a county which has been assimilated by a larger entity.	7/27/2020 10:43 PM

99	I love Geauga county. The city of Chardon should look into making the square more like Willoughby downtown. Bring more restaurants and entertainment.	7/27/2020 4:35 PM
100	Keep it rural	7/27/2020 3:38 PM
101	A youth or family program to help the citizens realize what great amenities and opportunities are currently provided. Most people that I interact with do not understand how much there is to visit and see. As far as commercial and industrial platforms are concerned, there maybe future opportunities there. Chardon has the quickest access to route 90. If money were to be invested to bring more businesses in, I believe that the road infrastructure near Chardon would benefit. Around the city there is a lot of traffic just passing through, a bypass may be beneficial.	7/27/2020 3:11 PM
102	I am in a resident of Geauga county all my life. also lived in lake county for a few years and in Milwaukee Wisconsin for about a year. I have traveled all over the United States for work, and always find myself coming home to Geauga. Your residences do not want things to change. We like things quiet and spaced-out. If you attempt to change the county into a more suburban area or raise our taxes with useless programs we will leave. So relax, your job is easy. Keep Geauga great.	7/27/2020 2:52 PM
103	If more housing is to be built it must be affordable to middle class families	7/27/2020 2:14 PM
104	Hydraulic fracturing, fossil fuel extraction (gas, oil and coal), and burning permits should be abolished in the county. Incentives to keep trees, reduce air pollution of vehicles, and agricultural equipment. Expansion of gardening programs, and how to grow/store your own food, composting, soil building, rain collection, and homestead farming should be encouraged more than already are through tax incentives and educational programs. Groundwater protections should be strengthened to preclude the polution of groundwater. Incentives for alternative, sustanable fuels and transportation should be higher priority then they are. Carbon reducing strategies for the average person should be rewarded not penalized. New clusters of communities such as developments and cluster housing should be required to have sustainable energy and water plans that are minimally polluting, self sustaining, and low cost. All new development should be compared to available underutilized space of the same type (i.e.; commercial, residential, industrial) and disallowed if available underutilized space is available within walking distance of approximately 15 miles. Instead, the underutilized constucted space should be upgraded to the new LEED standards and the entity located there. Progress does not always equal new construction! However, if new construction is properly permitted, it should be based on a zero net carbon footprint. This would include homes and	7/27/2020 1:34 PM

businesses. If not acceptable, they can move the project. NO TAX ABATEMENTS for developers!

111	I am new to the county and moved here because of the small town feel close to a city. I would love to see Chardon Square and other areas with buildings redeveloped to encourage the addition of restaurants and other shopping. Please do not add a bus service to Geauga County. It really isn't needed and is a waste of tax dollars.	7/27/2020 11:54 AM
112	No	7/27/2020 11:47 AM
113	Please try to maintain the quality of Geauga County. Hearing about bus lines, low income housing, and drug rehab centers among residential communities is encouraging my husband and i to begin looking outside of our county. We moved here for the safety, and we are not ok encouraging drugs and homeless people to be around our future children. I'd really like to keep our county affluent, and a place where people strive to move here, not a place that is open to everyone (even homeless people).	7/27/2020 11:32 AM
114	I would love to see a center with a pool and walking track.	7/27/2020 11:06 AM
115	Like to keep rural setting and as much farmland as possible. Too much commercial development has been done only to be abandoned. Investment in Broadband would pay off much more than the tax giveaways to new commercial entities. Great internet brings great jobs.	7/27/2020 10:21 AM

121	Keep the country!	7/27/2020 2:27 AM
122	We do not need cluster housing anywhere in the county. We need to keep the current 3 acre minimum for building homes and current frontage requirements. Houses in our county and their uniqueness is important to the rural feel of the area cluster homes bring in a multitude of the same home on postage stamp lawns. We will lose charm and appeal.	7/27/2020 12:55 AM
123	With Berkshire Hills closing, we are concerned the land is going to be slated for lots of lower priced housing which will impact our property values and increase traffic which will negatively impact our quality of lifel.	7/27/2020 12:21 AM

Increase county engineer patching/resurfacing program. 129 I live in geauga county because it is rural and yet close to cleveland. We do not need any 7/26/2020 7:59 PM more stores, business, housing, anything. What we need is less. 130 Windstream in the county needs replaced 7/26/2020 7:56 PM 131 I like geauga county- do not mind driving further for some amenities. Please keep its unique 7/26/2020 7:51 PM rural character. 132 Maintain rural atmosphere, no apartments or government housing. Support law enforcement. 7/26/2020 7:45 PM 133 None 7/26/2020 7:32 PM 134 We have a central rural location between Cleveland and Youngstown. Keep it as is, no major 7/26/2020 6:41 PM development needed. No cluster developments / keep it rural! 135 7/26/2020 6:24 PM Overall, a wonderful place to live. 136 7/26/2020 6:02 PM Please keep Geauga County rural!!! If we wnated to live in a suburban or urban area we would 137 7/26/2020 5:36 PM vave bought a house in Mayfield or Mentor! We love seeing the stars at night, feeling safe and have a quiet neighborhood! 138 County needs to promote participation & service in local government. 7/26/2020 5:23 PM 139 The future of Geauga County would do well to keep its quaint rural small-town atmoshpere 7/26/2020 5:17 PM where families can live in peace and outsiders would enjoy coming to community events, parks, restaurants, farmer's markets, and boutique shops 140 Living by the 422 bridge on Munn, it would cause a lot more traffic and safety of our house. I.e. 7/26/2020 4:25 PM disabled vehicle on the highway and person walking to our house due to closet building. LE/sheriff might take 15-20min if assistance is needed. 141 I actually love growing up here in Geauga county. I love raising my kids here too. 7/26/2020 4:23 PM 142 Keep it rural 7/26/2020 4:22 PM 143 Keep up the good work 7/26/2020 4:21 PM 144 Keep our county rural and preserve farmland. Geauga county is a beautiful and peaceful place 7/26/2020 3:54 PM to live. We would like to see those features maintained for future generations. 145 NO BUS SERVICE. NO SECTION 8 HOUSING. NO CITY WATER AND SEWER. NO 7/26/2020 3:53 PM ROUNDABOUT AT 306 & 87. Keep our county rural and green. 146 We do not need busses to bring in the riff raft. Keep us a beautiful countryside & no housing 7/26/2020 2:59 PM development Better and preferably more local business shopping is needed 147 7/26/2020 2:43 PM 148 We moved out here 40 years ago for the rural area and now it's turning into a mentor which we 7/26/2020 2:12 PM don't like 149 While I would for development of retail and dinning options, I would would like to see More park 7/26/2020 2:10 PM and rec options. As well as entertainment options for children 150 I would like to see an investment in remodeling and/or building new schools to meet the 7/26/2020 1:57 PM demands of technology needs, attract families with young kids and more athletic fields. 151 We love Geauga and hope it will maintain its charm. The last thing we want in a Geauga 7/26/2020 1:53 PM version of Painesville/Mentor. 152 Please consider an indoor recreational facility in the Burton area with connections to new 7/26/2020 1:41 PM school. Also....We have closed businesses in some areas, without expanding to rural areas the ones already existing could be updated and used. Thinking out of the box and creating spaces that the community now travels outside the county to obtain. Other counties benefit from wineries and distilleries, why not a microbrew here. One must travel to Bainbridge or Mentor for movies or retail from Burton. Chardon could be a hub. With more people working from home we need community services in our area.

156	We believe that this is a great county, some things need work. This Jake brake the logging trucks use are super annoying. They rattle my windows wake me up, and I live 2 houses from the corner of 87 and 2 houses from a school. There is no reason to be going that fast. Also the amish drinking and 9verloading their buggies. a	7/26/2020 1:08 PM
157	Keep it rural. Stop all the logging. Stop taking away or woods and wildlife to build yuppie houses.	7/26/2020 1:06 PM
158	I love our county as it is, I don't want mass amounts of people moving here. I don't want to see chardon turn into mentor. Crime will go up with low income housing / apartments.	7/26/2020 1:03 PM
159	We love Geauga County.	7/26/2020 12:51 PM
160	Moved out here to get away from all the noise, pollution, crime in the city and suburbs and to have more space between us and our neighbors.	7/26/2020 12:49 PM
161	We would really appreciate more bike paths. Also, we would love to have better roads and fewer potholes in the county. We chose to live here for the quiet and rural nature of Geauga County, along with the feeling of safety. We want it to stay safe and quiet.	7/26/2020 12:44 PM
162	Don't understand why on major roads, ex. 306, 87, 322, there isn't 3 lanes. There should be turning lanes along these roads so traffic can keep moving and lessens the chance for accidents. These are very busy areas.	7/26/2020 12:42 PM
163	I would hate to see Geauga County turn into Mentor. (A large shopping destination) I also would prefer no new growth in apartment buildings. I prefer a rural property owned area with rental houses rather than people stacked together. I believe that the pride of ownership leads to more engagement and personal responsibility in the upkeep of our towns, city, and parks.	7/26/2020 12:32 PM

167	It's foolish to adhere to an outdated view seeking to isolate chardon as a rural location clinging to its history. There's not many good jobs available within the county and all the housing is grossly overpriced.	7/26/2020 12:10 PM
168	I would like to see a ban on the Confederate flag. I've seen many displayed on porches and cars in Geauga County and it's sad that the people of Geauga County feel that displaying a flag of treason is appropriate. As a potential to be a multi-cultural family, we find the confederate flag to be incredibly offensive and disrespectful, not just to us but to the country as well.	7/26/2020 12:01 PM
169	Thank you for providing this digitally.	7/26/2020 11:45 AM
170	I see more and more traffic going through Geauga County. I think we are in a great place to capture evenie from tourism. I love the rural feel, my Amish neighbors and the safe environment here. I know that as Geauga county grows, we will need to regulate that growth. But I don't want to drive good businesses out of our community. Geauga County is a great location to live and raise a family.	7/26/2020 11:33 AM

178	My biggest fear is Geauga county turning into another Lake County. Most people who live here do so because we cherish the rural lifestyle and do not want to it turned into a big city. There is no need to keep adding cluster neighborhoods and large shopping complexes.	7/26/2020 11:07 AM
179	Please keep it rural. No development unless improving already developed areas	7/26/2020 11:05 AM

181	I have lived in Geauga county 35 years but have been visiting DTJ farm since the mid 1960's. I miss the rural atmosphere, cool fresh air, song of the frogs and the night sky which now for me is gone due to commercial lights.	7/25/2020 3:08 PM
182	The plan to shift county offices to be more central tot he county is a good one. Over the next 10 years is will have serious impacts on the central townships and their officials should be better and more currently informed of the county's timelines and intentions as the project progresses.	7/25/2020 2:21 PM

212	I love living in Geauga County, Middlefield Township specifically. There are not many things that I would change about this county. My family moved here from Lake County to get away from the hustle and bustle. While I understand that business is essential to progress as a community, the spacious, natural environment that we take for granted is our greatest asset that we should not overlook.	7/21/2020 6:25 PM
213	I like the geauga county is now, not over crowded, a nice amount of open space. I would like to see some growth in commercial businesses, but areas that already have them not to expand out to new areas. We have Mentor and other surrounding communities that want that. The increase in commercial traffic and workers from outside of our area, that don't live around here would greatly impact our community. Not in a good with. Look at problems that just Walmart drought in. We love our Geauga way of life PLEASE DO NOT ruin it for money.	7/21/2020 6:18 PM

216	I believe the county seat should keep the county offices, as Ohio Revised Code specifies, and because we have a historic courthouse which should be used and maintained.	7/21/2020 2:46 PM

Is there some way to explain about the rural nature of a place? City folk think they want to live in the country-and then try to turn it into the city! People live in a rural area because they'd like it to be rural. Please do what you can to keep it that way.	7/15/2020 1:58 PM

295	The point of the survey I am guessing is to gain some strategic vision. The County has lost economic ground because of politicians existing for their own benefit, smallish thinking of community leaders, lack of vision of Chamber of Commerce on important issues, we just don't seem to have cohesive leadership, law enforcement, property codes and standards etc. all neglect leading to decline. Look at what Bainbridege, Chagrin Falls, Aurora, Hudson have accomplished. You can't have low income housing and not maintain it. You can't have declining school buildings in your county and expect to be prosperous. You have to have visible leadership, cohesive message that addresses all segments of Geauga County society and residents.	7/14/2020 6:32 PM

We have been told we will never see anything faster. I think that is unacceptable in this day in age. Hambden trustees claim nothing can be done. AT&T and Spectrum have no intentions of coming down our road (even though we are 1 mile off 608 and we offered to pay for the wire). impetus for more business, which in turn would lead to an increase in people who want to live nearby. Some examples; Finding a way to take advantage of the views for restaurants, café's, and/or living units of some sort would capitalize on an untapped inherent asset and draw people there. Another idea: I heard the City is looking at replacing the Library - for a similar investment to building new they could likely purchase and refurbish the Chase Building - a rooftop café overlooking the square to serve the library visitors would be a memorable and fun experience. Then, offering housing and community options to fill the need of what people want. Mixed use and denser housing can be in the City of Chardon or the neighboring townships on land that is close to the City Limits. Neighboring townships also have land tracts that would accommodate "rural" pocket neighborhoods, which is the most underserved housing option in the county. (for example, neighborhoods similar to Bass Lake Community and Lake Lucerne small homes and small lots result in more affordable housing. These are extremely desirable areas but not enough inventory of these types of homes in these types of communities exist). Square footage minimums in our zoning code are outdated and unnecessary today. Although originally intended to help maintain a certain value, relatively stringent state building codes inherently protect property values simply by the investment required to meet those codes, even for small homes. Large homes are becoming dinosaurs, we need to allow for the demand for small homes. People need and want small lots that are easier to care for and small homes outside of the city. Townships would be smart to recognize and address this for long term economic benefits and land values. A vibrant and attractive County center like this could be a great asset for our residents. This, coupled with investing in cleaning up the visual appeal of

322 through Chesterland would be the best things we could do to move Geauga County toward
long term economic viability. In summary, I believe we must first attract and retain people
through housing options that work for todays desired lifestyles and budgets, this will naturally
lead to investments in more businesses of all types.

	lead to livestifients in more businesses of all types.

We do not need public busses or big businesses coming in and ruining of local communities by pushing the little man out and bussing in people from other ares to work at those places. We should be planning to conserve our way of life out here and keep it humble but a reward to live here.	7/4/2020 11:04 AM

436	Maintain the rural character of Geauga County. Thoughtful expansion of businesses	6/29/2020 9:09 PM
437	Most importantly every development government service action should require an IMPACT statement, accurate and true. Quality of life factors are the most important to maintain promote. Growth for its own sake will destroy quality of life in Geauga as it has done in neighboring counties, Lake County a good example. Caving in to residential developers is a big mistake and existing residents pay them every year by way of higher taxes. Developers are a burden to any community and they leave the community holding the expense bag. A stable population growth plan should be the goal. Let the neighboring counties continue on their high density growth paths. At least one county, Geauga should be the open space county, the only one next to Cuyahoga that is not highly developed. Accommodating developers is the kiss of death for Geauga County. Side note: This survey color, sea foam green with small black fonts is terrible to read	6/29/2020 6:42 PM
438	Need to enhance the social neighborhood group posts for exchange of information	6/29/2020 3:37 PM
439	People want to move here for the rural atmosphere which is slowly being eroded away by increased new developments of suburban style streets/housing and overabundance of retail.	6/29/2020 3:07 PM
440	Geauga's unique character of rural/semi-rural should not be changed in order to mimic surrounding large cities. To build apartments and add city water/sewage invites large-scale population moves, altering the reason why we choose to live herewhy we moved here in the first place.	6/29/2020 11:49 AM

working in the septic services state many times systems can be fixed but the current regulations require replacement. This needs to be reconsidered as regulations are one thing, but forcing home owners to spend tens of thousands to replace systems that can be fixed for a fraction will force people out of the county.

474	I believe that a lot of folks live here because of the county's rural atmosphere, small-town feel, and natural, undeveloped spaces. If this is to change, I believe that sooner or later a good number of our neighbors would relocate as the county became more urbanized, leaving us with, for good or ill, something other than the Geauga county we know and love. Right now it's a great place to raise a family. It feels like home, and that's what I hope my children get to look forward to as they age.	6/24/2020 8:38 PM

511	The County's population continues to outgrow its infrastructure. Combined with thru traffic it's making current traffic patterns difficult and dangerous. A good example is the road I live on, Woodin. It serves as a cut-through from 608 to Ravenna Rd. Add that traffic to the residents from Woodin Rd subdivisions + heavy traffic on Ravenna Rd make it nearly impossible to exit Woodin onto Ravenna. The traffic, along with the rises both immediately North and South of Woodin results either in taking your life in your hands pulling out of Woodin. Another light is not the answer but a traffic control is needed there, such as a 3-way stop.	6/22/2020 7:09 PM

517	I have a bi-racial child and I am concerned about sending her to school in Geauga County. She will have very few peers that are not white. I am worried that the heavily conservative environment allows a heavily racist subtext to flourish. Based on environments like the fair and other county sponsored events it is hard to see any shift in attitudes taking root. I am appalled at the number of overtly racist booths that are featured. For example, I see more confederate flag themed items for sale than than I do US flags. It is very disconcerting. If we move in the next 5 years that is why.	6/22/2020 3:44 PM
518	I LOVE Geauga County!! So proud of the small town feel that a lot of the communities are able to maintain. Love the many programs Geauga County has, especially the Dept on Aging and Park District and all they have to offer, cannot say enough good things about them.	6/22/2020 3:43 PM
519	Concerned about how much our county spends on riot gear and sheriffs budget. I would like to see investments in our people and community. Also concerned about people carelessly shooting guns off at all hours of the day and night.	6/22/2020 3:41 PM

520	If you want young families to move here (and stay) you have to make them feel safe. I do not feel safe here because of all the shooting I hear while outside with my children.	6/22/2020 3:36 PM
521	I am very concerned about the amount of gun shots I hear daily and the lack of diversity and the insular nature of the county. Outsiders are not welcome	6/22/2020 3:33 PM
522	I was very concerned about the county commissioner's comments about purchasing riot gear rather than seeking more just policing practices	6/22/2020 3:21 PM
523	Affordable and fair housing gets talked about and what we get is a sign for "The Park Avenue Mews" in front of a small weed covered lot. Too expensive fore any older adult. Chardon also has remodelled buildings with no tenants coming in. Something isn't right but the mindset is that everything is alright. There are problems here that need to be fixed.	6/22/2020 2:56 PM
524	Racism and gun culture are abominable, yet often espoused by County officials. The sheriff should separate himself from those who espouse shooting for minor crimes, and clearly berate that he believes in the rule of law. Geauga should preserve as much land in its natural state as possible. Large lot zoning should be maintained. More school districts should merge to allow for greater course offerings and to reduce administrative costs. An atmosphere of acceptance for all people should be the goal of each school, township, city, as well as the county government.	6/22/2020 2:36 PM
525	Sometimes it feels like we are living in the dark ages here.	6/22/2020 2:18 PM

530	NO FRACKING	6/22/2020 1:04 PM
531	Geauga County must maintain its rural character. The average size farm has reduced over time and farming is not the way of life it once was, which is troublesome, but not uncharacteristic of other areas in the state and nation. Job creation is very important within the areas currently zoned and sewered, but should focus on high tech (not possible without increased broadband communication), health, and skilled labor trade school jobs. The rural atmosphere is partly due to our location being farther away from Cleveland and the fact that certain retailers will not consider locating here due to insufficient population density to support it. Driving 20-25 minutes for major shopping in the more densely developed communities in adjacent counties should be viewed as acceptable in order to maintain the rural character. The County and townships should strive to , on a regular basis stay in contact (whether in person, email, conference calls/video meetings) etc.) to keep each other appraised of events, resources, potential new businesses, potential businesses to close, new residential developments, etc. to share collective knowledge.	6/22/2020 12:54 PM
532	I love living in Geauga County and proud to be a resident of Chardon Township. I am concerned about the number of businesses leaving chardon. I think we should be actively looking to bring new businesses to our town. With all the new housing prospects, we will be welcoming more families. This is great, however of our schools are not equipped or up to date, I don't see new families wanting to move here. We need to all be in this together. Community, schools, elderly population, business owners.	6/22/2020 12:25 PM

However, I think around my age group - I struggle to find jobs and career options in Geauga county. I also think a large sector of my age group travels outside of the county for bars, restaurants, and other activities.	6/22/2020 9:31 AM
554	I am worried about the property taxes. If the schools have a tax levy that passes, we will most likely have to move from our wonderful home. Can the County assist with coming up with ideas for the schools to obtain more funding without putting it all on property owners?	6/22/2020 8:59 AM
555	I worry about the community's support for public education. The failure of the Chardon school levy is very worrisome. The Chardon school buildings are in terrible and need to be replaced. The situation with the Newbury Schools having to merge with West Geauga is not good. Attracting families and businesses to Geauga County will be extremely difficult with school systems continuing to deteriorate and not being supported by the community.	6/22/2020 5:55 AM
556	With recent coronavirus restrictions our family has had detrimental set backs. Our road does not have access to internet and I have 3 children that were not able to do their school work the last half of the school year. 557	Please work to preserve the County's natural areas by limiting commercial and residential development. There are not many places left like this with clean air/water/woods/dark skies/green space. 571	Stop all the development. The reason to live here is because of the quiet and not a lot of people. We don't need more people or business unless you would like to encourage good local restaurants that in turn support the local farmers	6/21/2020 7:37 AM

577	Geauga is physically one of the most beautiful places in the world. I hope that my fellow residents can stay focused on maintaining that beauty, which is also protective of the environmental health and welfore of the entire NE Ohio region. At the same time, to live in Geauga County requires that we use our cars way too much. I would like to see more mass transit available for people to get to their jobs and shopping. Also, I don't know if others feel the same, but I would use bike lanes for transportation. I live near 306, and I'm afraid to ride my bike into Chesterland to shop because the shoulder on 306 is so narrow.	6/20/2020 10:04 AM

617	I think public transportation would be the worst thing to bring to our county. The reason people live here is to get away from the city atmosphere and elements. Public transportation allows for the county to become more city like, people live here because it is not accessible by anyone, public transportation would take that peaceful element away from our county and at that point we will be like Lake and Cuyahoga County.	6/19/2020 9:33 AM

621	With the investment in transportation as outlined above, this is a greener solution, which take more cars off the road. As many individuals rely on hauling as a career, more jobs would also need to be created in other facets. With a better developed recycling and green initiative we create jobs as well as preserve the county for future generations.
